

## CONTENTS

ABSTRACT .....	1
INTRODUCTION .....	2
<i>Aphelocoma</i> Jays .....	2
Overview .....	3
STUDY AREA AND METHODS .....	4
Location of Study Area .....	4
Climate .....	5
Vegetation .....	5
Methods .....	6
FOOD AND FORAGING .....	10
Seasonal Abundance of Food .....	11
Seasonal Foraging Behavior of Breeders and Floaters .....	11
TERRITORIES AND TERRITORIAL BEHAVIOR .....	17
Territorial Behavior .....	17
Territory Acquisition .....	22
Territory Characteristics .....	24
DISPERSAL AND FLOATING .....	30
Juvenile Dispersal .....	32
Floater Movements and Dispersion Patterns in the Nonbreeding Season .....	34
Floater Movements and Dispersion Patterns during the Breeding Season .....	37
Social Organization of Floaters .....	45
Dispersal Distances .....	47
REPRODUCTION .....	48
Breeding Chronology .....	49
Annual Production of Fledglings and Independent Young .....	50
Factors Influencing Reproductive Success .....	50
Ecological and Environmental Effects .....	54
Effects of Age and Experience .....	57

SURVIVORSHIP .....	58
Survivorship of Breeders .....	61
Annual Survivorship .....	61
Life Tables and Survivorship of Nonbreeders .....	65
The Life Tables .....	68
Estimating Lifetime Reproductive Success .....	68
TEST OF THEORIES AND COMPARISONS .....	72
Brown's Theory of Habitat Saturation and Group Living .....	72
The Marginal Habitat Hypothesis .....	78
The Florida Scrub-Jay Model .....	80
The Benefits of Philopatry Model .....	82
Delayed Dispersal Threshold Model .....	86
SYNOPSIS .....	89
Scrub-Jay Dispersal and Floating in Central Coastal California ...	90
ACKNOWLEDGMENTS .....	92
LITERATURE CITED .....	92

## TABLES

TABLE 1. Types and frequencies of aggressive behaviors directed at floaters by breeders. ....	21
TABLE 2. Age at which jays hatched on the study area first acquired territories. ....	25
TABLE 3. Study area size, territory size, breeder density, and area occupied. ....	25
TABLE 4. Vegetation attributes of occupied and unoccupied areas. .	29
TABLE 5. Characteristics of territories of different quality. ....	30
TABLE 6. Percentage of radio locations of three male juveniles. ...	32
TABLE 7. Radio location summaries. ....	43
TABLE 8. Home range of floaters during the breeding season. ....	43
TABLE 9. First egg date and the percentage of pairs reneating. ....	50
TABLE 10. Annual production of fledglings and independent young.	52
TABLE 11. Annual variation in reproductive variables. ....	52
TABLE 12. Age composition of pairs and failure to initiate breeding.	53
TABLE 13. Fate of eggs, fledglings, and nestlings. ....	54
TABLE 14. Annual predation and starvation rates on eggs, nestlings, and nests. ....	56
TABLE 15. Correlations of reproductive variables with acorns and insect abundance. ....	56
TABLE 16. Age composition of pairs and breeding success. ....	58
TABLE 17. Correlations of reproductive variables with age and years together as a pair. ....	59
TABLE 18. Effects of breeder age on reproduction. ....	59
TABLE 19. Effects of past breeding experience on reproduction. ...	61
TABLE 20. Annual survivorship of breeders. ....	62
TABLE 21. Age specific survivorship of known age breeders. ....	63
TABLE 22. Calculating the age jays first acquire territories. ....	67
TABLE 23. Female life table. ....	70
TABLE 24. Male life table. ....	70
TABLE 25. Age distribution of breeders. ....	71
TABLE 26. Estimated life time reproductive success under various scenarios. ....	71
TABLE 27. Demographic comparisons among <i>Alphelocoma</i> jays. ..	76
TABLE 28. Prediction of models for the evolution of group-living and cooperative breeding. ....	79
TABLE 29. Index of breeding space competition for <i>Aphelocoma</i> jays and cooperative breeders. ....	82

## FIGURES

FIGURE 1. Location of the Hastings Reservation .....	4
FIGURE 2. Study area showing local topography and vegetation communities .....	5
FIGURE 3. Forty-year mean rainfall and temperatures at the Hastings Reservation (1938–1978) .....	6
FIGURE 4. Relative abundance and seasonality of invertebrates at the Hastings Reservation .....	12
FIGURE 5. Relative abundance of acorns on the study area .....	13
FIGURE 6. Seasonal pattern of acorn fall .....	13
FIGURE 7. Seasonal change in foraging activities of territorial jays ..	14
FIGURE 8. Percentage of time territorial jays spent foraging in two good acorn years and in one poor acorn year .....	16
FIGURE 9. Percentage of foraging time territorial jays spent looking for, eating, caching, and recovering stored acorns .....	16
FIGURE 10. Percentage of foraging time territorial jays spent recovering and eating cached acorns .....	17
FIGURE 11. Seasonal change in foraging activities of nonbreeding floater scrub-jays .....	18
FIGURE 12. Rate of border interactions and vocalizations of territorial jays .....	19
FIGURE 13. Seasonal change in aggressive behaviors breeders directed at floaters .....	22
FIGURE 14. Age distribution of first-time breeders filling territory vacancies .....	24
FIGURE 15. Location of scrub-jay territories in 1981 .....	26
FIGURE 16. Location of scrub-jay territories in 1982 .....	26
FIGURE 17. Location of scrub-jay territories in 1983 .....	27
FIGURE 18. Location of scrub-jay territories in 1984 .....	27
FIGURE 19. Location of scrub-jay territories in 1985 .....	28
FIGURE 20. Relationship between mean territory size and mean breeder density .....	29
FIGURE 21. Schematic representation illustrating preferred, occupied scrub-jay habitat .....	30
FIGURE 22. Radio-tracked dispersal of male 570 from its natal territory .....	33
FIGURE 23. Radio-tracked dispersal of male 640 from its natal territory .....	34
FIGURE 24. Mean numbers and distribution of floaters on the study area during the nonbreeding season .....	35

FIGURE 25. Radio-locations and winter home range use by two radio-collared first-year female floaters . . . . .	37
