

With the increasing tempo of correspondence pertaining to the coming annual meeting, this message will, of necessity, be brief. Once again, I encourage those of you who are able, to attend the annual meeting. In addition to the reasons for attending given in the last issue, I should like to add one more thought for your consideration.

We as banders are aware of many ways to measure various things with various devices. We measure wings with rulers, weights with balances, abundances with net-hours, etc. However, when, where and how do we measure ourselves? At an EBBA meeting, of course. A meeting is a measuring device. It allows us the opportunity to compare our techniques, results, and ideas with those of others. This measuring, in turn, is a way to self improvement. How do you measure up?

There is one other point made earlier that I should like to reemphasize. As spring approaches and you rely more on mist nets, I should like to remind those of you who are in the market for new nets to consider ordering from our net committee. EBBA's nets have been improved from the standpoint of the quality of the netting, increased bag and the addition of tethering. As such, they are well worth your investigation.

I'll look forward to seeing you in Newark, Delaware in April.

Dr. Robert P. Yunick, 1527 Myron St., Schenectady, N.Y. 12309

ADDITIONAL COMMITTEE APPOINTMENTS

The following appointments made by President Robert P. Yunick are in addition to those listed in EBBA News 31:5, Sept.-Oct. 1968, page 206.
