

EDITORIAL

This is the last issue of the *Florida Field Naturalist* that I will serve as editor. I am particularly appreciative of help provided by the following people: Kaye Gainey, administrative assistant at Tall Timbers Research Station, was a pillar of organization and support in all phases of editorial activity; Bobby Crawford was an invaluable sounding board in difficult decisions and a “pinch-hit” reviewer; former editors, Fred Lohrer and Walter K. Taylor made timely thoughtful suggestions; and former editor and now chair of the Florida Ornithological Society Editorial Advisory Committee, Peter Merritt, reviewed the “Guidelines for Contributors”; Jeffrey Johnston of the E. O. Painter Printing Company was very helpful in all ways during the printing of the *Florida Field Naturalist*. The peer review process is sometimes slow and circuitous, and I am deeply grateful to the authors for their patience and the many reviewers of manuscripts.

Those who reviewed manuscripts for this volume are listed below. Individuals who reviewed more than one manuscript are denoted with an asterisk.
