WILDLIFE OBSERVATION PERMIT FOR NORTH MONOMOY ISLAND

Visits to the North Island of Monomoy National Wildlife Refuge will be regulated this year to prevent disturbance of tern nesting areas and gull management and population research activities. The permit period will extend from March to August. Individuals and groups planning to visit the North Island area during this period may obtain the required permit from the Monomoy National Wildlife Refuge, Morris Island, Chatham, telephone 945-0594.

Access by permit only during this period of time is necessary to inform visitors of designated landing areas and access routes which will not disrupt the nesting birds or wildlife management program.
