Cleveland Museum of  
**NATURAL HISTORY** 

Thanks to the Cleveland Museum of  
Natural History for their support of *The  
Ohio Cardinal*.

*The Ohio Cardinal* is a quarterly publication devoted to the study and appreciation  
of Ohio's birdlife.

**On the cover:**

Unknown in Ohio a decade ago, *Cave Swallows* are now expected annually in late fall. A group of seven  
(five photographed here; the fifth bird is barely visible inside the left edge of the opening in the pier) was  
discovered on 09 November 2008 at Bradstreet Landing, **Cuyahoga**, by Larry Richardson. Andrew W.  
Jones photographed the birds later that day.
