

BIRDS

B i r d C a l e n d a r 1 3 t h S e a s o n

1 9 1 7

The Bird Season has opened; Robins were on the Campus and about the City on Monday, February 26. All interested in Birds are invited to keep their eyes and ears open, and send their records to the Calendar which will be issued at intervals during the spring.

The names of all resident or migratory Birds, seen or heard since January 1, 1917, when certainly identified, will be welcomed. Not only the name, but also the date, place, and approximate number of individuals seen, should be given. Instructors at the Biological Laboratory, and members of the Bird Class (Biology 10) will be glad to receive any reports, or give any information regarding the study of Birds, in their power. Students at the College for Women may hand in their records to Professor Hulme, or to any member of Biology 10.

February 28, 1917.

Francis H. Herrick.
