

BIRD CALENDAR

W. R. U. ----- 21 st Year

Students and all others interested in Birds are invited to contribute to this Record which will embrace notices of all birds, whether residents or visitors, observed in the Cleveland region since the autumnal migration, - November, 1924 -.

Birds can be identified generally by their size, form, coloring, call-notes and habits. Reports should include the Name, Date, Place of Observation, and the approximate Number of Individuals seen, accuracy being the great desideratum.

Aid in determining the names of unidentified or doubtful species will be gladly given. Reports may be sent or given orally to Professor Hulme of the College for Women, Professor Finrock of the Law School or to the undersigned at the Biological Laboratory.
