FALL HAWK WATCH

The Eastern Massachusetts Hawk Watch is looking for volunteer observers. This fall, coordinated hawkwatches will be held throughout New England on the weekends of September 11-12, 18-19, October 2-3, and October 30-31. Observers are needed to hawkwatch on sites throughout eastern Massachusetts for all these dates.

Observers are also needed for the consecutive-day hawkwatch on Wachusett Mountain, in Princeton, from September 4 through October 11. If you want to see hawks and improve your ability to identify them, there is no better opportunity to do so than by participating in the Wachusett hawkwatch as often as possible.

To sign up for dates and sites, obtain further information on good sites, or inquire about hawkwatching, please contact:
