

NECROLOGY

Your Editor has received word that the following members have passed on:

Mr. Louis E. Bishop
Mr. Edwin G. Foster

STATION REPORTS

Having published reports from two far northern stations in recent issues, we are glad to have one from the far south. Mr. W. M. Davidson of Orlando, Fla., sent in the following record for the period ending April 30, 1950:

Least Sandpiper	5	Summer Tanager	3
Semipalmated Sandpiper	1	Red-eyed Vireo	1
Western Sandpiper	4	White eyed Vireo	3
Sanderling	3	Black & White Warbler	2
Lesser Yellowlegs	1	Worm-eating Warbler	1
Bob-white	3	Orange-crowned Warbler	1
Ground Dove	2	Parula Warbler	4
Red-bellied Woodpecker	3	Black-throated Blue Warbler	1
Blue Jay	88	Myrtle Warbler	5
Florida Jay	5	Yellowthroated Warbler	3
Redwing Blackbird	113	Palm Warbler	3
Boat-tailed Grackle	4	Prairie Warbler	5
Savannah Sparrow	16	Ovenbird	2
Field Sparrow	1	Yellowthroat Warbler	39
Swamp Sparrow	5	Redstart	13
Song Sparrow	1	Mockingbird	20
Lincoln Sparrow	2	Catbird	11
Cardinal	75	Brown Thrasher	43
Painted Bunting	2	Carolina Wren	12
Towhee	38	House Wren	12
Tufted Titmouse	7	Ruby-crowned Kinglet	1
Veery	2	Hermit Thrush	3

He writes that since then he has banded some herons, terns and gallinules.

Merrill Wood has banded two Canada Geese this November, remarking that they were birds that were too tired to fly, but they have gone south now. And - speaking of the Woods - Merrill's father, Dr. Harold B. Wood, of Harrisburg, Pa., and ex-president of EBBA, reports a sight record of the Smith's Longspur at Beach Haven, N. J., far east of its normal range. Ordinarily EBBA News does not publish non-banding records, but this one from an old bander is worthy of an exception. Three individuals were seen on August 7, 1950.

Howard Mahnken, of Lambertville, N. J. reports that he banded the following species from April 30, 1949 to April 30, 1950:

48 Juncos	16 Chickadees
4 W.T.Sparrows	11 Titmice
6 Song Sparrows	4 Downy Woodpeckers
6 Goldfinches	9 W. B. Nuthatches
3 Purple Finches	2 Cowbirds
27 Starlings	2 C.Swifts
24 P. Grackles	2 Screech Owls
2 Robins	1 Saw Whet Owl
19 Evening Grosbeaks	
	<hr/> 186 - Total

He also writes: "I use chick feed, bread, sunflower, canary and millet seeds for bait. For some birds I use suet. I only operate 4 traps. Thanks to my pupils, I have been able to band a few unusual birds. The three owls were all brought to school by pupils last year. Not included on the list above is another screech owl brought to me last month by a pupil. They also bring in bands of birds found dead."

JUNCO SYMPOSIUM

Please do not forget the Junco Symposium for the February issue. Reference to the previous symposium on White-throats will help you decide which of your information is of value.

NEW MEMBERS

Mrs. Beecher S. Bowdish, Demarest, N. J.
Dr. William Edgar Curtis, Department of Biology,
St. Lawrence University, Canton, New York
Mr. Kenneth D. Niven, 61 Broadway, Monticello, N. Y.

CHANGES IN ADDRESS

Mr. H. F. Farrand from: 7 Guest Lane, Wilmington 280, Del.
to: Pier #1, YTB218, U.S.Naval Base,
Philadelphia 12, Pa.

Mr. Marion L. Hundley from: Box 43, Granville, Ohio
to: 831 Miller St., Morgantown, W. Va.
