THE EASTERN BIRD-BANDING ASSOCIATION
FINANCIAL REPORT OF THE TREASURER FOR 1951-52

Receipts

Balance from 1950-51 (on March 31, 1951) ........ $396.95
Membership dues (38 Sustaining Memberships) ........ 514.00
Contributions ........................................... 14.27
Sale of back copies of the EBBA NEWS .............. 1.40
Sale of equipment made by Mr. Geoffrey Gill .......... 1.25
Total receipts ........................................... $929.67

Disbursements

Publication of the EBBA NEWS ......................... $398.31
Expenses of Treasurer .................................. 31.65
Bank charges (foreign exchange fees) ................ 0.97
Expenses of annual meeting ........................... 0.82
Total disbursements ................................... $461.71

Balance Sheet

Total receipts ........................................... $929.67
Total disbursements ................................... $461.71
Balance (as on March 29, 1952) ......................... $468.00

Number of members gained .................................. 25
Number of members lost ................................... 17
Number of members in the E.B.B.A. on March 29, 1952 243
of which 29 are in arrears.

March 29, 1952
Merrill Wood, Treasurer
Along nearly every day for a number of weeks and towards the end of July appeared with 4 young. I would say that they were just beginning to fly and that they were about half the size of the elder birds.

"We have a wild cherry tree by our front porch and it is very interesting to watch the parent birds arranging the young to be fed. Both parents start picking the cherries; they crack the cherry pits with their beaks, then feed the young the kernels. You can actually hear them crack the pits.

I have watched them many times from a window about 10 feet from the tree. They took no notice of me at all, but kept right on feeding the young. They come back every day until the cherries are gone. I believe it is the same pair that nests here every year because they follow the same procedure and don't appear to be the least bit frightened. I have never found their nest, even though I have watched them many times. They never appear from the same direction.

"My father states that he saw 3 pairs at his camp about 9 miles from Riley Brook last summer. He says that they were around where salt had been put out for the deer.

Mrs. Patience Larlee
Plaster Rock
New Brunswick, N. J."

A word of caution has been received from Dr. Paul Bartach, Gunston Hall Road, Lorton, Va., relative to the article on Evening Grosbeaks which appeared in our last issue of Ebea News; namely, that the dull colored birds should not be listed as females only, since the young male Evening Grosbeak wears the plumage of the mother and may therefore easily be mistaken for a female. Dr. Bartach also tells us that he has had close to 200 at a time at his feeding station, where they devour a gallon of Sunflower seeds every day. He is more than halfway
through his fourth hundred pounds of Sunflower seeds for the season!

VISITATION FROM RARE HOUSE FINCHES THRILLS AREA ORNITHOLOGISTS

Mrs. Willis Geis, 66 Hendrie Ave., Riverside, Conn., sent us the following interesting item which appeared in their local newspaper: (Since this was written Mrs. Geis has reported 10 at her feeder on Hendrie Ave. She banded one.)

Bird watchers in eastern Greenwich these days are very much excited by the presence of a strictly western bird in their midst. The House Finch, a bird common from California to central Texas, was discovered by Mrs. Lawrence C. Chamberlain at her feeder on Old King's Highway, CG, shortly after Christmas. The flock has grown from six to twenty and seven others have been banded by Mrs. Edward Easton at her home on Riverside Ave.

Ornithologists from many surrounding communities have come to see them. The House Finches have been most obliging about appearing for their regular meals, sunflower seed preferred.

The story behind the bird's sudden appearance is given by Roger Tory Peterson in "Birds Over America." He writes that in 1940 dealers had brought the birds in large quantities to New York, calling them "Hollywood Finches," and when the law got after them for caging wild birds, those left in their stores were released. Peterson wondered if any would establish themselves in the east. A few were seen on Long Island five years later. One was reported in Bedford and one in Armonk but the present flock seems to be the largest known.

Curator Paul Griswold Howes at the Bruce Museum has a male House Finch in his new collection of Arizona Desert Birds. Once seen it is easy to distinguish from its nearest eastern cousin, the Purple Finch, Richard H. Pough in the Audubon Bird Guide gives this identification: "The male color is generally a brighter and purer red than that of the Purple Finch but is more restricted in area. The best character is the heavy brown streaking of the lower part.

In the female and young the less streaked, gray-brown back and less contrasting head pattern are generally diagnostic."

Keep your eyes open and you may discover you have a House Finch in your feeder too!

* * * * * * *

Mr. Patrick K. Garland, Danvers, N. J., reports banding the following for the year 1951 (Jan. 1 to Dec. 31) mostly weekends. Operating 10 of his 15 traps, 1,105 birds were banded, representing 37 species, with 74 returns and 3 recoveries. Also trapped were the following: 270 English Sparrows, 15 Chipmunks, 3 Grey Squirrels, 2 Cats and 1 Rabbit. (Cats and Sparrows were destroyed, the others liberated elsewhere.)

YOU COULD MAKE YOUR OWN TRAPS
BUT WE CAN DO IT FOR YOU AT LOWER COSTS!

ONE-CELL A good sturdy portable little job of all metal
TRAP-STEP construction with galvanized floor and sliding
TRAP take-out door. Our most popular model for feeding
shelf or on the ground. Size 6 x 6 x 8".

ONE-CELL A good bush trap to be set in shrubbery or on a
TOP-OPening tree. Spring operated and all metal construc-
TRAP tion. Size 6 x 6 x 8".

Each of these traps $2.00 plus 25¢ postage and packing. Canadian
borders add $1.00 per trap to cover shipping and other charges.
All traps available within 24 hours of receipt of order. Specify
1/2 or 1/4 wire mesh as desired.

GATHERING A safe all-metal gathering cage with 100 uses.
CAGE Size 4 x 5 x 8 with sliding door. $1.00 postpaid
in USA.

Large traps of several designs available. For information write
to: Geoffrey Gill, 24 Overlook Drive, Huntington, L. I., N. Y.
