

CONTENTS

INTRODUCTION	1
STUDY AREAS	4
METHODS	10
Maps and Measurements	10
Banding	10
Determination of Sex and Age	11
Censusing	11
Determination of Territory Boundaries	12
Measures of Habitat Quality	13
Statistical Analyses	16
ANNUAL CYCLE IN THE COLORADO FRONT RANGE	16
POPULATION MOVEMENT	21
Seasonal Movement in Altitude	21
Postbreeding Movement of Adults	23
Dispersal of Juveniles	26
Movement in Winter	28
Movement Between Drainages	31
Homing by Adult Dippers	33
Discussion of Movement	33
POPULATION DENSITY AND DISPERSION	35
Seasonal Trends in Population Density	36
Environmental Factors Affecting Dispersion	38
Social Factors Affecting Dispersion	48
Discussion of Density and Dispersion	59
SURVIVAL AND PRODUCTIVITY	60
Survival and Mortality	60
Productivity and Recruitment	62
Effect of Stochastic Events on Survival and Productivity	70
Discussion of Survival and Productivity	73
GENERAL DISCUSSION AND CONCLUSIONS	73
Front Range Dipper Populations	74
Population Regulation	77
ACKNOWLEDGMENTS	80
LITERATURE CITED	80

TABLES

Table 1.	Comparison of habitat quality and population density of study areas	9
Table 2.	List of variable names	14
Table 3.	Contingency indices and elevations of studies of Dipper populations	18
Table 4.	Examples of winter movements	29
Table 5.	Number (%) of monthly censuses with random dispersion of Dippers	38
Table 6.	Multiple correlations of environmental variables with dispersion in each season . .	39
Table 7.	Relative importance of variables affecting dispersion on Boulder Creek in different seasons	40
Table 8.	Relative importance of variables affecting dispersion on South Boulder Creek in different seasons	42
Table 9.	Summary of relative importance of variables affecting dispersion on Boulder and South Boulder Creeks	47
Table 10.	Stepwise correlation of female territory size with six variables	51
Table 11.	Number of breeding attempts and evidence for population surplus	57
Table 12.	Estimated survival rates of adult and juvenile Dippers	61
Table 13.	Relative loss of Dippers from study areas, summer vs. winter	62
Table 14.	Productivity of the Boulder area Dipper population	63
Table 15.	Reported clutch sizes and fledging success for the Cinclidae	64
Table 16.	Stepwise correlation of eight variables with number of fledglings per brood (1971–1973)	65
Table 17.	Multiple and stepwise correlations of grouped variables with number of fledglings per brood (1971–1973)	67
Table 18.	Multiple and stepwise correlations of grouped variables with number of fledglings per brood for subsets of data	68
Table 19.	Summary of major factors affecting the Boulder area Dipper population	74

FIGURES

Figure 1.	General map of study area	5
Figure 2.	Map of South Boulder Creek study area	6
Figure 3.	Map of Boulder Creek study area	8
Figure 4.	Variation of environmental factors in Boulder, Colorado	17
Figure 5.	Timing and number of clutches being incubated, 1971–1973	19
Figure 6.	Number of banded birds arriving and departing study areas	21
Figure 7.	Mean number of Dippers moving more than 1.6 km on study areas	22
Figure 8.	Numbers of 1971 and 1972 breeding birds present on study areas after breeding . .	24
Figure 9.	Boulder Creek food samples	25
Figure 10.	South Boulder Creek food samples	26
Figure 11.	Home ranges and interactions of wintering Dippers	31
Figure 12.	Densities observed on Boulder Creek	36
Figure 13.	Densities observed on South Boulder Creek	37
Figure 14.	Breeding territories, 1971–1973, and 1973 breeding season food on South Boulder Creek	52
Figure 15.	Breeding territories, 1971–1973, and 1973 breeding season food on Boulder Creek	53
Figure 16.	Number of optimal and suboptimal nest sites occupied at differing population densities on Boulder Creek	54
Figure 17.	Relationship of winter densities to stream flow in spring	71
Figure 18.	Suggested relationships among major factors affecting size of winter Dipper population	75
Figure 19.	Suggested relationships among major factors affecting size of breeding Dipper population	76
Figure 20.	Suggested relationships among major factors affecting recruitment of Dippers	77
