

SPECIES ACCOUNTS

By Craig Caldwell

Black-bellied Whistling-Duck

The OBRC has some internet reports from *Trumbull*.

Canada Goose

The high count was 830; Andrew Mashburn found them at Conneaut on 01 Jun. The largest concentration away from Lake Erie was the 300 which Doug Overacker saw in Buck Creek on 24 Jul. Seventy-nine counties produced reports.

Mute Swan

Two locations shared the high count of five, Firestone-Yeagley WA, *Columbiana*, on 07 Jul (Catherine Horrocks) and Big Island on 17 Jul (Steve Jones). Seventeen counties had sightings.

Trumpeter Swan

Ed Pierce's ONWR census team counted 29 on 06 Jul (*vide* Douglas Vogus), and others reported smaller double-digit numbers there throughout the season. The most elsewhere were at Big Island, where Irina Shulgina found 14 on 31 Jul. Reports came from 13 counties.

Wood Duck

Gary Cowell's 75 at Big Island on 25 Jul was the high count. Sixty-three counties provided sightings.

Gadwall

The four reports are:

One male at Sandy Ridge on 01 Jun (Patricia McKelvey)

Three females at Pickerel Creek on 04 Jun (Victor Fazio III)

One male at Fernald from 17 Jun to 23 Jul (m. obs.)

An apparent pair at Mosquito Lake SP on 04 Jul (David Hochadel)

Eurasian Wigeon

Paula and Tom Bartlett discovered a lone male by Riddle Road, *Sandusky*, on 01 Jun. It apparently moved to Pickerel Creek, where one was reported on several dates from 04 to 18 Jun (m. obs.). According to Victor Fazio III it is Ohio's first summer record.

American Wigeon

Victor Fazio III saw the last of the northbound birds along County Road 34, *Seneca*, on 19 Jun. Jen Brumfield found one which had likely just arrived from Canada at Pipe Creek on 18 Jul. Two at Lorain on 02 Jul (Victor Fazio III) could have been traveling either direction or hanging

around for the summer, though there were no other sightings there in the interval between the aforementioned reports. The high count was eight on 04 Jun at Pipe Creek, again by Victor Fazio III. Sightings also came from *Butler*, *Ottawa*, *Sandusky*, and *Wayne*.

American Black Duck

Sightings were scarce until 10 Jul and fairly regular thereafter. The high count was 18, at East Harbor on 25 Jul (Andrew Cannizzaro), and others reported up to 16 there on other dates. No other location had more than four. Nine other counties also contributed sightings.

Mallard

Victor Fazio III counted 247 at East Harbor on 30 Jun. More triple-digit counts came from other *Ottawa* sites, *Lake Lorain*, *Sandusky*, and *Seneca*. The largest inland count was Su Snyder's 186 along Wilderness Road on 06 Jun, and the highest number in the southern half of the state was by Christopher Collins – 82 at the Great Miami WMB on 08 Jun. Sixty-seven counties produced reports.

[American Black Duck x Mallard]

Single hybrids were winkled out at Riddle Road, *Sandusky*, on 13 Jun (Victor Fazio III), Coe Lake, *Cuyahoga*, on 06 Jul (Stephanie Willem), and Cleveland harbor on 21 Jul (Donna K. Owen).

Blue-winged Teal

Fernald hosted eight on 20 Jul for Tracy Cambron. Twenty-two counties had sightings.

Following a record number of spring sightings, a summer visit by this Eurasian Wigeon was documented on 04 Jun by Victor Fazio III at Pickerel Creek.

Northern Shoveler

Sightings were scattered in space and time: One or two at Darby Creek for most of Jun (m.

obs.) and one there on 28 Jul (Ronnie Clark)
 One at Armler Park on 02 and 05 Jun (m. obs.)
 Apparently mated pairs at three *Sandusky*
 locations on 06 Jun, 14 Jul, and 27 Jul (Paul
 Sherwood)
 One at Lorain on 05 Jul (Elizabeth McQuaid)
 and 07 Jul (Sandra Griffiths)
 Three at Slate Run MP, *Pickaway*, on 06 Jul
 (Gene Stauffer)

Green-winged Teal

Ben Warner and Anna Wittmer saw 16 at Pipe
 Creek on 29 Jul. The second-highest number
 was nine, at Willow Point on 21 Jun (Jen Brum-
 field). Thirteen counties produced sightings.

Canvasback

Rob and Sandy Harlan saw a straggler at Lor-
 rain on 01 Jun, and it or another flew past Rita
 Schneider there on 07 Jun.

Redhead

The reports are:

Up to four seen at Lorain throughout the season
 (m. obs.)
 One at Lake Alma SP, *Vinton*, on 01, 02, and 04
 Jun (Alex Eberts)
 One at Sheldon's Marsh on 06 Jun (Amy Didion)
 and 26 Jun (Donel Jensen)
 Two at Magee on 22 Jun (James Cunningham)
 One along County Road 34, *Seneca*, on 02 Jul
 (Victor Fazio III)
 One, apparently injured, in South Russell,
Geauga, on 05 Jul (Stanley Plante)
 One at East Harbor on 24 Jul (Don Keffer)

Ring-necked Duck

Gary Cowell noted the last northbound bird in
 Lexington Community Park, *Richland*, on 06
 Jun. Lorain hosted the first southbound arrivals,
 two on 05 Jul (Elizabeth McQuaid), and occa-
 sional sightings through the end of the season.
 Lorain also provided the high count of four, on
 01 Jun (m. obs.). The other sightings were of sin-
 gles along the Clinton towpath, *Summit*, on 02
 and 03 Jun (Marsha Gilger) and at Deer Creek
 SP, *Pickaway*, on 17 Jul (Melanie Shuter).

Greater Scaup

Many birders saw one lingering at Lorain on 01
 and 02 Jun. Matthew Sabatine found another at
 Pymatuning SP, *Ashtabula*, on 11 Jun. Nancy
 Anderson reported a seriously delayed bird at
 Euclid Creek Reservation, *Cuyahoga*, on 21
 and 29 Jun.

Lesser Scaup

Elizabeth McQuaid and Donna K. Owen saw
 two on the lower Cuyahoga River in Cleveland
 on 05 Jun. One or two spent from May to 15

Jul at Lorain (m. obs.). Doug Overacker's single
 at Buck Creek on 22 Jul was the latest sighting.
 Other reports of singles came from *Clinton*,
 a second *Lorain* site, East Harbor, and *Pickaway*.

Aythya sp. Duck

Regarding the five preceding species at Lorain,
 Rob Harlan wrote, "I cannot imagine that five
 species of *Aythya* ducks have ever been at the
 same location in Ohio in June before!"

Hooded Merganser

Donna Kuhn found 24 at Fernald on 14 Jun, and
 others reported nearly that many there on oth-
 er dates. The most elsewhere were 13, mostly
 immatures, which Paul Hurtado counted at the
 Hoover Reservoir dam on 06 Jul. Reports came
 from 28 counties.

Common Merganser

A six mile float along Cross Creek, *Jefferson*,
 produced six, including a family, for Scott Pend-
 leton. A hen with six young thrilled observers
 at Conneaut from mid-Jun through the end of
 the season and occasionally a solo male also
 appeared there. Single birds at CVNP on 09
 Jun (Rita Schneider) and along the Cleveland
 breakwall on 28 Jun (m. obs.) were just passing
 through.

Red-breasted Merganser

Tim Krynak's three at the Wellington Upground
 Reservoir, *Lorain*, on 07 Jun was the high count.
Ashtabula, *Cuyahoga*, *Erie*, *Franklin*, *Geau-
 ga*, and *Ottawa* also provided reports whose
 dates spanned the season.

Ruddy Duck

A few were seen here all season, scattered in 14
 counties. Lorain had the high count of eight, on
 20 Jul (m. obs.).

Northern Bobwhite

Kim Warner saw a few at a private property in
Lucas beginning on 06 Jun, and her sightings
 peaked with a female and 14 young on each of
 25 and 26 Jul. The most elsewhere were 10 at
 Springfield Bog, *Summit*, on 03 Jun. Rob Har-
 lan noted that they were recently released and
 added that they "might have a chance if the win-
 ter is mild". Eleven other counties also produced
 sightings.

Ring-necked Pheasant

B.J. Homan heard at least five calling at Darby
 Creek on 28 Jun. Smaller numbers were report-
 ed there and in 18 other counties.

Ruffed Grouse

The reports are:

One along Pipe Creek Road, *Belmont*, on 11
 Jun (Sandie Myers)

The Ohio Cardinal, Summer 2014

One in Woodbury WA, **Coshocton**, on 16 Jun (Laura Dornan)

One on 17 Jun and another on 20 Jun at different **Harrison** locations (Sean Fitzgerald); the second was “drumming at 2pm in 90 degree heat”.

One at Shawnee on 20 Jun (Kent Miller)

One at The Wilds on 18 Jul (Sandie Myers)

Wild Turkey

Three hens and 24 youngsters pleased Jeanne Hrenko at Chagrin River Park, **Lake**, on 03 Jul. Don Keffer found five adults and 14 young in Mosquito WA on 29 Jul. Forty-six counties produced reports.

Red-throated Loon

One hung around off Kelleys Island between 04 and 10 Jun (*fide* Tom Bartlett).

Common Loon

Gary Cowell saw two at Willard Reservoir, **Huron**, on 30 Jul. The only other sighting that month was also Gary’s, one at Bressler Reservoir, **Allen**, on 25 Jul. **Erie**, **Fulton**, **Hancock**, **Jefferson**, and **Stark** had solo birds in Jun.

Pied-billed Grebe

Big Island contributed many reports in the 15 to 35 range, which Charles Bombaci topped with 66 birds on 11 Jul. The most elsewhere were 12 at Pipe Creek on 21 Jun (Jen Brumfield) and 15 at ONWR on 01 Jun (Ed Pierce *et al.*, *fide* Douglas Vogus). Twenty counties had sightings.

Horned Grebe

Tim Krynak saw one at the Wellington Upground Reservoir, **Lorain**, of both 07 and 09 Jun. Lynne and Nik Shayko found another at Lorain on 03 Jul.

Western Grebe

One internet report, without details, came from **Lake**.

Double-crested Cormorant

The Jones Preserve shore hosted 275 on 02 Jun (Tom Bartlett). The inland high count was 200, in Campbell Memorial Park, **Franklin**, on 20 Jun (James Muller).

American White Pelican

Peggy Blair counted 36 over the Magee Migratory Bird Center on 05 Jun. Perhaps they hung around; up to 34 were seen at East Harbor and other **Ottawa** and **Lucas** sites from 16 Jun through the end of the season.

American Bittern

The reports are:

One heard or seen at Darby Creek on many dates from 01 Jun until 19 Jul (m. obs.)

One heard at Big Island on 05 Jun (Ron Sempier)

One in the Honda Wetlands, **Franklin**, on 19 Jun (Irina Shulgina)

Two flyovers at the **Hancock** Sanitary Landfill on 04 Jul (Shane Myers and Robert Sams)

One at Penitentiary Glen Reservation, **Lake**, on 17 Jul (Cole DiFabio)

One at Younger’s Wetlands/Bright Farm, **Hancock**, on 27 Jul (Jeff Loughman and Robert Sams)

One flyover at ONWR on 31 Jul (*fide* Becky Cullen)

Least Bittern

The high count was four which were flying about the Mallard Club WA, **Lucas**, on 29 Jul (*fide* Becky Cullen). Counts of two were shared. Many birders reported them at Darby Creek between 10 and 21 Jul; Dave Chase found his along the Wake Robin Trail, **Lake**, on 15 Jul. Reports also came from **Butler**, **Cuyahoga**, **Geauga**, **Hamilton**, **Marion**, **Ottawa**, **Pickaway**, **Richland**, **Seneca**, **Union**, and **Wayne**.

Great Blue Heron

Ron Sempier estimated 125 at Big Island on both 03 and 29 Jul. The 06 Jul ONWR census team counted 91, the second-highest number (Ed Pierce *et al.*, *fide* Douglas Vogus). **Crawford**, **Gallia**, **Jackson**, **Monroe**, **Noble**, **Pike**, **Putnam**, and **Ross** did not have sightings.

Great Egret

The two highest counts came from ONWR, 169 during the 06 Jul census (Ed Pierce *et al.*, *fide* Douglas Vogus) and 210 on 11 Jul (Nicholas Sly). Andrew Cannizzaro found 25 at Gilmore Ponds on 03 Jul, the most away from Lake Erie. Thirty-nine counties contributed sightings.

Victor Fazio III viewed 15 American White Pelicans on 20 Jun at Meadowbrook Marsh, **Ottawa**, and managed to include over half of them in this image.

Snowy Egret

ONWR produced counts of up to 30; that number came during the 06 Jul census (Ed Pierce *et al.*,

vide Douglas Vogus). The most elsewhere were four at Magee's Migratory Bird Center on 05 Jun (Peggy Blair) and along the Magee causeway on 26 Jun (Helen and Ken Ostermiller). One or two were at sites in **Erie** as well. Singles at Conneaut on 08 Jun (m. obs.) and Cowan Lake, **Clinton**, on 12 Jun (Allan Claybon) were the only other sightings away from the northwestern marshes.

Little Blue Heron

Loren Hintz found an adult at Pickerington Ponds on 22 Jul.

Cattle Egret

Six locations provided sightings, listed here chronologically:

One along County Road 142, **Logan**, on 09 Jun (Margaret Bowman and Blake Mathys)

One along the Magee causeway between 18 and 22 Jun (m. obs.)

One or two in or near the Sulfur Brook (Pipe Creek) estuary, **Erie**, from 15 to 31 Jul (m. obs.)

Two along the Cedar Point Chausee, **Erie**, on 27 Jul (Chris Zacharias)

Four by Bardshar Road, **Erie**, also on 27 Jul (Jeff Harvey)

One along the walking pool trail at ONWR on 31 Jul (Tom Bartlett)

Green Heron

Andrew Cannizzaro counted 12 at Gilmore Ponds on 03 Jul; 10 were still there two days later. J. W. Rettig also found 10, at Fernald on 12 Jul. Reports came from 67 counties.

Black-crowned Night-Heron

Tom Bartlett found 11 in the **Ottawa** section of ONWR on 31 Jul while setting up for a shorebird banding session. The high count away from the northwest marshes was three; several observers saw them on the Great Miami River at Deeds Point, **Montgomery**, on 11 and 17 Jul. **Butler**, **Cuyahoga**, **Erie**, **Franklin**, **Hamilton**, **Lorain**, **Lucas**, and **Portage** also contributed sightings.

Yellow-crowned Night-Heron

The tiny colony on Preston Road in Columbus apparently has winked out; the last sighting even near it was in late May. This season's sole report came from the Mohican SP covered bridge area, where Bob and Sara Crist saw an immature bird on 29 and 31 Jul.

Plegadis Ibis sp.

The one internet report might have enough details for OBRC evaluation.

Black Vulture

Hallie Mason gave us the high count, 61 at a

canoe livery near Mohican SP on 12 Jul. Stefan Mozu Gleissbird found about 45 at a carcass by the Hocking River in **Athens** on 29 Jul. Jon Cefus contributed the northernmost sighting, a single bird soaring over Sippo Lake, **Stark**, on 26 Jul. Reports came from 33 counties.

Turkey Vulture

Terri Martincic saw about 80 in Hinckley Reservation, **Medina**, on 26 Jul. Only **Monroe**, **Noble**, **Pike**, **Putnam**, and **Shelby** did not produce sightings.

Osprey

Two nests along the northeast shore of Hoover Reservoir each held a chick, and seven adults were in the vicinity as well, on 29 Jun (Charles Bombaci). The *Plain Dealer* of 07 Jun printed a report from Eddy Pausch, Assistant Refuge Manager, that a nest in ONWR Blausey hatched two birds. Forty-one counties provided reports.

Mississippi Kite

The OBRC has an internet report with photos from **Clermont**; others from **Cuyahoga**, **Hamilton**, and **Summit** have no details.

Bald Eagle

Conneaut continues to host the big concentrations; Bob Lane counted 43 there on 01 Jul. The most elsewhere were eight, seen by Deb Tefft in CPNWR on 05 Jul and by Donna Kuhn and Lisa Phelps along Wilderness Road on 19 Jul. Fifty-three counties had sightings.

Kings of the Conneaut sandspit, these Bald Eagles were photographed on 26 Jun by Bob Lane.

Northern Harrier

Reports were scattered throughout the season. Tom Bartlett saw two birds cross Springville Marsh on 22 Jun, traveling separately northeast to southwest. Solo birds were seen in **Cuyahoga**, **Franklin**, **Harrison**, **Lake**, **Lucas**, **Montgomery**, **Ottawa**, **Paulding**, **Stark**, **Summit**, **Trumbull**, **Vinton**, **Wayne**, and **Wood**.

Sharp-shinned Hawk

The only multiple sighting was Ryan Gniewiecki's duo near his **Mahoning** home on 11 Jul. Twenty-three counties produced singles.

Cooper's Hawk

Four locations each produced four birds; two of the quartets were nests with young. Reports came from 54 counties.

Red-shouldered Hawk

Gabriel Amrhein found six in the United Plant Savers Sanctuary, *Meigs*, on 22 Jun. Fifty counties provided reports.

Broad-winged Hawk

The high count was three; Ken Andrews saw them while walking two miles of trails in the Bedford Reservation, *Cuyahoga*, on 04 Jul. Many observers found two in the 35 contributing counties.

This Broad-winged Hawk allowed photographer Ron Sempier a close approach on 21 Jul at Alum Creek Reservoir, Delaware.

Red-tailed Hawk

Mary Warren was able to bird the restricted NASA Plum Brook Station, *Erie*, on 11 Jul, and found seven there. Three other locations each produced six for other observers. All but a dozen counties provided reports.

Black Rail

A pair spent at least from 08 to 14 Jun at a Fresno, *Coshocton*, farm and produced a family there. Jacob Roalef and Su Snyder provided excellent documentation for the OBRC.

The Henry Troyer Jr. family welcomed birders to their farm in Coshocton for an elusive Black Rail, documented by Jacob Roalef on 10 Jun.

King Rail

Jon Cefus, Sandra Griffiths, and Su Snyder heard and then saw an apparent pair at Killbuck on 02 Jun.

Photographer Su Snyder snapped a gratifying image of this King Rail on 02 Jun at Killbuck.

Virginia Rail

The Honda Wetlands, *Franklin*, showcased an adult and five chicks on 23 Jun (Alex Eberts, Irina Shulgina). Seventeen counties produced sightings.

Sora

This high count was also six, consisting of four adults and two young in the Great Miami WMB on 08 Jun (m. obs.). Reports came from 14 counties.

Purple Gallinule

Ron Sempier documented the continued presence of the Big Island visitor on 03 Jun. (See the spring *Ohio Cardinal*).

Common Gallinule

Charles Bombaci noted several families totaling 35 birds at Big Island on 11 Jul. The most elsewhere were nine which Deb Tefft saw at ONWR Blausey on 27 Jul. Other *Ottawa* sites and *Erie, Franklin, Geauga, Lorain, Lucas, Pickaway, Union, Wayne*, and *Wyandot* also provided sightings.

American Coot

Charles Bombaci again saw families on 11 Jul at Big Island; he counted 60 birds. Elizabeth McQuaid's 35 at Lorain on 27 Jul was the second-highest number. Reports also came from *Auglaize, Cuyahoga, Delaware, Franklin, Hamilton, Hancock, Lucas, Ottawa, Pickaway*, and *Summit*.

Sandhill Crane

Matt Hogan and Donna Kuhn separately reported 27 along Wilderness Road on 26 Jun; others saw smaller double-digit numbers there and at other parts of Funk. Carlton Graff's six in the *Ottawa* section of Magee on 13 Jun was the most elsewhere. Colts, some very young, were reported in *Geauga, Muskingum, Ottawa*,

Pickaway, and **Wayne**. Seventeen counties in all produced sightings.

American Avocet

Amy Didion saw the season's first, at Willow Point on 01 Jul. Three or four were at Conneaut on several dates and 14 were there on 13 Jul (m. obs.). The highest count elsewhere, shared by three sites, was three. Chuck Slusarczyk, Jr, saw that many at Euclid Beach, **Cuyahoga**, on 07 Jul; Mike Smith did so at East Harbor on 15 Jul; and several birders found them below the Hoover Reservoir dam on 26 Jul. **Delaware**, **Geauga**, **Lorain**, **Lucas**, **Sandusky**, **Tuscarawas**, and **Wyandot** also contributed reports.

This American Avocet warily eyed a Bald Eagle flying overhead on 02 Jul at Conneaut and Bob Lane captured this image.

Black-bellied Plover

The reports are:

Two in the **Lucas** section of ONWR on 01 Jun (Ed Pierce *et al.*, *vide* Douglas Vogus)

Four at Funk on 02 Jun (Sandra Griffiths and Su Snyder)

Three which circled but didn't land at Conneaut on 30 Jul (Bob and Denise Lane)

American Golden-Plover

David Gesiki and Mark Rozmarynowycz found the only one of the season in a restricted part of CPNWR on 30 Jul.

Sempalmated Plover

The last of the "spring" migrants were three at Conneaut (Chris Swan) and one in the CCE (Kim Warner) on 08 Jun. Cory Chiappone and Cole DiFabio saw the first southbound arrival, at Headlands on 14 Jul. Gilmore Ponds hosted about 55 on 04 Jun (Andrew Cannizzaro) and the second-highest count of 20 was shared by Conneaut on 23 Jul (Roger Redmond) and Killdeer on 26 Jul (Tyler McClain). Twenty-one counties had sightings.

Piping Plover

Internet reports and the accompanying photo from **Ashtabula** may in sum be thorough enough for OBRC evaluation. Another internet report, from **Lake**, probably is not.

A visit by this multi-banded Piping Plover was successfully documented by Bob Lane at Conneaut on 23 Jul.

Killdeer

Several counts were in the 100s, with the highest being Melanie Shuter's 245 at Deer Creek WA, **Pickaway**, on 10 Jul. Reports came from 77 counties.

Spotted Sandpiper

Shane Myers and Robert Sams found 31 at the Findlay Reservoirs on 13 Jul. Fifty-five counties produced sightings.

Solitary Sandpiper

The last northbound bird paused for Chris Swan at Conneaut on 08 Jun; only one earlier Jun sighting preceded it. Victor Fazio III saw the first southbound one at Lorain on 02 Jul. Don Keffer noted 18 at Grand River WA, **Trumbull**, on 25 Jul. Thirty-eight counties provided reports.

Greater Yellowlegs

Paul Sherwood saw three by County Road 219, **Sandusky**, on 06 Jun, the last of the surely northbound migrants. The one which Chris Swan saw at Conneaut on 22 Jun was either a straggler heading north or a southbound pioneer. Ten at Willow Point (Elizabeth McQuaid) and one at Funk (Su Snyder) on 04 Jul were surely newly arrived from Canada. East Harbor hosted 30 on 23 Jul for Carlton Schooley. Steve Jones saw the most away from Lake Erie, six at Killdeer on 24 Jul. Twenty-one counties provided sightings.

Willet

One over Cleveland Hopkins Airport on 04 Jun was the last heading north (Edward Kamposek) and one at Conneaut on 24 Jun was probably headed the other way (Chris Swan). Cory Chiappone and

Cole DiFabio found 12 at Headlands on 30 Jun and Conneaut hosted five on several Jul dates. **Erie**, **Lake**, **Lorain**, and **Ottawa** also produced sightings.

Lesser Yellowlegs

One was with its Greater cousins by County Road 219, **Sandusky**, on 06 Jun (Paul Sherwood). On 02 Jul Chris Swan again saw two of the earliest southbound birds at Conneaut and birders saw between 14 and 21 at Willow Point the same day. East Harbor hosted about 300 on 21 and 22 Jul (m. obs.); at least 120 remained by 24 Jul (Don Keffer). The high count elsewhere was 49 by Victor Fazio III along Riddle Road, **Sandusky**, on 22 Jul. Thirty counties produced reports.

Yellowlegs sp.

The latest spring and earliest fall dates listed above notwithstanding, one indeterminate bird at Darby Creek on 06 Jun (Carl Winstead) and two at Willow Point on 01 Jul (Amy Didion) might hold those honors.

Upland Sandpiper

Three locations in **Harrison** provided sightings: Four near the county airport on 07 Jun (Eli M. Miller)

Five at the Second Reclaim District on 10 Jun (Scott Pendleton)

Up to five at The Bowl on several dates between 04 and 26 Jul (Gary Bush, Sandie Myers, Scott Pendleton)

Whimbrel

The reports are all from Conneaut, two on 20 Jul (the Lanes), two on 28 Jul (Jacob Roalef) and one on 29 Jul (Chris Swan).

Marbled Godwit

Conneaut also produced the only godwit sightings; Nancy Anderson, Bob Krajieski, and Jacob Roalef each reported two there on 12 Jul.

Ruddy Turnstone

The only Jun sightings were on 01 Jun, singles by Bob Lane on the Magee beach and in ONWR by Ed Pierce's census takers (*vide* Douglas Vogus). The next report didn't arrive until 19 Jul, when Steve Jones found the only far-inland bird at Alum Creek SP, **Delaware**. The high count was three, shared by Jacob Roalef at Conneaut on 28 Jul and Bev Walborn at East Harbor on 29 Jul. Camp Perry (**Ottawa**) and **Wood** each also contributed one sighting.

Red Knot

Becky and Jeffrey Cullen found two at the Camp Perry beach, **Ottawa**, on 25 Jul.

Stilt Sandpiper

The first sightings came on 03 Jul. Bob Krajieski and the Lanes saw one at Conneaut; Doreene Linzell and Dan Sanders found another at Willow Point. East Harbor produced various numbers in Jul with the highest being 11 on 29 July (Ben Warner and Anna Wittmer). Tyler McClain's five at Killdeer on 26 Jul were the most elsewhere. **Hamilton**, **Hancock**, **Lorain**, and **Wayne** also had sightings.

Conneaut featured a fine variety of shorebirds for Bob Lane on 03 Jul, including this well-posed Stilt Sandpiper.

Sanderling

Wendy Becker saw the last two of these wave-chasers heading north, at Darby Creek on 01 Jun. Six weeks later, a 15 Jul BRAS field trip noted three pausing on their way south at Sandy Ridge. Mark Moore found 13 at Conneaut on 23 Jul. Becky and Jeffrey Cullen's six at Camp Perry, **Ottawa**, on 25 Jul was the second-highest count. Additional reports came from **Clermont**, **Clark**, **Delaware**, and **Lake**.

Dunlin

The reports are:

Two in the **Lucas** section of ONWR on 01 Jun (Ed Pierce *et al.*, *vide* Douglas Vogus)

One at Maumee Bay, also on 01 Jun (Victor Fazio III)

One (Craig Holt) and two (Chris Swan) at Conneaut on 03 Jun

Six in the CCE on 08 Jun (Kim Warner)

Baird's Sandpiper

Ben Warner and Anna Wittmer saw the first, at East Harbor on 22 Jul. Becky Cullen saw two at Maumee Bay on 29 Jul. Singles also showed up in **Ashtabula**, **Franklin**, **Hancock**, and **Seneca**.

Least Sandpiper

Chris Swan saw one at Conneaut on 03 Jun

before it headed out over Lake Erie. Two in a flooded field in *Franklin* on 15 Jun could have been going either way (Ronnie Clark). The solos at Willow Point (Jen Brumfield) and Conneaut (Bob Krajieski) on 21 Jun had probably just arrived from the north. They were pioneers, as the next sightings didn't happen until 03 Jul. That's when Bob Krajieski counted 20 at Conneaut and Rick Asamoto another by the Great Miami River in *Montgomery*. Fields along County Road 34, *Seneca*, held 145 when Victor Fazio III counted them on 22 Jul. Reports came from 41 counties.

White-rumped Sandpiper

These six were reported:

Two at Armleder Park on 02 Jun (Kirk Westendorf)

One at Gilmore Ponds on 04 Jun (Andrew Cannizzaro)

One along Wilderness Road on 12 Jul (the Ostermillers)

Two at the *Lucas* wastewater treatment plant on 22 Jul (Deb Tefft)

Pectoral Sandpiper

Steve Jones saw the earliest arrivals, six at Willow Point on 05 Jul. Carl Winstead made the high count of 18 at Deer Creek WA, *Pickaway*, on 29 Jul. Twenty-four counties contributed sightings.

Semipalmated Sandpiper

Most if not all of the 22 which Chris Swan found at Conneaut on 08 Jun soon headed north, but he also saw a straggler or independent traveler there between 14 and 18 Jun. One at Pipe Creek (Donna Kuhn) and 12 at Willow Point (Elizabeth McQuaid) on 04 Jul were southbound. Victor Fazio III counted 104 at East Harbor on 21 Jul; 75 were still there the next day (Ben Warner and Anna Wittmer). The most elsewhere were Jen Brumfield's 40 at Burke Lakefront Airport, *Cuyahoga*, on 26 Jul. Thirty-one counties provided sightings.

Western Sandpiper

David Hochadel and Don Keffer independently noted one consorting with Semipalmated Sandpipers at Mosquito Lake SP on 05 Jun.

Short-billed Dowitcher

Three parties noted the first on 02 Jul. The Lanes and Chris Swan saw one at Conneaut, Chris Pierce and Victor Fazio III found another at Lorain, and several birders saw two at Willow Point. East Harbor contributed the high count of 75 on 22 Jul (Ben Warner and Anna Wittmer). The highest number away from the northwest marshes was 49 at Sandy Ridge on 23 Jul (Patricia McKelvey). Reports came from 20 counties.

Long-billed Dowitcher

The first appeared on 19 Jul at East Harbor

(Kim Warner) and Killdeer (Cody M. Kent). At least one was seen daily thereafter at East Harbor, with Jeff Harvey's eight on 27 Jul the high number. These were the only two locations with reliable reports; Long-billeds are very scarce in summer.

Dowitcher sp.

Amy Didion's two at Willow Point on 01 Jul were almost surely Short-billed and beat the first-sighting date above. The 15 which Elizabeth McQuaid saw at East Harbor on 27 Jul no doubt included Jeff Harvey's eight Long-billed and may have eclipsed that number.

Wilson's Snipe

Sightings were scattered throughout the season. The high count was six. Joshua Eastlake saw that many at Lake Waynoka, *Brown*, on 01 Jun, and Scott Huges matched him at Grand River WA, *Trumbull*, on 20 Jul. *Geauga*, *Lake*, *Marion*, *Summit*, and *Wyandot* also provided reports.

American Woodcock

Triples were the high counts. They were by Kirk Westendorf at Armleder Park on 06 Jun, James Muller at Glacier Ridge MP, *Union*, on 18 Jun, and Brian Wulker in the Miami Whitewater CP wetlands, *Hamilton*, on 01 Jul. Twenty-one counties had sightings.

Wilson's Phalarope

Seven were reported:

Four at East Harbor on 23 Jul (R. Lee Reed)

One at Lorain on 27 Jul (John Pogacnik)

Two at Darby Creek on 28 Jul (Ronnie Clark)

Red-necked Phalarope

East Harbor provided sightings of up to three between 22 and 24 Jul (m. obs.)

Bonaparte's Gull

Andrew Cannizzaro estimated more than 450 at East Harbor on 26 Jul. The inland high count was 138 at the Findlay Reservoirs on 29 Jul (*vide* Robert Sams). Nineteen counties, mostly northern but including *Clark* and *Clermont*, contributed reports.

Little Gull

Andrew Cannizzaro was able to photograph one of these rare summer visitors at East Harbor on 26 Jul. Unfortunately, though the photo clinched the identification, it won't reproduce well for inclusion here.

Laughing Gull

Reports of single birds came throughout the season. Sites in *Ashtabula*, *Erie*, *Logan*, *Lorain* (2), *Lucas* (2), *Richland*, and *Warren* hosted them.

Franklin's Gull

The Lanes saw one at Headlands on 15 Jun.

Ring-billed Gull

Victor Fazio III estimated 5400 at Headlands on 23 Jul. The second-highest count was 915 off Kelleys Island on 21 Jul, also by Victor. The largest inland concentration was of about 300 at Alum Creek SP, *Delaware*, on 19 Jul (Robert Batterson, Steve Jones). Reports came from 39 counties.

Herring Gull

Lorain held about 1400 on 02 Jul, and second-best Headlands had about 260 on 09 Jul (both Victor Fazio III). The most inland were 25 in Woodlawn Cemetery, *Lucas*, on 27 Jun (m. obs.) and 20 at Alum Creek SP, *Delaware*, on 18 Jul (Robert Batterson). Twenty-eight counties provided sightings.

Lesser Black-backed Gull

Cole DiFabio forwarded a report of one at Headlands on 07 Jul. Victor Fazio III saw another on a piling at the Marblehead Ferry pier, *Ottawa*, on 21 Jul.

Great Black-backed Gull

John Whittaker saw one at Veterans Memorial Park, *Lorain*, on 15 Jun, and reports of one or two in *Ashtabula*, *Cuyahoga*, *Lake*, and *Lorain* continued for the rest of the season. The only count exceeding two was Nancy Anderson's 11 at Headlands on 09 Jul.

Caspian Tern

Jeff Harvey saw 50 at East Harbor on 27 Jul. Edward Ingold counted 31 at Lake Mosier, *Hancock*, on 29 Jul for the inland high number. Twenty-three counties produced reports.

Black Tern

Frank Frick and Jay Lehman found three and four, respectively, at Fernald on 08 Jun. East Harbor held one or two between 23 and 25 Jul (m. obs.) Singles were found at two other *Ottawa* locations and in *Erie*, *Logan*, *Lucas*, and *Wayne*.

Common Tern

Victor Fazio III saw more than 1000 at East Harbor on 21 Jul; other observers found only about 200 there on other nearby days. The most elsewhere were 90 at Willow Point on 02 Jul (Paul Sherwood and Victor Fazio III). The highest inland count was six at Hoover NP on 25 Jul (Robert Batterson, Steve Landes). Fourteen counties, of which *Delaware*, *Logan*, and *Harrison* are the southernmost, had sightings.

Forster's Tern

Reports were steady through the first week of Jun and then numbered near zero until restarting on 30 Jun and continuing through the rest of the season. The only report during that gap was by Loren Hintz, who found three at Willow Point on

18 Jun. East Harbor provided yet another high count, 290 on 21 Jul (Victor Fazio III). Jessica McQuigg's 115 along the CCE Trail on 27 Jul were the most elsewhere, while Brian Menker's 26 at Buck Creek on 01 Jun was the inland high. Eleven counties produced reports; of them *Clark*, *Clermont*, and *Hamilton* are south of mid-state.

Rock Pigeon

Shane Myers and Robert Sams counted 190 at the *Hancock* sanitary landfill on 04 Jul, the highest of several triple-digit reports. All but a dozen counties provided sightings.

Eurasian Collared-Dove

Several observers provided formal reports for the OBRC – We thank them! Those by Paul Gardner of a sighting in *Clark*, by Donna Kuhn in *Wayne*, and by Troy Shively in *Mercer* were accepted and were more fully described in the previous issue of the *Cardinal*. Some of the internet reports from those counties and from *Ashland* have enough detail for evaluation but others from *Licking*, *Paulding*, and *Pike* do not.

Mourning Dove

Brian Wulker noted 175 at Fernald on 12 Jul and 110 there ten days later; these were the two highest counts. Next highest was 83 by Heather Luedecke and Angelika Nelson along their New Dover BBS route in *Union* on 28 Jun. Every county but *Guernsey*, *Monroe*, and *Noble* had at least one sighting.

Yellow-billed Cuckoo

Two and a half miles of Brough Road, *Harrison*, yielded nine for Sean Fitzgerald on 19 Jun. There were two counts of six: Scott Pendleton floated about three miles of Cross Creek, *Jefferson*, on 01 Jun, and Steve Jones found his while kayaking eight miles of the Scioto River in *Marion* on 15 Jun. Reports came from 68 counties.

Black-billed Cuckoo

Observers found three in OOPMP on 12 Jun and there were several reports of two there and elsewhere. Twenty-three counties produced sightings.

More often heard than seen, this Black-billed Cuckoo at Marblehead Lighthouse SP, *Ottawa*, revealed itself on 04 Jun for Victor Fazio III.

Barn Owl

These were reported:

Up to three at the Pickerington Ponds nest box on several dates (m. obs.)

Three in the Dundee area, *Tuscarawas*, on 06 Jun (Dick Hoopes)

One which was calling as it flew over Columbia Woods Park, *Summit*, after dark on 14 Jun (Rob Harlan)

One which flew over the Wellston, *Jackson*, McDonald's on 14 Jun (Alex Eberts)

Up to three seen by eBirders at Amish farms in *Holmes* on several Jun dates; multiple locations appear to be included

Bob Lane viewed a lovely family of freshly banded nestling Barn Owls in their box on 06 Jul in Holmes.

Eastern Screech-Owl

Tom Kemp counted four in the Beaver Creek area of *Wood* on 26 Jun. Fifteen other counties also yielded reports.

Great Horned Owl

The 01 Jun ONWR census tallied three (Ed Pierce *et al.*, *vide* Douglas Vogus). Chris Pierce heard two in his *Cuyahoga* yard at about 5:00 am on 25 Jun. Twenty-one counties provided sightings.

Barred Owl

Sarah Lawrence saw two and heard three more in Blacklick Woods MP, *Fairfield*, on 19 Jun. Three days later, Michael Lamont also found five there. Tom Frankel found five as well in Holden on 22 Jun; they were a family of three near one nest and two immatures at another. Thirty-four counties produced sightings.

Common Nighthawk

Elliot Tramer, who a few years ago began calling these the Uncommon Nighthawk, wrote that they were now a “disaster species in the Toledo area”. He saw only one all summer. John Shradler had more success; he spotted seven in Miamisburg, *Montgomery*, on 05 Jul. Reports came from 30 counties.

Chuck-will's-widow

We can reliably find them along Ohio Brush Creek in *Adams*; Waggoner Riffle Road parallels it and provides several vantage points. Reports of one or two there spanned Jun. Elsewhere, Bruce Simson saw one and heard another at Lake Hope/Zaleski on 11 Jul.

Eastern Whip-poor-will

On 09 Jun, Matt Anderson wrote from OOP-MP: “17! – all within park boundaries – the undisputed whip-poor-will capital of NW (maybe all of northern) Ohio! Is there anywhere else in NW Ohio that they can be found reliably?” I’d say nowhere else in the whole state. The highest counts elsewhere were three in *Lawrence* on 06 Jun (Philip Runyon) and in *Hocking* on 08 Jun (Robb Clifford). Ones and twos were also reported in *Adams*, *Medina*, *Meigs*, *Scioto*, and *Vinton*.

Chimney Swift

Ann and Dwight Chasar counted 105 entering a school chimney in Northfield Center, *Summit*, on 05 Jul. Chris Zacharias noted about 80 over the Great Miami River in *Montgomery* on 29 Jul. Eighty counties provided sightings.

Ruby-throated Hummingbird

Allen Chartier banded 15 at a station near Frazzysburg, *Muskingum*, on 13 Jul. Ginny Fanteti reported on 28 Jul from her *Clermont* home that she was “Going through over 2 cups of sugar water a day. Could be more than 13 birds — hard to count”. Seventy-six counties yielded reports.

Belted Kingfisher

Charles Bombaci saw eight along the northeast shore of Hoover Reservoir on 29 Jun, including a pair at their burrow. Doug Marcum also saw eight while canoeing seven miles of the Cuyahoga River in *Geauga* on 01 Jul. Sixty-three counties produced reports.

Irina Shulgina astutely captured a view of a roosting Common Nighthawk at Kiwanis MP, Franklin, on 28 Jul.

Red-headed Woodpecker

Members of a Detroit Audubon Society field trip counted 16 in their travels through OOPMP on 21 Jun. Counts between 10 and 15 came from **Clermont**, **Seneca**, and **Vinton**. Sixty-four counties had sightings.

Red-bellied Woodpecker

Sixteen was again the high count, but a shared one. Doug Overacker found them along his 20 mile BBS route in **Greene** on 14 Jun and Bill Stanley's were in the Cincinnati Nature Center's Rowe Woods, **Clermont**, on 28 Jun. The second-highest count was 10 along the CVNP Towpath Trail (Douglas Vogus *et al.*). Reports came from 80 counties.

Yellow-bellied Sapsucker

Aaron Boone heard one's distinctive territorial drumming in Tippecanoe, **Harrison**, on 14 Jun. Jeff Harvey and the Lanes discovered a family four in Thompson Ledges Township Park, **Geauga**, on 06 Jul. More reports came from other **Geauga** sites and **Ashtabula**, **Lake**, and **Portage**.

Downy Woodpecker

Tom Bartlett noted 20 in Springville Marsh on 22 Jun. All but seven counties provided reports.

Hairy Woodpecker

CVNP's Horseshoe Pond and the Tree Farm Trail hosted 18 for William Addis on 21 Jun. Nola Miller-Brasure saw the next-highest number, five, in Tinkers Creek SNP, **Portage**, on 14 Jun. Sixty-five counties produced sightings.

Northern Flicker

Woodlawn Cemetery, **Lucas**, held 12 on 01 Jun and 16 on 26 Jun (Tim Haney). The most elsewhere were 10 on 31 Jul along four miles of Towpath Trail in the **Cuyahoga** section of CVNP (Ken Andrews). Eighty counties produced reports.

Arthur Forman, Sr. captured this rare view of a Northern Flicker's tongue in Warren, **Trumbull**, on 29 Jul.

Pileated Woodpecker

Six locations in five counties each hosted four. Reports came from 63 counties.

American Kestrel

Andrew Cannizzaro counted eight at the Kilby Road gravel pits, **Hamilton**, on 07 Jun. Richard Green noted six in the vicinity of Philo High School, **Muskingum**, on 14 Jul. Matt Kemp tied him on 26 Jul when he saw six working a newly-mown field in **Lucas**. Sixty-six counties provided sightings.

Merlin

Jen Brumfield saw an early arrival cruising through the Rocky River Reservation, **Cuyahoga**, on 31 Jul; it was being harassed by swallows and swifts (and probably returning the insult).

Peregrine Falcon

The high count was three, a family at the **Ottawa** courthouse on 15 Jul. Fifteen counties had sightings.

Olive-sided Flycatcher

Many more than usual, all singles, were found this summer:

In CLNP on 01 Jun (m. obs.)

In Lake View Cemetery, **Cuyahoga**, on 05 Jun (Dick and Jean Hoffman)

Along the Zimmerman Trail, **Lake**, on 06 Jun (Tom Frankel)

At her **Delaware** home on 07 Jun (Maria Losey)

In Punderson SP, **Ashtabula**, on 13 Jun (Dick Hoopes)

At Lake Hope/Zaleski on 05 Jul (Bruce Simpson)

In Sharon Woods MP, **Franklin**, on 30 Jul (James Holsinger)

Eastern Wood-Pewee

Gabriel Amrhein counted 20 along the Buckeye Trail in **Perry** on 23 Jun. Rachele Kappler noted 15 along the CVNP Wetmore Trails on 27 Jun. Only seven counties produced no reports.

Yellow-bellied Flycatcher

Tom Bartlett's crew banded three and saw another in Jones Preserve on 02 Jun. Ryan Schroeder and Paul Sherwood saw the latest at Mud Lake SNP, **Williams**, on 13 Jun. Singles in **Ashland**, **Franklin** (2), **Hamilton**, and **Hocking** between 01 and 10 Jun completed the sightings.

Acadian Flycatcher

The Harlans found at least 25 in Mohican SP on 01 Jun. Reports came from 65 counties.

Alder Flycatcher

Matt Anderson found one at each of four **Lucas**

locations on 07 Jun. Jonathan Oliveras found three in Geneva SP, *Ashtabula*, on 14 Jun. Twenty-one counties yielded sightings.

Willow Flycatcher

Lake Erie Bluffs hosted 30 on 09 Jun (Cole DiFabio). Irina Shulgina counted 25 in Killdeer on 20 Jul. Sixty-two counties produced reports.

Tom Fishburn caught the attention of this Willow Flycatcher at Margaret Peak Preserve, Lorain, on 02 Jun.

Alder/Willow (“Traill’s”) Flycatcher

Several observers reported three which they declined to assign to a species. Nineteen counties hosted these enigmatic (and presumably silent) birds.

Least Flycatcher

Marsha Gilger watched two adults feeding a youngster along the CVNP Towpath Trail on 31 Jul. Mark Shaver and Tom Kaczynski also found three apiece, in Swine Creek Reservation, *Geauga*, on 01 Jun and at Holden on 04 Jun respectively. Twenty-one counties provided reports.

***Empidonax* sp. Flycatcher**

Reports at this level came from 29 counties; two of them were each of eight “empids”.

Eastern Phoebe

Three locations on four dates each held nine. Seventy-six counties had sightings.

Great Crested Flycatcher

Charles Bombaci found 12 along Hoover Reservoir’s northeast shore on 29 Jun. Seventy-two counties produced sightings.

Western Kingbird

One spent 08 and 09 Jun at Glacier Ridge MP, *Union*. Steve Landes’ and Carl Winstead’s documentation has been accepted by the OBRC and internet reports are pending.

Eastern Kingbird

Kelleys Island was hopping on 21 Jul—Victor

Fazio III found 38 of these feisty birds there. The 01 Jun ONWR census counted 29 (Ed Pierce *et al.*, *fide* Douglas Vogus). Reports came from 77 counties.

White-eyed Vireo

Speaking of hopping...Charles Bombaci found 13 of these in Blackhand Gorge SNP, *Licking*, on 06 Jun. Fifty-eight counties produced reports.

Bell’s Vireo

Ned Keller and Ted Ossage separately reported three at the Kilby Road gravel pits, *Hamilton*, on 01 Jun, where they’ve nested for a couple of years now. Reports of one or two came from *Clark*, *Erie*, *Franklin*, *Marion*, *Pickaway*, *Wood*, and *Wyandot*.

Yellow-throated Vireo

Scott Huges’ eight miles of kayaking on the Cuyahoga River in *Geauga* yielded 11 on 04 Jul. Fifty-seven counties provided sightings.

Blue-headed Vireo

These were scarce as usual, but seen all through the season. Locations in *Ashland*, *Geauga*, *Lucas*, and *Summit* hosted two; those counties also contributed singles as did *Cuyahoga*, *Lake*, and *Portage*.

Warbling Vireo

Kelleys Island provided the two highest counts, 25 on 20 Jun (Tom Bartlett *et al.*, Victor Fazio III) and 31 on 21 Jul (Tom Bartlett *et al.*). Censuses in ONWR on 01 Jun (Ed Pierce *et al.*, *fide* Douglas Vogus) and CVNP on 07 Jun (Douglas Vogus *et al.*) each tallied 24. Sixty-four counties produced sightings.

Philadelphia Vireo

Mary Ann Henderson saw one at the mouth of the Rocky River, *Cuyahoga*, on 01 Jun. Sandra Griffiths found another that same day on the Route 303 Bike and Hike trail, *Summit*.

Irina Shulgina discovered and well documented this rare Western Kingbird on 08 Jun at Glacier Ridge MP, Union.

Red-eyed Vireo

There were several double-digit reports from Mo-

hican; the largest was Gary Cowell's 23 in the SP lodge area on 04 Jul. The most elsewhere were 20 along the Towpath Trail in CVNP on 07 Jun (Douglas Vogus *et al.*). Reports came from 79 counties.

Blue Jay

David and Dorothy Bukovac counted 64 in Green Lawn Cemetery, *Franklin*, on 28 Jun. The second-highest number was Gabriel Amrhein's 21 in the United Plant Savers Sanctuary, *Meigs*, on 22 Jun. *Gallia*, *Monroe*, *Noble*, *Pike*, and *Putnam* had no reports.

American Crow

Five miles of travel in *Scioto* yielded 78 for Travis Skaggs on 10 Jul. Sightings came from all counties except *Monroe*, *Noble*, *Paulding*, *Pike*, *Putnam*, and *Shelby*.

Fish Crow

The one report, from *Cuyahoga*, had no details.

Common Raven

One was reported in *Belmont* without details.

Horned Lark

Gary Cowell found 50 in Kendrick Woods-Kiracote Prairie, *Allen*, on 25 Jul. A mile of Serlinger Road in *Crawford* produced 27 for Paul Sherwood on 23 Jul. Forty-nine counties had sightings.

Purple Martin

Victor Fazio III counted 108 at Kelleys Island on 21 Jul. Scott Pendleton's 60 in the Chambers Wetlands, *Harrison*, on 24 Jul was the second-highest number. Sixty-four counties provided reports.

Tree Swallow

Though the date seems a little early for migration massing, Deb Tefft found about 500 at CPNWR on 05 Jul. Only seven counties produced no sightings.

Northern Rough-winged Swallow

Elliot Tramer noted at least 300 in Farnsworth MP, *Lucas*, on 22 Jul. Goodyear Heights MP, *Summit*, hosted more than 100 on 22 Jun (Vicky Croissant). Reports came from 73 counties.

Bank Swallow

David Hochadel wrote, "500 at Mosquito WA on 7-20 increased to 2060 on 7-21. Observers directly to the north at Conneaut on Lake Erie noted a corresponding decrease on 7-20, suggesting the start of their southward migration from the large nesting colonies along the big lake." Elizabeth McQuaid and Donna K. Owen had counted 554 in one Conneaut colony on 09 Jul. The most elsewhere were 250 along River Drive, *Pickaway*, on 10 Jul (Gene Stauffer). Fifty-two counties had sightings.

Cliff Swallow

Charles Bombaci saw about 125 along the north-east shore of Hoover Reservoir on 06 Jul. Fifty-two counties provided reports.

Barn Swallow

Victor Fazio III noted on 08 Jul a "mass feeding frenzy of swallows all over [East Harbor]; bulk of swallows along lake Erie shoreline were this species". His count was 830. Victor also contributed the second-highest number, 312 at Kelleys Island on 12 Jul. Only seven counties did not produce sightings.

Swallow sp.

Several observers noted mixed flocks of 100 to 150 birds. On 31 Jul, J.W. Rettig saw at least 200 swallows at the East Fork beach. He wrote, "Thousands of insects were flying about and lying dead on the sand, grass, parking lot and water. Birds were landing on the sand and parking lot and eating insects".

Carolina Chickadee

The high count was 21, by Charles Bombaci in Hoover NP's Area N on 05 Jun. Fifty-seven counties provided sightings.

Black-capped Chickadee

Victor Fazio III counted 31 during his six hours on Kelleys Island on 21 Jul. The second-highest count, 13, was shared by Tom Bartlett *et al.* (Kelleys Island on 20 Jun) and the Chasars (CVNP Horseshoe Pond area on 21 Jun). Maria Losey thoroughly described one which visited her feeder in *Delaware* on 07 Jun. That's well south of the fairly broad overlap zone between Black-capped and Carolina chickadees which approximately tracks U.S. 30 across the state. Reports came from 29 counties.

This Northern Rough-winged Swallow offered Victor Fazio III a good study opportunity at Metzger on 01 Jun.

Chickadee sp.

Ashland, Columbiana, Hancock, Jefferson, Richland, Stark, and Wayne contributed sightings which couldn't be confirmed as either species. Indeed, some might have been hybrids. All but *Jefferson* are in the overlap zone described above.

Tufted Titmouse

A trio of birders found 20 at Headlands on 31 Jul. Seventy-eight counties had sightings.

Red-breasted Nuthatch

A private lakeside in *Madison* hosted three on 27 Jul (Cole DiFabio). The only other report that month was Matt Anderson's single in OOP-MP on 04 Jul. Tim Krynak and Terri Martincic found two in Hinckley Reservation, *Medina*, on 23 Jun. Singles were also sighted in *Cuyahoga, Lake, Ottawa, Portage, and Summit*.

White-breasted Nuthatch

Tom Frankel tallied 11 at Holden on 22 Jun. Two locations each held eight, the second-highest count. Reports came from 77 counties.

Brown Creeper

Doug Marcum found five along seven miles of the Cuyahoga River in *Geauga* on 01 Jul. Jennifer Caley found a nest in her *Portage* yard on 09 Jun. Sites in *Ashland, Butler, Cuyahoga, Lucas, Mahoning, Medina, Summit, and Wayne* also contributed sightings of one or two birds.

House Wren

Victor Fazio III saw three families and singles for a total of 40 throughout Kelleys Island on 21 Jul and other large counts came from there as well. The most elsewhere were 25 along the Heart of Ohio Trail, *Knox*, on 22 Jun (Gary Cowell and Anna Wittmer). Seventy-nine counties produced reports.

Winter Wren

Haans Petruschke found three territories in the Kirtland, *Lake*, area. The Ledges/Octagon area of CVNP is a reliable site; one or two were reported there on several dates (m. obs.).

Sedge Wren

The Harlans had found at least three singing males at Springfield Bog, *Summit*, by 13 Jul. Several birders found two birds there later in Jul. Jeffrey A. Miller saw one and heard up to three on several dates between 28 May and 17 Jun along County Road 272, *Holmes*. Other doubles came from Darby Creek on 26 Jun (Jen Moore) and 14 and 28 Jul (Ronnie Clark). *Clark, Hamilton, Lucas, Marion, Sandusky, and Seneca* contributed singles.

Marsh Wren

Chris Pierce counted 24 along the ONWR auto tour route on 22 Jun. ONWR and other nearby marshes had smaller double-digit reports on several other dates. The high count elsewhere was Elizabeth McQuaid's 10 at Lorain on 05 Jul. Twenty-eight counties provided sightings.

This Marsh Wren carrying a feast was photographed on 10 Jul by Irina Shulgina at Darby Creek.

Carolina Wren

Philip Sherick found 11, including an apparent family group, along the Old Post Road, *Scioto*, on 20 Jul. Seventy counties produced reports.

Blue-gray Gnatcatcher

The Station Road area of CVNP hosted 18 on 17 Jun (Jules Wyman). The 07 Jun CVNP census team counted 13 along a different stretch of the Towpath Trail (Douglas Vogus *et al.*) and three parties each found 12 in CVNP and elsewhere. Seventy-one counties provided reports.

Ruby-crowned Kinglet

Ed Wransky found one lingering in Carlisle Reservation, *Lorain*, on 01 Jun.

Eastern Bluebird

Cole DiFabio's 20 at Holden on 01 Jun included 14 juveniles. Holden later provided two counts of 14 (Cole DiFabio, Cory Chiappone), as did the Nye farm in *Hancock* on 10 Jun (*vide* Robert Sams). Reports came from 77 counties.

Veery

The Harlans found at least 10 in Mohican SP on 01 Jun, and the CVNP Wetmore Trails held nine on 19 Jun (Hope Orr). Twenty-six counties had sightings.

Swainson's Thrush

The three reports are:

In the Miami Whitewater Forest wetlands, *Hamilton*, on 01 Jun (Ted Ossage)

At her *Lucas* home on 04 Jun (Cathy Wilson)

At the Germantown MP nature center, *Montgomery*, on 18 Jun (Amanda Lawson)

Hermit Thrush

Robb Clifford found three at Sandy Delta, **Hocking**, on 08 Jun. Ones and twos were in **Ashland**, **Cuyahoga**, and **Summit**.

Wood Thrush

Gabriel Amrhein noted 20 in the United Plant Savers Sanctuary, **Meigs**, on 22 Jun and 25 along the Buckeye Trail in **Perry** the next day. Seventy-one counties provided sightings.

American Robin

Tom Bartlett and Victor Fazio III *et al.* counted 220 across Kelleys Island on 20 Jun. Heather Luedecke and Angelika Nelson found 111 along their BBS route in **Union** on 28 Jun. Only **Gallia**, **Monroe**, and **Noble** did not have sightings.

Gray Catbird

The high count was 40. It was shared by Ed Pierce's ONWR census crew on 01 Jun (*vide* Douglas Vogus), Cody M. Kent at Lake Erie Bluffs on 09 Jun, and Irina Shulgina at Killdeer on 27 Jun. All counties but **Gallia**, **Meigs**, **Monroe**, **Noble**, **Pike**, and **Putnam** produced reports.

Brown Thrasher

Scott Pendleton *et al.* counted 15 in The Bowl on 26 Jul. The second-highest count was Ron Semper's eight at Killdeer on 25 Jun. Reports came from 70 counties.

Northern Mockingbird

Heather Luedecke and Angelika Nelson's New Dover BBS route, **Union**, yielded 12 on 28 Jun. Three locations each held nine. Sixty-four counties provided sightings.

European Starling

Flocks at the Findlay Reservoirs and Riverbend Recreation Area, **Hancock**, totaled over 800 on 29 Jul (*vide* Robert Sams). Scott Myers estimated 700 along Township Highway 71, **Paulding**, on 23 Jul. **Monroe**, **Noble**, and **Pike** had no sightings.

Cedar Waxwing

The high count was 83, tallied by Ed Pierce *et al.* in ONWR on 01 Jun (*vide* Douglas Vogus). The shared second-highest count was 60. Charles Bombaci saw them along the northwest shore of Hoover Reservoir on 01 Jun; Kevin Lee found his "feasting on blueberries" at Rouster's Apple House, **Clermont**, on 05 Jul. They were reported in all but seven counties.

Ovenbird

The Harlans found 20 in Mohican SP on 01 Jun. Bruce Simson counted 12 in Lake Hope/Zaleski on 08 Jun. Forty-seven counties provided reports.

Worm-eating Warbler

Bruce Simson found seven in Lake Hope/Zaleski

on 05 Jul; they included a family of two adults and an immature. That county (**Vinton**), **Ashland**, and **Hocking** produced many sightings. **Adams**, **Athens**, **Butler**, **Fairfield**, **Harrison**, **Highland**, **Jefferson**, **Monroe**, **Morgan**, and **Scioto** each contributed a few.

Louisiana Waterthrush

The Mohican SP gorge is home to many; Kenn Kaufman found nine pairs there on 06 Jun including parents feeding two juveniles. Thirty-three counties had sightings.

Northern Waterthrush

The reports of these rare nesters are:

One in ONWR on 01 Jun, almost surely a migrating straggler (Ed Pierce *et al.*, *vide* Douglas Vogus)

One singing in Mosquito WA on 07 Jun (David Hochadel)

One along the Maple Highlands Trail, **Geauga**, on 06 Jul (Scott Huge)

One in Lake View Cemetery, **Cuyahoga**, on 31 Jul (Dick and Jean Hoffman)

Golden-winged Warbler

Sara Burch and Jacob McCartney watched one singing in a clear cut on Long Ridge Road, **Vinton**, on 01 Jun.

Blue-winged Warbler

The high count was eight, by Matt Anderson in OOPMP on 09 Jun. Three parties found five. Nathan Farnau's were at a private site in **Columbiana** on 01 Jun; the Chasars and Sandra Griffiths found theirs in the CVNP Horseshoe Pond area on 21 Jun; and Bruce Simpson's were in Lake Hope/Zaleski on 03 Jul. Reports came from 34 counties.

[Blue-winged x Golden-winged "Lawrence's" Warbler]

Albert L. and Sarah Troyer saw one at the Ohio Bird Sanctuary, **Richland**, on both 21 and 28 Jun.

Black-and-white Warbler

The trails in the **Hocking** section of Clear Creek MP hosted four on 04 Jul (Andrew Lodge) as did Lake Hope/Zaleski on 15 Jul (Bruce Simpson). Seventeen counties provided reports.

Prothonotary Warbler

Charles Bombaci tallied 24 along Hoover Reservoir's northwest shore on 01 Jun and 23 along the northeast shore on 06 Jul. The most elsewhere were the 11 which Scott Huge saw while paddling eight miles of the Cuyahoga River in **Geauga** on 04 Jul. Twenty-five counties produced sightings.

Tennessee Warbler

David Hochadel saw one in Grand River WA,

Trumbull, on 20 Jul, and Don Keffer saw it there on 25 Jul.

Nashville Warbler

Sandie Myers found a straggler at Tappan Lake, **Harrison**, on 06 Jun.

Mourning Warbler

Two were singing in Jones Preserve on 02 Jun (Tom Bartlett) and one popped up at CVNP's Station Road the same day (Jennifer Buczek)

Kentucky Warbler

Ten miles of Shawnee roads produced 10 for Kent Miller on 20 Jun. Ginny Fantetti found seven at East Fork on 15 Jun. Twenty-five counties had sightings.

Common Yellowthroat

The Ostermillers tallied "at least 50" in Tri-Valley WA, **Muskingum**, on 28 Jun. Irina Shulgina noted about 30 at Killdeer on 27 Jun. Only seven counties did not provide sightings.

Hooded Warbler

Many sites hosted between 10 and 15, but the high was 19. Gary Cowell found them in less than a mile of hiking in the **Ashland** section of Mohican SF on 15 Jul. Carl Winstead noted the same number along the Tulip Tree Trail of Clear Creek MP, **Fairfield**, also on 15 Jul. Forty-two counties produced reports.

American Redstart

Tom Frankel found an occupied nest and a total of 14 redstarts in Holden on 08 Jun. Forty-one counties provided reports.

Cerulean Warbler

Katie, Pann, and Terry Webb noted eight in and around the Miami Whitewater Forest campground, **Hamilton**, on 10 Jun. Reports came from 29 counties.

Northern Parula

Birders found four at locations in each of **Ashland**, **Clark**, **Licking**, and **Montgomery**. Thirty-three other counties also had sightings.

Magnolia Warbler

The Mohican SP covered bridge area hosted three on 28 Jun (Christopher Dyer and Cynthia Norris) and one or two were seen on other Jun dates. Other Jun reports of singles came from **Franklin** (2), **Hocking**, **Lake**, **Lucas**, **Morgan**, and **Wayne**. Susan Egan and Peggy Wang found one in the **Hocking** section of Clear Creek MP on 16, 18, and 26 Jul, the only sightings in that month.

Blackburnian Warbler

Four were sighted at various Mohican locations:

Two in the SP on 01 Jun (the Harlans)

One at the SP Gorge Overlook on 14 Jun (Michael R. Hershberger)

One at the SP covered bridge on 03 Jul (Cole DiFabio)

One at Hickory Ridge in the SF on 13 Jul (Gary Cowell)

Yellow Warbler

The ONWR census team counted 133 on 01 Jun (Ed Pierce, *et al.*, *fide* Douglas Vogus). Tom Bartlett and Victor Fazio III found 126 on Kelleys Island on 20 Jun. Don Keffer's 80 at Grand River WA, **Trumbull**, on 25 Jul was the high count away from the northwest. Reports came from 75 counties.

Chestnut-sided Warbler

Sightings were fairly frequent until 15 Jul but sparse after then. The high count was 12; Chris Pierce found them along the ONWR auto tour route on 22 Jun. Matt Anderson's four in a **Fulton** woodlot on 01 Jun was the second-highest number. Seventeen counties yielded reports.

Blackpoll Warbler

The Harlans saw one straggler at the Marblehead Lighthouse, **Ottawa**, on 04 Jun, and Karen and Rich Kassouf another by Lake Isaac, **Cuyahoga**, on the next day.

Black-throated Blue Warbler

Michael Motsch *et al.* discovered two near Kendall Lake in CVNP on 06 Jun; they've nested in that area a few times.

Pine Warbler

Three observers each found three. Tom Bain's were at the Mohican SF Memorial Shrine on 08 Jun, Tom Kaczynski's at Holden on both 14 and 31 Jul, and Bruce Simpson's in Lake Hope/Zaleski on 15 Jul. Fifteen counties produced sightings.

Yellow-rumped Warbler

Eli Miller heard one near the Tappan Lake marina, **Harrison**, on 07 Jun, then saw it when it came to his recording.

Yellow-throated Warbler

Six miles of floating down Cross Creek, **Jefferson**, on 01 Jun brought 16 for Scott Pendleton. Douglas Vogus *et al.* counted eight during the 07 Jun CVNP Towpath Trail census. Forty-five counties provided sightings.

Prairie Warbler

Bruce Simpson found 10 to 12 on each of six visits to Lake Hope/Zaleski between 08 Jun and 15 Jul. The most elsewhere were six at locations in **Licking** and **Montgomery**. Nineteen counties produced reports.

Black-throated Green Warbler

The high count was six; Gary Cowell tallied them along the Mohican SP North Rim Trail on 22 Jul and again on trails in Mohican SF on 29 Jul. Other Mohican sites and CVNP hosted five. Reports came from 15 counties.

Canada Warbler

The Harlans took top count honors with five in Mohican SP on 01 Jun. Rob Clifford saw three in Conkle's Hollow SNP, **Hocking**, on 11 Jun. All of the remaining sightings, of up to three birds, were also from Mohican SP and SF, and were scattered throughout the season (m. obs.).

Wilson's Warbler

Scott Pendleton saw one along Cross Creek, **Jefferson**, on 01 Jun.

Yellow-breasted Chat

Bruce Simpson found 10 to 14 at Lake Hope/Zaleski during his several Jun and Jul visits. Matt Anderson wrote from OOPMP on 03 Jul, "Yellow-breasted chats as it turns out have been among the primary beneficiaries (along with Chestnut-sided warblers) of the tornado damage from four years ago. Storm-damaged parcels are just coming into their prime for chats. I've found 13 -- more than half in the tornado's path -- so far this year vs. just three a year ago." The most elsewhere were Scott Pendleton's nine during his Cross Creek, **Jefferson**, float trip on 01 Jun. Reports came from 47 counties.

Eastern Towhee

Aaron Boone counted 26 along two miles of Township Highway 289 in **Harrison** on 14 Jun. The Harlans found 19 in Silver Creek MP, **Summit**, on 16 Jun. Seventy-three counties had sightings.

This Eastern Towhee indulged Tom Fishburn with a perfect pose at Woodbury WA, **Coshocton**, on 14 Jun.

Chipping Sparrow

Heather Luedecke and Angelika Nelson tallied 50 on 28 Jun along their **Union** BBS route. Tom Bartlett and Victor Fazio III found 26 on Kelleys Island on 20 Jun. Only **Crawford**, **Gallia**, **Meigs**, **Monroe**, **Noble**, and **Washington** did not produce a sighting.

Field Sparrow

Irina Shulgina twice found about 35, at Glacier Ridge MP, **Union**, on 22 Jun and at Killdeer on 27 Jun. Seventy-seven counties provided reports.

Vesper Sparrow

The two top counts came from **Harrison**: On 23 Jul Scott Pendleton found 22 in the Second Reclaim District and seven at The Bowl. The most in another county were four in the **Hancock** sanitary landfill on 30 Jun (Robert Sams). Twenty-six counties yielded sightings.

Lark Sparrow

Matt Anderson found seven pairs plus several immatures at a **Lucas** Christmas tree farm on 21 Jun. Several birders counted nine in OOPMP on 17 Jun. The most not in **Lucas** were Andrew Cannizzaro's two pairs in a field opposite Dravo Park, **Hamilton**, on 08 Jun. **Geauga**, **Greene**, **Lorain**, **Montgomery**, and **Tuscarawas** also provided reports.

Lark Sparrows have discovered fine nesting habitat at Oakes Quarry Park, **Greene**, and one was photographed there by Leslie Sours on 13 Jun.

Savannah Sparrow

The fields along Fairport Nursery Road, **Lake**, hosted 15 on 31 Jul (m. obs.). Various **Geauga** sites held 10 to 12. Reports came from 46 counties.

Grasshopper Sparrow

The Bowl is The Place: 80 were there on 26 Jul (m. obs.). The most elsewhere were 34 at the **Hancock** sanitary landfill on 04 Jul (Shane

Myers and Robert Sams). Thirty-eight counties produced reports.

Henslow's Sparrow

Scott Pendleton counted 31 in the Second Reclaim District, **Harrison**, on 10 Jun. Mike Smith found 20 in Tri-Valley WA, **Muskingum**, on 24 Jul. Twenty-nine counties produced sightings.

Song Sparrow

The 07 Jun Towpath census in CVNP turned up 61 (Douglas Vogus *et al.*). Cole DiFabio estimated 50 at Lake Erie Bluffs on 09 Jun. Every county but **Gallia**, **Monroe**, and **Noble** had sightings.

Lincoln's Sparrow

A Kent State University field ornithology class winkled one out of Springfield Bog, **Summit**, on 01 Jun.

Swamp Sparrow

Tom Bartlett counted 20 at Springville Marsh on 02 Jul. Thirty counties provided reports.

White-throated Sparrow

Three were reported; they're scarce but fairly regular well into Jun:

At Huffman Prairie, **Greene**, on 01 Jun (Sam Corbo)

At Headlands, singing on 17 Jun (Cole DiFabio) and heard again about a week later (*vide* Cole DiFabio)

In the Estel Wenrick Wetlands, **Clark**, on 27 Jun (Doug Overacker)

Dark-eyed Junco

John Riegsecker saw what was probably a straggling migrant at Killbuck on 16 Jun, though it could have wandered from the not-too-distant Mohican nesting area. The two high counts were of seven, by Tom Frankel at Holden on 08 Jun and Lisa Fisher at her **Geauga** home on 31 Jul. More reports came from other **Geauga** and **Lake** sites plus **Ashland**, **Ashtabula**, **Cuyahoga**, and **Summit**.

*Su Snyder found this attentive Grasshopper Sparrow posed nicely near Sugarcreek, **Tuscarawas**, on 15 Jul.*

*A sensational view of the typically skulky Henslow's Sparrow was obtained on 15 Jun at Tri-Valley WA, **Muskingum**, by Tom Fishburn.*

Summer Tanager

Triple sightings came from **Hamilton**, **Licking**, **Lucas**, and **Vinton**. Thirty mostly southern counties produced reports.

Scarlet Tanager

Gary Cowell counted 10 while hiking almost four miles of Mohican SF trails on 15 Jul. Reports came from 62 counties.

Northern Cardinal

Douglas Vogus *et al.* tallied 43 along the CVNP Towpath Trail on 07 Jun. Victor Fazio III found 36 on Kelleys Island on 21 Jul. Underbirded **Gallia**, **Guernsey**, **Monroe**, **Noble**, **Pike**, and **Putnam** didn't produce a cardinal sighting.

Rose-breasted Grosbeak

The 07 Jun CVNP Towpath Trail census produced 10 (Douglas Vogus *et al.*). Jeff Harvey saw seven at his **Mahoning** home on 19 Jun as did Gary Cowell and Anna Wittmer along the Heart of Ohio Trail, **Knox**, on 22 Jun. Fifty-one counties had sightings.

Blue Grosbeak

Brian Wulker's five at Fernald on 21 Jul was the high count. Twenty-six counties, of which only **Holmes**, **Lucas**, and **Paulding** are north of Columbus, provided reports.

Indigo Bunting

Kelleys Island hosted 44 on 21 Jul (Victor Fazio III). The Heart of Ohio Trail, **Knox**, had 30 on 22 Jun (Gary Cowell and Anna Wittmer) as did Armleder Park on 13 Jul (Brian Wulker). Only **Monroe**, **Noble**, **Pike**, and **Shelby** did not have sightings.

Dickcissel

Brian Wulker and J.W. Rettig each found 12 to 15 at Fernald on several dates. The high count elsewhere was 10; Steve Jones found them at Darby Creek on 07 Jun and Victor Fazio III on Kelleys Island on 22 Jul. Twenty-eight counties produced reports.

Bobolink

Scott Pendleton provided the two highest numbers, about 140 in the Second Reclaim District on 10 Jun and 125 at The Bowl on 23 Jul. The most not in *Harrison* were David Hochadel's 50 in Mosquito WA on 20 Jul. Forty-one counties had sightings.

Female Bobolinks are not as easily noticed as their flashy male counterparts, yet Irina Shulgina captured an image of this one carrying food for its young on 15 Jun at Glacier Ridge MI; Union.

Red-winged Blackbird

Ben Warner and Anna Wittmer estimated 2000 at East Harbor on 29 Jul. Victor Fazio III saw about 1600 at Killdeer on 22 Jul. Every county but *Gallia*, *Monroe*, *Noble*, and *Pike* provided at least one report.

Eastern Meadowlark

The Second Reclaim District, *Harrison*, hosted 60 on 10 Jun (Scott Pendleton). Observers found 42 to 46 in the Great Miami WMB on four Jun dates. Reports came from 65 counties.

Western Meadowlark

Myron Yoder found one on Reuben L. Yoder's *Holmes* farm on 01 Jun; Reuben saw it for two more days. It or another was again heard, and sometimes seen, in that vicinity between 13 and 16 Jun (Jacob Roalef, Hallie Mason).

Yellow-headed Blackbird

Kim Warner discovered one in Maumee Bay SP on 15 Jul. One (possibly the same bird) showed up at Metzger the next day, according to a pseudonymous post to Rarebird.org.

Common Grackle

Springville Marsh held at least 1000 on 02 Jul (Tom Bartlett). Kenn Kaufman noted about 700 "ready to roost" along West Portage Road, *Ottawa*, on the evening of 06 Jul. *Allen*, *Gallia*, *Monroe*, *Noble*, and *Pike* did not have sightings.

Brown-headed Cowbird

Brian Wulker found about 100 at Fernald on 02 Jul. Mary Lou Dickson saw 50 in Canal Winchester, *Franklin*, on 07 Jul; Gary Cowell tied her at Malabar Farm SP, *Richland*, on 09 Jul. Reports came from 77 counties.

Orchard Oriole

The Bowl hosted 24 on 23 Jul (Scott Pendleton). The 14 at the Kilby Road gravel pits, *Hamilton*, on 07 Jun included one pair at a nest (Andrew Cannizzaro). Fifty-four counties provided reports.

Baltimore Oriole

Tom Bartlett and Victor Fazio III counted 56 on Kelleys Island on 20 Jun. The second-highest number was 16 during the 06 Jul ONWR census (Ed Pierce *et al.*, *vide* Douglas Vogus). Seventy-three counties produced sightings.

House Finch

Andrew Anderson's feeders in *Jefferson* attracted about 25 on 19 and 29 Jul. Seventy-seven counties had sightings.

Purple Finch

Marsha Gilger saw at least six near Clinton, *Summit*, on 31 Jul. Counts of four came from two other *Summit* locations and *Union*. Sixteen counties provided reports.

American Goldfinch

Ron Sempier found about 80 at Killdeer on 25 Jun. Leslie Sours' yard and adjoining properties in *Franklin* hosted 44 on 18 Jul. Every county but *Henry*, *Monroe*, and *Noble* had sightings.

House Sparrow

Heather Luedecke and Angelika Nelson counted 167 along their New Dover BBS route in *Union* on 28 Jun. Reports came from 80 counties.
