

THE

OHIO CARDINAL

DEVOTED TO THE STUDY AND APPRECIATION OF OHIO'S BIRDLIFE • VOL. 34, NO. 1 FALL 2010

*A prized find for birders each fall, elusive Northern Saw-whet Owls are infrequently found outside dense cover during their movement southward, giving rare photographic opportunities like this striking individual captured by Ben Warner at Headlands Dunes SNP, **Lake**, on 10 Oct 2010.*

On the cover:

*Difficult to find and see, let alone photograph, this LeConte's Sparrow was beautifully captured by Laura Keene along the Wake Robin Trail at Mentor Marsh SNP, **Lake**, on 09 Oct 2010.*
