Inland Bird Banding Association

Founded 1922

Annual Report of Birds Banded in the Inland Bird Banding Association Region, 2017

IBBA is providing banding totals for the region on an annual basis. This is intended to stimulate regional coordination of banding operations and to provide rudimentary information for researchers considering studies on species and where a target species may be located in the region. This report has been compiled by requesting data directly from the Bird Banding Laboratory (USGS Bird Banding Laboratory, unpublished data retrieved Oct 2018). Future reports will be compiled following BBL file updates which occur annually in August of the following calendar year.

Highlights for 2017 include a total of 346,427 (-4% from 2016) individuals of 402 (+9% from 2016) species or sub-species. Texas recorded the most species (269) followed by Illinois (189) and Ohio (170). Banders in Ohio banded the largest number of individuals (40,304) followed by Illinois (38,230) and Michigan (33,927). The lowest state banding total was Mississippi with 2,869. There were 406 (-2% from 2016) active permits in the IBBA region in 2017. Wisconsin had 55 permits, Texas 51, and Michigan 46 to lead the state/provincial jurisdictions. As might be expected, the ten highest volume permits included eight governmental agencies that have regulatory responsibility for hunted species of migratory birds.

The largest volume of birds banded on a single permit reported 16,908 birds for 2017 (Table 1). The top ten species banded were heavy toward hunted species. Once again, the top non-hunted species was the Ruby-throated Hummingbird,

indicating a major effort across the region on this bird group. Top ten species (and previous rankings) were: Canada Goose 44,198 (1 in 2016); Mourning Dove 26,812 (2 in 2016); Wood Duck 26,574 (4 in 2016); Mallard 24,959 (3 in 2016); Blue-winged Teal 19,342 (5 in 2016); Ruby-throated Hummingbird 15,455 (6 in 2016); Purple Martin 9,413 (10 in 2016); Tree Swallow 7,980 (8 in 2016); American Goldfinch 7,323 (7 in 2016); and Northern Saw-whet Owl 6,627 (9 in 2016). Thirty species were represented by one individual in 2017.

A complete listing of numbers banded by species and state is included in Table 2.
