\*REVERSE MIGRATION: Feasterville is some 60 miles northwest of Island Beach

\*\*EBBA News Vol. 35 #1 Although Dr. Blake did not capture this Junco in fall of 1970, fall or winter of 1971, or winter of 1972, he did observe a "left-leg" banded Junco during those periods. I band on left leg, Dr. Blake on right.

--Mabel Warburton, 44 Hilltop Road, Yardley, Penna. 19067

EDITOR'S NOTE: Recoveries listed represent only those banded by the author; if these are to be used in research, they should be verified with banding lab.
