BANDING PLIERS

These pliers have proved invaluable in Operation Recovery use as well as for home station every day banding. Ask any bander who has used them or has seen them in use.

These KENNARD type pliers have holes bored in flat-nosed pliers that fit standard band sizes to avoid lapped bands and make it quite easy to get a perfect fit. A band opener on the plier enables the user to open the band evenly with one operation. A spring provides tension to keep the opened band in the plier while handling the bird.

One plier will handle band sizes 0, 1, 1B and 1A (price \$6.00) and the other will handle sizes 2 and 3 (price \$5.00) -- prices include postage within the U.S. Send your order to the originator and manufacturer -- Roger N. MacDonald, 850 Main St., Lynnfield Center, Mass.
