Clarification of the Type Locality of the Black-capped Vireo

Charles W. Sexton1 and John S. Tomer2

¹City of Austin, Environmental and Conservation Services Department, P.O. Box 1088, Austin, Texas 78767 ²5911 East 46th Street, Tulsa, Oklahoma 74135

ABSTRACT.—The current A.O.U. checklist places the type locality of the Black-capped Vireo "on the Devil's River near Sonora, Sutton County, Texas." By examining maps of early survey routes and revisiting Samuel Woodhouse's personal diaries, we have established that Woodhouse collected the first Black-capped Vireo near the present settlement of Juno in northern Val Verde County, Texas.

Samuel W. Woodhouse collected the first Black-capped Vireo (*Vireo atricapil-lus*) known to science on 26 May 1851 "on the Rio San Pedro, two hundred and eight miles from San Antonio, on the road leading from that place to El Paso del Norte" (Woodhouse 1852). On that date he collected two males (type specimen: USNM 15040). Up through their fifth edition of the "Check-list of North American Birds", the American Ornithologists' Union (A.O.U.) simply cited Woodhouse's original locality (e.g., A.O.U. 1957). Deignan (1961) assigned the modern equivalent of the type locality as "= Devil's River near Sonora, Sutton County, Texas." Although Oberholser (1963) listed the type specimen from "the Devil's River 10 miles below its source in northern Val Verde County" in his 11,750-page typewritten manuscript of "The Bird Life of Texas", this conclusion was omitted from the published version of that work (Oberholser 1974). The A.O.U. followed Deignan in its sixth edition checklist (A.O.U. 1983). Marshall et al. (1985) further indicated some uncertainty about the precise type locality.

The confusion about the precise location where Woodhouse collected the first specimens is due largely to changing place names and ambiguity in certain key geographical phrases. Woodhouse described the type locality as being "on the road laid out under the direction of Bvt. Lieut. Col. J. E. Johnston, U.S. Topographical Engineers, in the year 1849, from San Antonio to El Paso" (Woodhouse, in Sitgreaves 1853). The publications containing maps of these early survey routes are relatively obscure or uncommon (e.g., Johnston et al. 1849; Sitgreaves 1853; Warren 1859a, b).

To clarify this situation, we examined maps of the original survey routes by Col. Johnston and others through southwest Texas (Johnston et al. 1849; Warren 1859a, b). By overlaying these on modern topographic maps (U.S. Geological Survey 1969, 1978), we were able to reconstruct each route fairly accurately with reference to more precisely mapped land forms and modern place names. Finally, we re-examined Woodhouse's original diaries (Woodhouse 1851a, b) to gain further details of his route and clues to the location and environment in which he collected the first vireos. His daily accounts include mention of distances travelled each day and references to important land forms, as well as natural history information along the route and other events of the journey.

Captain Jack Hays of the Texas Rangers is credited with giving the Rio San Pedro its modern name of the Devil's River (Webb 1952; Tarpley 1980). That the two are equivalent is now reasonably certain.

Woodhouse said he took the first vireos "within ten miles of [the Rio San Pedro's] source" (Woodhouse, in Sitgreaves 1853). This phrase has caused confusion. Some researchers have apparently assumed that this referred to the topographic headwaters of the drainage basin. For various branches of the Devil's River including Granger Draw, Johnson Draw, and the Dry Devil's River (the more northerly one of two features so named in the region), the topographic headwaters are in Sutton, Schleicher, and Crockett counties (U.S. Geological Survey 1978). At the time of Woodhouse's journey, apparently no one had explored the actual headwaters of any of these areas (Warren 1859a, b; Bender 1933; Schmid 1969). Woodhouse's diaries (1851a, b) further suggest that he did not traverse the regions which would later become those counties (see below).

Moreover, the "source", i.e. base flow, of the Devil's River does not come from the topographic headwaters. The aforementioned branches of the Devil's River lack surface flow for most of the year except after significant storm events (Brune 1981). Instead, the base flow is derived from a series of major springs near the settlement of Juno in northern Val Verde County (Brune 1981). The most important contribution to the base flow of the Devil's River is from Pecan Springs which is about 12 km downstream of Juno on the west bank of the river (Brune 1981). Brune (1981) stated that "they are the main source of the Devil's River." Another collection of springs variously called Juno, Headwater, Stein, and San Pedro Springs is found at and just above Juno, and another nearby but smaller source was at Beaver Springs, 6 km upstream from Juno (Brune 1981). Beaver Springs, although apparently dried up in recent decades, are the northernmost springs on the Devil's River mentioned by Brune (1981). We cannot determine precisely which of these several springs Woodhouse referred to as the "source" of the Rio San Pedro but we believe it is likely to be Pecan Springs.

We reconstructed Woodhouse's daily travels from his diaries (Woodhouse 1851a, b). One point not made clear in Woodhouse's description of the type locality is that he did not actually travel the precise road laid out earlier by Johnston. Nonetheless, we determined that Woodhouse was on Johnston's route on 26 May 1851. The expedition had left San Felipe Springs near the present-day city of Del Rio on 21 May 1851 and spent the next five days making their way up along the Devil's River. They suffered a rain delay on 24–25 May when the river rose rapidly, preventing further crossings. The river had fallen enough by 26 May for the wagons to proceed. That day they encamped at a location "which is at the head of the river in summer" (Woodhouse 1851b, p. 17). It was here that Woodhouse

"spent most of the day in trying to procure specimens[.] [I] rambled in the valley and on the mountains. I have procured specimens of a vireo? which I believe is new[,] the head of which is black, with a white line over the eye from the base of the bill. . . . I found it feeding in the cedars, it had a singular note. . . ." (Woodhouse 1851b, p. 18).

A cumulative tracking of distances travelled and landmarks passed each day during the period 21-26 May places the encampment of 26 May about 3 km

upstream of the present-day community of Juno. This would be about 15 km (9+ mi) upstream of the aforementioned Pecan Springs, corresponding well with Woodhouse's statement that he took the first Black-capped Vireos "within ten miles of [the Rio San Pedro's] source" (in Sitgreaves 1853). Furthermore, Woodhouse described the last "half-mile" stretch of the road near where they encamped on 26 May as being "swampy" (Woodhouse 1851b, p. 17). This may correspond to the series of springs "at and just above Juno" described by Brune (1981; see above).

The distance to the encampment of 26 May 1851 along Woodhouse's reconstructed route from San Antonio is approximately 320–355 km. This matches very well with Woodhouse's notation of securing the first Black-capped Vireo 208 mi (=335 km) from San Antonio (Woodhouse 1852).

Based on this information, we believe the modern day equivalent for the type locality of the Black-capped Vireo can be confidently placed on the Devil's River near the modern settlement of Juno, Val Verde County, Texas.

Acknowledgments

We thank Linda Rossi and Karen Stevens of the Academy of Natural Sciences of Philadelphia Library who kindly provided copies of Woodhouse's diaries and granted permission to quote from them. We thank Roger Clapp, Joe Grzybowski, and Andrew Wallace for further help in obtaining key reference materials. M. Ralph Browning, Kelly Bryan, Joe Grzybowski, Greg Lasley, Terry Maxwell, and Stanley D. Casto reviewed drafts of this manuscript and aided us with insightful discussions of Black-capped Vireo distribution. Portions of Sexton's studies of the Black-capped Vireo are supported by the Environmental and Conservation Services Department of the City of Austin.

Texas Bird Records Committee Report for 1989

Greg W. Lasley

305 Loganberry Court, Austin, Texas 78745-6527

This report contains the decisions of the Texas Bird Records Committee (hereafter "TBRC" or "committee") of the Texas Ornithological Society reached during 1989. For information on previous actions of the TBRC see Arnold (1984 and 1985) and Lasley (1988 and 1989). The TBRC requests and reviews documentation on any record of a Texas Review Species (see end of report) as well as any record of any species if requested to do so by a member of the TBRC. Some of the records submitted to the TBRC during 1989 were gleaned from old *American Birds* or Christmas Bird Count files, thus some portion of the work of the committee during 1989 was to catch up on older records. The TBRC reached a final decision on 237 records during 1989: 159 records of 61 species were accepted and 78 records of 45 species were not accepted, an acceptance rate of 67% for this report. There were 212 observers who submitted documentation (to the TBRC or to other entities) that was reviewed by the committee during 1989.

This report officially adds three species to the Texas state list: Yellow-billed Loon, Bridled Tern, and Greenish Elaenia. These actions brought the Texas state list to 571 species in good standing at the end of 1989.

The TBRC solicits reports of any species on the Review List as well as any species not previously accepted for Texas. We desire written descriptions as well as photographs and tape recordings if available. If anyone has information concerning a Review Species but is unsure how to submit that information please contact any member of the TBRC or the author of this report. There is a document available that lists every known record of the Review Species and gives the status (accepted, rejected, submitted/in circulation, or unsubmitted) of each record. If interested in this document, contact the author.

The records in this report are arranged taxonomically following The AOU Checklist of North American Birds (AOU 1983) as currently supplemented. Within each species the records are listed chronologically. The TBRC file number is preceded by the year the record was originally submitted to the committee. If photos are on file with the TBRC, the Texas Photo Record File (TPRF) (Texas A&M University) number is also given. If a tape recording of the bird is on file with the TBRC, the Texas Bird Sounds Library (TBSL) (Sam Houston State University) number is also given. Specimen records are denoted with an asterisk (*) followed by the institution and file number where the specimen is housed. The information in each account is usually based on the information provided in the original submitted documentation; however, in some cases I have supplemented this with a full range of dates the bird(s) was present if that information was made available to me later. All observers who submitted written documentation or photos of accepted records are listed by initials. The initials of the original discoverers of any particular bird(s) are in boldface when that information was known to me. There has been no attempt to list all observers who saw a particular bird. A number in parentheses after the species name represents the total number of accepted records in Texas for that species at the end of 1989; incomplete data prevents this information from being listed for all species at this time. All locations in *italics* are counties.

TBRC Membership.—Members of the TBRC during 1989 who participated in all decisions listed in this report are: Keith Arnold, Chairman, Greg Lasley, Secretary, Ted Eubanks, Jim Morgan, Ken Seyffert, Warren Pulich and John Arvin. In addition, Frances Williams retired from the committee during 1989 and Barry Zimmer was elected as a member. Both of these persons participated in many of the decisions listed in this report.

Contributors. - Kenneth Able (KAb), Bruce Aird, Richard Albert, Tom Albert (ToA), Don Alexander, Tony Amos, Margaret Anderson, Ben Archer (BAr), Eddie and Nina Arnold, Keith Arnold, John Arvin, Mike Austin (MAu), John Baird, Betty and Dan Baker, Larry and Martha Ballard (L&MB), Sharon Bartels, Bob Barth (BBa), James Beard (JBe), Bob Behrstock, Chris Benesh, Oleta Bilger, Gene Blacklock, Rick Bowers (RBo), Robert Bradley, Ron Braun (RBr), Lillian Brown, Mark Brown, Kelly Bryan, Frank Bumgardner, Sheriton Burr (SBu), Charlie Callagan (CCa), Chuck and Susi Campbell (C&SCa), Jerry Caraviotis, Steve Cardiff (StC), Oscar Carmona, Allen Chartier, Don Clapp, Charlie Clark, Gary Clark, George and Jane Clayton (G&JC), R. Coggeshall (RDC), Tom Collins, Dawn Conway, Arlie and Mel Cooksey (A&MC), John Coons (JCo), Marion Corder, Wesley Cureton, Lee Daniel, Dave Dauphin, Marvin Davis (MDa), Mike Denny, Arch Dillard, Donna Dittmann (DDi), Jeff Donaldson (JDo), Jon Dunn, Charles Easley, Randy Ellis, Victor Emanuel, Dodge and Lorna Engleman (D&LE), Rosemary English (REn), Pansy Espy, Ted Eubanks, Virginia Eubanks, Austin Evans, Mike and Rose Farmer (M&RFa), Linda Feltner, T. Ben Feltner (TBF), Dean Fisher, Lona and Steve Flocke (L&SFI), Ada Ware Foster (AWF), Jane Fowler, Tony and Phyllis Frank, Leo Galloway, Tony Gallucci, Hugh Garnett, Patricia Giddings, Jeff Gordon (JGo), Peter Gottschling, William Graber III, Jesse Grantham, Vince Gribble, Connie Hagar (CoH), Bryan Hale (BHa), Hazel Happner, Jean Harwell, William Harwell, Carl Haynie, Mitch Heindel, Ray Heitman, Oscar Hibler, Holly Hobart (HoH), Malcolm Hodges (MHo), Harold Holt, Bob Honig, George Howe, P. D. Hulce (PDH), Joe Ideker, Eleanor Inouye, George Jett, Barry Jones, Margaret Jones, Paul Jones, Tina Jones, Larry Jordan, Kevin Karlson, Tim Koebel (TKoe), Theodore Koundakjian, Mike Krzywonski, Ed Kutac, Steve Labuda, Greg Lasley, David Lindsey, Barry Linnett, Mark Lockwood, Robert Lockwood, Robert and Lauren Lynch, Duncan MacLulich, Guy McCaskie, Arlie McKay, Bonnie McKinney (BoM), Brad McKinney, Ruthie Melton (RMe), Steve Metz, Burt Monroe (BuM), Bob Moore, Kenneth Moore, Jim Morgan, Russell Morris, John Muldrow (JMu), Derek Muschalek (DMu), Don Myers, Ken Nanney, Celeste Newton, Hazel Nichols, Michael Nickell, Andy O'Neil, Frank Oatman, Ollie Olsen, Paul Palmer, Dick Payne, Mike Perkins, Noel Pettingell, Steven Pike, Randy Pinkston (RPi), Charles Potter, Scott Rea, Mac Read, Roger Reisch (RRe), Barbara and John Ribble, Ron Ridout, Bob Righter (BRig), Teresa Risdon, B. J. Rose (BJR), John Rowlett (JRo), Thomas Schulenberg, Bob Schwartz, Peter Scott, Willie Sekula, Chuck Sexton, Don and Martha Shearer (D&MSh), J. W. Sifford (JWS), John and Roseanne Snyder (J&RSn), Linda Snyder, John Sproul (JSp), Darleen Stevens, Elton Stilwell, Cliff Stogner (CSt), Bob Stone (BSt), Lynn Stowers, Jerry and Nancy Strickling (J&NSt), Jimmy Swartz (JSw), Neil Tennyson, Robert Thacker, Carol Trosset, Mary Ann Tucker (MAT), Nancy Umphres, Tom Urban, Richard Uzar, Al Valentine, Ray Waite, Ken Ward, Brent Wauer (BWa), Sally Weeks (SWe), Thomas White (ThW), Tony White, Bret Whitney, Clarence Wiedenfeld, Hal Wierenga, Steve Williams, David Wolf, Kenneth Wolf, Terrie Woodrow (TWo), Alan Wormington, Mary Ann Young (MAY), Barry Zimmer, Kevin Zimmer, Yvonne Zimmer.

Acknowledgments.—The TBRC is very grateful to the many contributors listed above, without whom this report would not be possible. We would also like to offer our sincere thanks to the following consultants who provided the TBRC with expert opinion, advice, or other information concerning records reviewed during 1989: Richard Banks, Laurence Binford, Roger Clapp, Malcolm Coulter, Jon Dunn, John W. Fitzpatrick, Kimball Garrett, J. R. Jehl, Wesley Lanyon, Dave Lee, Paul Lehman, Guy McCaskie, Burt Monroe, J. Bryan Nelson, John P. O'Neill, Dennis Paulson, J. V. Remsen, Jr., Robert Ridgely, Thomas Schulenberg and Thede Tobish. In addition, I would like to thank Chuck Sexton, Barry Zimmer, Ted Eubanks, David Wolf, and Carl Haynie for reviewing early drafts of this article.

Additional Abbreviations. —AB = American Birds magazine; BBNP = Big Bend National Park; CBC = Christmas Bird Count; GMNP = Guadalupe Mountains National Park; NWR = National Wildlife Refuge; SP = State Park; UTC = Upper Texas Coast.

Accepted Records

Red-throated Loon (Gavia stellata) (13). One (1989-47) at the Texas City Dike, Galveston from 21 November 1975 through 12 April 1976 (JH, WH, C&SCa, TBF, TC, L&MB, HN). Another (or the same?) (1989-48) at the Texas City Dike from 6 November 1976 through 6 March 1977 (DD, PJ, OH, RM). One (1989-49) at Texas City on 17 February 1978 (TE). One (1989-69) on Galveston Island, Galveston 24 April 1987 (WH). Up to five (1989-95, TPRF #749) photographed from Preston Peninsula, Lake Texoma, Grayson 10–28 January 1989 (HG).

Arctic/Pacific Loon (Gavia arctica/pacifica) (19). It is presumed that all records of this species complex in Texas pertain to Pacific Loon but since sight or photo identification of these two species is difficult at best, the TBRC has voted to list all the below records as Arctic/Pacific for the present time. This species occurs annually in very small numbers in Texas. One (1988-221, TPRF #666) at the Texas City Dike, Galveston from 19 November 1977 until 28 January 1978 (HoH). One (1988-207) at the Texas City Dike on 29 January 1984 (CH). One (1989-73) on Offat's Bayou in Galveston on 20 December 1986 (RBr). Two (1988-4, TPRF #669) photographed at Canyon Lake, Comal from 27-29 January 1987 (L&SFI, BAr). One (1988-217, TPRF #665) at Offat's Bayou in Galveston from "late" February until 17 April 1988 (MAu, JBe, GL). One (1988-236, TPRF #682) found at El Paso on 31 March 1988 in an exhausted condition was released at a nearby lake later that day; it lingered at the lake for several days before departing (JSp, BZ). One (1988-227, TPRF #675) at Estes, Nueces from 29-31 May 1988 (B&DB, JG, JSw)) represents the latest accepted spring date for the species in Texas. One (1988-274) at Lake Balmorhea, Reeves from 5-7 October 1988 (ML). One seen and photographed (1989-3, TPRF #734) at Spence Reservoir, Coke on 11 November 1988 (MH). One (1989-98, TPRF #738) found dead at El Paso on 7 December 1988 (BZ, JDo).

Yellow-billed Loon (*Gavia adamsii*) (1). One (1988-276, TPRF #696) at Buffalo Springs Lake, *Lubbock* from 15 December 1981 through 16 January 1982 represents the first accepted record for Texas (CSt).

Red-necked Grebe (*Podiceps auritus*) (4). One (1989-50) at Quintana Jetty, Freeport, *Brazoria* from 17 December 1978 through 3 January 1979 (DD). One (1988-297) at Offat's Bayou in Galveston on 26 December 1987 (GH). One (1989-23) at Boles Road Lake, *Lubbock* on 5 & 7 January 1989 (ML).

Clark's Grebe (Aechmophorus clarkii). One (1988-264, TPRF #691) at Mountain Shadow Lake, El Paso on 27 & 28 February 1988 (JS, RW). One (1988-235, TPRF #681) at Ft. Bliss, El Paso on 18 April 1988 (BZ). Two (1988-275, TPRF #695) at Lake Balmorhea, Reeves from 19 October through 28 November 1988 (ML). Two (1989-94) at Lake Balmorhea from 1 March through 3 May 1989 (ML, AW). This species was formerly regarded as a color phase of the Western Grebe and our knowledge of this species in Texas was very sparse until 1985. Since that time it has proven to be a regular fall and winter visitor in small numbers to far west Texas and was removed from the regular Review List by the TBRC in early 1990 (see end of report).

Cory's Shearwater (Calonectris diomedea). Four in a group (1989-107) seen 42 miles off Port Aransas, Nueces on 29 September 1981 (DW). This species is now regarded as a regular late summer visitor to Texas waters and is no longer on the rarities Review List (see end of report).

Sooty Shearwwater (*Puffinus griseus*) (3). One (1988-234, TPRF #680) was found injured at Port Aransas, *Nueces* on 19 May 1988 (TA). A photo of this bird was published in *AB* 42:458.

Band-rumped Storm-Petrel (Oceanodroma castro) (4). One (1985-7) at Mitchell Lake, Bexar, 14 June 1984 (WS). This record was initially not accepted by the TBRC (Arnold, 1985), but was recirculated through the TBRC and accepted in 1989.

Red-billed Tropicbird (*Phaethon aethereus*) (2). One immature (1989-134, TPRF #762, *TCWC #12437, TBSL #197-01) found exhausted at Zapata, *Zapata* near Falcon Lake on 29 April 1989 (NU). A photo of this bird was published in *AB* 43:503. The bird was kept alive until 23 May 1989 by a wildlife rehabilitator.

Brown Booby (Sula leucogaster) (9). One immature (1989-59) on 15 March 1989 at the "Matagorda Jetty" (=mouth of Colorado River), Matagorda (JMu).

Red-footed Booby (Sula sula) (1). One (1988-258, TPRF #758) photographed 53 miles off Galveston on 27 March 1983 (TKoe). There is a specimen that cannot be located that was taken prior to 1910 in the Rockport area, but the Galveston bird remains the only Texas record currently accepted by the TBRC.

Glossy Ibis (Plegadis falcinellus) (9). One adult (1988-203, TPRF #671) at Anahuac NWR, Chambers from 12 March-24 April 1988 (DP, TE, JA). One adult (1988-211) north of the High Island high bridge, Chambers on 23 April 1988 (CE). Two adults (1988-209, TPRF #672) in Chambers on 1 May 1988 (TE). Two adults (1988-210) on west Galveston Island from 6-20 May 1988 (WG, SB, JM, GL, CN). One adult (1989-131) on Galveston Island on 22 April 1989 (J&WR). One adult (1989-147) at Port Bolivar, Galveston on 29 April 1989 (JM,

TE, BB, RE). One adult (1989-148) at Anahuac NWR, *Chambers* on 10 June 1989 (JM, TE, BB, RE). This species, first accepted for Texas only in 1988 (Lasley, 1989), now appears to be an annual spring and summer visitor on the UTC in very small numbers.

Jabiru (Jabiru mycteria) (5). Two (1989-137, TPRF #763) photographed approximately nine miles east of Encino, Brooks on 29 October 1979 (TU). These birds were apparently present for several weeks but a full range of dates is not available.

Brant (Branta bernicla) (8). One (1989-74) at High Island, Galveston on 13 December 1986 (DA, DMu).

Muscovy Duck (Cairina moschata). Three immatures (1987-10, TPRF #731) at Salineno, Starr on 21 November 1986 (ML); this record was initially not accepted by the TBRC during its first review (Lasley, 1988) but was circulated again in 1989 after the TBRC had accepted the species for the Texas list. Three (one adult, two immatures) (1988-300, TPRF #745) at Salineno 9–22 October 1988 (MH, KZ). One adult (1989-141, TPRF #761) on the Tigre Grande arm of Falcon Lake, Zapata on 16 March 1989 (MDa, MHo). This species is now considered to be an uncommon to rare permanent resident along the Rio Grande in the vicinity of Falcon Lake and the TBRC has removed it from the main Review List (see end of report).

Northern Goshawk (Accipiter gentilis) (4). One adult (1989-31) at Sheldon Reservoir, Harris on 12 January 1973 (TBF, VE). This record is the first (and only) accepted UTC report. One immature (1988-5) on 29–30 December 1982 at Rio Grande Village, BBNP, Brewster (CW, GL). One adult (1989-20) near Panther Junction, BBNP, 20 January 1989 (FO). Although reported often, this species is seldom well documented in Texas.

Common Black-Hawk (Buteogallus anthracinus). One adult (1988-265, TPRF #692) photographed at Boquillas Canyon, BBNP, Brewster on 21 March 1979 (KB, TG). One adult at a nest (1988-229, TPRF #668) on 23 May 1988 along the Devil's River near Comstock, Val Verde (KA, DC). One adult (1988-294) in Brooks on 30 October 1988 (AO). This species has been taken off the main Review List by the TBRC but documentation is still solicited in order to study the status and distribution of the species in Texas (see end of report).

Swainson's Hawk (*Buteo swainsoni*). Although not on the Review List, the Texas Christmas Bird Count Editor has requested the TBRC to review records of this species submitted on CBC's. One immature (1989-55, TPRF #736) in *Brazoria* on 31 December 1987 and 3 January 1988 (MAY, RU, BH).

Northern Jacana (*Jacana spinoso*\) One (1989-81) at Eagle Nest Lake, *Brazoria* on 28 March 1972 (GM). One (1988-249) at Bentsen SP, *Hidalgo* from "late" November until 28 December 1985 (CN).

Surfbird (Aphriza virgata) (3). One (1988-222) on West Galveston Island on 16 March 1988 (D&LE, G&JC).

Purple Sandpiper (Calidris maritima) (6). One (1988-252, TPRF #704) at Freeport, Brazoria from 19–22 December 1976 (TG, TBF, WC). One (1988-251, TPRF #686) from 12 November 1977 through 14 January 1978 at Freeport (TE, RMe). One (1988-250, TPRF #687) at Freeport from 21 December 1980 until "late" February 1981 (TE).

Ruff (Philomachus pugnax) (10). One (1989-118) at Galveston from 29 March

until 1 April 1981 (**TBF**, AD). One (1988-226, TPRF #667) at Gilchrist, *Galveston* on 12–14 May 1984 (**TE**). One (1988-241) at Austin, *Travis* on 20 August 1988 (**CB**, EK, RH)

Pomarine Jaeger (Stercoraris pomarinus). One (1988-281. TPRF #699) at San Luis Pass, Galveston from 31 May through 2 August 1986 (TE). One (1989-58, TPRF #748) at Bolivar Flats, Galveston on 28 November 1986 (TJ, BR). Two (1989-8) at Galveston on 26 December 1988 (TE). This species has been removed from the regular Review List and its distribution and status in Texas is being studied by a subcommittee of the TBRC (see end of report).

Parasitic Jaeger (Stercoraris parasiticus). One adult (1988-16) on South Padre Island, Cameron on 16 January 1982 (CS). Six (3 adults, 3 immatures) (1988-262, TPRF #689) at Boca Chica, Cameron on 21 February 1986 (BZ, GL). Like the Pomarine, this species has been removed from the main Review List (see end of report).

Little Gull (Larus minutus) (8). One adult (1989-1, TPRF #744) at Mountain Creek Lake, Dallas from 6–17 December 1988 (MH, CH). One adult (1989-10) at Lake Waco, McLennan from 9 January until 2 March 1989 (JMu, CS, MAT, GL).

Common Black-headed Gull (Larus ridibundus) (2). One adult in breeding plumage (1989-26) on 1 and 3 March 1989 at Lake Arlington, Tarrant (AW, JWS).

Mew Gull (*Larus canus*) (2). One first-winter bird (1989-24, TPRF #730) from 14 December 1988 through 4 January 1989 at the Eastside Sanitary Landfill in Fort Worth, *Tarrant* (CH, MP).

California Gull (Larus californicus) (11). One second-winter bird (1989-116) at Bolivar Flats, Galveston, on 26 October 1980 (BW, PS, BBa). One adult (1988-271) at McNary Reservoir, Hudspeth on 28 January 1985 (BZ, JD). One adult (1989-15) at Fort Hancock Reservoir, Hudspeth from 5-8 November 1988 (LJ, BZ). One first-winter bird (1989-100) at Mountain Creek Lake, Dallas from 14 December 1988 through 21 January 1989 (KN). One second-winter bird (1989-28) at the Brownsville Dump, Cameron on 12 February 1989 (BW).

Thayer's Gull (Larus thayeri) (7). One adult (1988-267, TPRF #747) at Lake Waco, McLennan from 5-24 August 1988 (JMu). This record represented the earliest fall date for the species in Texas as well as only the second record of an adult in the state.

Lesser Black-backed Gull (Larus fuscus) (31). One adult (1989-32) in Galveston on 28 January 1973 (NP). One adult (1989-109) in Galveston from 8 December 1975 until 4 April 1975 (J&NS, TBF). One adult (1988-220) at Port Aransas, Nueces on 4 January 1981 (TA). One adult (1988-261, TPRF #688) at Boca Chica, Cameron on 21 February 1986 (GL, BZ). One second or third-winter bird (1988-3) at the Brownsville Dump, Cameron on 28 December 1986 (StC, DDi). One adult (1988-197) at Laguna Atascosa NWR, Cameron on 4 March 1988 (CB, JC). One adult (1988-229, TPRF #674) at Padre Island National Seashore, Kleberg on 15 March 1988 (TA). One adult (1989-52) at San Luis Pass, Galveston on 8 January 1989 (TE). One adult (1989-93, TPRF #739) at the Brownsville Dump on 11 January 1989 (JD). One third-winter bird (1989-140) at San Ygnacio, Zapata on 8 April 1989 (BZ, RBo). This bird was also seen on the Mexican side of the Rio Grande providing one of the very few records for that country. In addition to the above records it should also be noted that the Lesser Black-backed

Gull on Mustang Island at Port Aransas in 1983 (TPRF #333) has continued to winter at the same location and was present this year from 25 October 1988 until 16 April 1989.

Glaucous Gull (Larus hyperboreus) (31). One first-winter bird (1988-268) at Texas City, Galveston on 7 January 1978 (IM, TE). One first-winter bird (1988-283, TPRF #712) on East Beach, Galveston on 14 January 1979 (TE). One firstwinter bird (1988-284, TPRF #713) from 1-11 March 1982 at East Beach, Galveston (TE). One first-winter bird (1988-286) at Bolivar Flats on 28 April 1983 (TE, IM). One first-winter bird (1988-285, TPRF #714) at San Luis Pass, Galveston on 7 April 1985 (TE, VE). One first-winter bird (1988-263, TPRF #690) at Boca Chica, Cameron on 8 April 1986 (BZ, GL). One first-winter bird (1988-233, TPRF #679) at Rollover Pass, Galveston from 16-28 April 1988 (GJ, HW, TW). One first-winter bird (1988-292, TPRF #715) at Hornsby Bend Ponds, Austin, Travis on 8 December 1988 (GL, EK) represents one of few inland Texas records. One first-winter bird (1989-43) at the mouth of the Brazos River, Brazoria on 20 December 1988 (MB). One first-winter bird (1989-57, TPRF #740) at Freeport, Brazoria on 3 January 1989 (MH). One first-winter bird (1989-61) at San Luis Pass, Galveston on 4 March 1989 (PG). One first-winter bird (1989-149, TPRF #776) at Bolivar Flats from 15 April until 6 May 1989 (TE, JM). Most, if not all of the late 1988 and early 1989 records on the UTC may pertain to the same wandering bird.

Great Black-backed Gull (*Larus marinus*) (11). One first-winter bird (1989-11) at Galveston on 8 February 1981 (**TBF**). One first-winter bird (1989-65) at Galveston on 24 January 1984 (MHo).

Black-legged Kittiwake (Rissa tridactyla) (13). One first-winter bird (1989-34, TPRF #735) at Mountain Creek Lake, Dallas from 6 December 1988 through 17 January 1989 (MH, SM, A&MC). A photo of this bird was published in AB 43: 336. One first-winter bird (1989-29, TPRF #742) at Aransas Pass, San Patricio, from 12-26 January 1989 (E&NA).

Sabine's Gull (Xema sabini) (18). One juvenal bird (1989-9, TPRF #743) in Lubbock on 24 October 1970 (LG). One juvenal bird (1988-208) at Lake Benbrook, Tarrant from 18–20 October 1986 (CH, RDC). One juvenal (1988-243, TPRF #684) at Pico Norte Pond, El Paso, on 12 September 1988 (BZ). A photo of this bird was published in AB 43:131. One juvenal bird (1988-245, TPRF #685) at Fort Bliss, El Paso on 23–24 September 1988 (B&YZ). Two juvenal birds (1988-260) at Lake Buchanan, Llano/Burnet on 25 September 1988 (ES, LS). One juvenal bird (1988-273, TPRF #694) at Lake Balmorhea, Reeves from 5–7 October 1988 (ML). One juvenal (or first-winter?) bird (1989-13) at Mountain Creek Lake, Dallas on 10 December 1988 (KN). This record represents the only accepted winter record for Texas and probably only the second winter record for the United States.

Bridled Tern (Sterna anaethetus) (5). One (1988-277, TPRF #697, *TCWC #12442) found dead at Port Aransas, Nueces on 17 September 1988 (TA). Three (1988-278, TPRF #698) at Port Aransas on 17 September 1988 (TA). A photo of one of these three birds was published in AB 43:128. One (1988-299, TPRF #746, *SFASU #3088) collected at Bolivar Flats, Galveston on 17 September 1988 (DF, DW). One (1988-290) on the Cameron/Willacy line, South Padre Island on 18 September 1988 (AW, SP). A flock of up to 25 individuals (1988-246) off of Freeport, Brazoria on 25 September 1988 (PG, MAu). All of the above records

were apparently associated with the passage of Hurricane Gilbert. These reports (in combination) represent the first accepted state records of the species.

Brown Noddy (Anous stolidus) (2). One immature (1988-291, TPRF #710) on the Cameron/Willacy line, South Padre Island on 18 September 1988 (AW, SP). A photo of this bird was published in AB 43:128. Like the Bridled Tern records above, this record was most likely the result of Hurricane Gilbert.

Ruddy Ground-Dove (Columbina talpacoti) (7). A pair (1989-85) at Brownsville, Cameron on 7 January 1989 (FO, EI). Brightly plumaged Common Ground-Doves are sometimes misidentified as Ruddy Ground-Dove. See Dunn and Garrett (1990) for important identification notes on this species.

Spotted Owl (Strix occidentalis). Two adults (1988-200, TPRF #676) photographed on 5 March 1988 in the GMNP, Culberson (OO). One (1989-38, TPRF #750) roosting in an El Paso backyard on 2 January 1989 (R&LL, JSp). This species has been removed from the main Review List (see end of report).

Northern Saw-whet Owl (Aegolius acadicus) (8). One (1988-230) in the high country of GMNP, Culberson on 28 and 29 May 1988 (CH, TR). This species is probably a very rare resident of these mountains but is seldom well documented by observers.

Green Violet-ear (Colibri thalassinus) (9). One (1989-145, TPRF #759) at Brownsville, Cameron on 3 and 4 June 1989 (BM, M&RFa).

Lewis' Woodpecker (Melanerpes lewis) (11). One (1989-14) in McKittrick Canyon, GMNP, Culberson on 28 December 1982 (CS). One (1988-293, TPRF #716) at Frijole Historic Site, GMNP on 3 January 1986 (ML). One (1988-266, TPRF #693) along the Guadalupe River, Kerrville, Kerr from 10 December 1987 until 26 March 1988 (TG, KB). Two (1988-205, TPRF #673, TBSL #165-01) at Ft. Clark Springs, Brackettville, Kinney from 25 December 1987 until 13 April 1988 (TG, KB, BHa). One (1989-6) near Gordon, Erath on 30 October 1988 (KM). One (1989-135, TPRF #775) at Muleshoe NWR, Bailey from 9–13 May 1989 (NT, BL, DC, DS, J&RSn, AWF, RE).

Williamson's Sapsucker (Sphyrapicus thyroideus) One (1988-288, TPRF #711) in Lorenzo, Crosby on 19 March 1976 (RL, ML). One (1988-270) on 4–5 May 1984 in El Paso (JF). One (1989-124) on 11 March 1986 on the Lost Mine Trail in BBNP, Brewster (DP). One (1988-282) on 4 November 1988 in the Madera Canyon picnic ground, Davis Mountains, Jeff Davis (TE). This species has been removed from the main Review List (see end of report) but documentation is still requested.

Greenish Elaenia (Myiopagis viridicata) (1). One (1988-289, TPRF #330) at High Island, Galveston from 20–23 May 1984 (JM, LF, TE). Photos of this bird have been in the TPRF since 1985, but the record was not officially reviewed by the TBRC until 1989. This record, the first for Texas and the United States, has also been accepted by the ABA and AOU. A photo of this bird was published in AB 38:934. See also Morgan and Feltner (1985).

Sulphur-bellied Flycatcher (Myiodynastes luteiventris) (3). One (1989-30) at Anahuac NWR, Chambers on 2 September 1965 (LS) represents the earliest accepted Texas record.

Thick-billed Kingbird (*Tyrannus crassirostris*) (4). One (1988-240, TPRF #683, TBSL #164-01) at Cottonwood Campground, BBNP, *Brewster* from 5 August–18 September 1988 (RT, GL).

Gray Kingbird (*Tyrannus dominicensis*) (2). One (1988-218) at Rockport, *Aransas* on 31 August 1951 (SW, CoH). This record represents the earliest of the two accepted for the state.

Fork-tailed Flycatcher (*Tyrannus savana*) (5). One immature (1988-298, TPRF #732) at Ricardo, *Kleberg* from 18–26 December 1988 (KW, RA, ToA, PP, GL). Like the 1984-85 Texas record, this bird was likely the northern race (*T. s. monachus*) which is in contrast to most other U.S. records which apparently pertain to the South American race (*T. s. savana*). See Monroe and Barron (1980). A photo of this bird was published in *AB* 43:232.

Rose-throated Becard (*Pachyramphus aglaiae*) (7). One female-plumaged bird (1989-82, TPRF #737) at Bentsen SP, *Hidalgo* from 13 December 1988–30 March 1989 (TS, JD, FO, A&MC, FB, DP, MD, JG, BJR). One male (1989-132) at Santa Ana NWR, *Hidalgo* on 24 December 1988 (**JGo**).

Cave Swallow (Hirundo fulva). Although not on the Texas Review List, the following record was reviewed by the TBRC since it represented the first UTC record. Two pairs (1989-150, TPRF #777) nested at Sea Rim SP, Jefferson from 24 April into "summer" 1989 (JC, BS, TE, JM, WG, JB). A photo of these birds was published in AB 43:508.

American Dipper (Cinclus mexicanus) (5). One (1989-5, TPRF #664) at GMNP, Culberson on 23 Oct 1988 and 2 Jan 1989 (BWa, OO). It is fairly safe to assume that the observations on these two dates represent the same individual bird as the particular location had a restricted access and the only two visits by observers during that time frame each yielded the bird.

Clay-colored Robin (*Turdus grayi*) (26). One (1988-77) on 3 January 1974 at Santa Ana NWR, *Hidalgo* (KAb). One (1988-202) at Sarita, *Kenedy* on 8 December 1987 (JRo). One (1988-206) from 15 January through 1 April 1988 at Corpus Christi, *Nueces* (GB). One (1989-125) at Santa Ana NWR from 11 December 1988 through 5 February 1989 (TEW, JGo, RR, TWo).

Varied Thrush (*Ixoreus naevius*) (6). One (1989-142) at Cottonwood Campground, BBNP, *Brewster* on 12 and 14 April 1989 (**D&MSh**, LD).

Aztec Thrush (*Ridgwayia pinicola*) (3). One (1989-22) at Boot Spring, BBNP, *Brewster* on 31 July, 1 and 7 August 1982 (CS, ML).

Northern Shrike (Lanius excubitor). One immature (1989-35) on 14 November 1985 in rural Armstrong (GL). One immature (1989-36) on 15–16 November 1985 in Randall (BBa, GL). One (1989-92) at Palo Duro Canyon SP, Randall, on 22 January 1989 (CH, TR). One immature (1989-130) 12 mi. E of Texline, Dallam on 6 March 1989 (AW). One immature (1989-62) at Lake Mineral Wells SP, Parker on 19 March 1989 (CH). This species has been removed from the main Review List but documentation is still requested (see end of report).

Yellow-green Vireo (Vireo flavoviridis) (5). A pair (1988-224) at Laguna Atascosa NWR, Cameron from 2 July-6 August 1988 (RT, MA, OC, DL, CB, CH). This pair of birds nested and apparently fledged three young.

Black-whiskered Vireo (Vireo altiloguus) (4). One (1989-122) from 30 April to 3 May 1981 on west Galveston Island, Galveston (PDH, WR). One (1988-223) on 4-5 April 1987 at High Island, Galveston (RT). One (1988-231, TPRF #670) on 23 May 1988 several miles N of Rockport in Aransas (CC).

Connecticut Warbler (Oporornis agilis) (5). One (1989-76) at Port Bolivar, Galveston on 10 October 1979 (TBF). One (1988-238) in Grand Prairie, Dallas on

30 April 1988 (KN). One (1988-244, TPRF #703) netted and banded on 5 September 1988 in Plano, *Collin* (AV). This species is often reported, but only rarely well-documented in Texas. It is a species that generally migrates well to the east of Texas and observers should exercise great caution in its identification.

Gray-crowned Yellowthroat (Geothlypis poliocephala) (there are over 30 accepted records of this species in Texas, but only 4 in the 20th century). One (1988-204) at Rancho Viejo, Cameron on 15 April 1988 (JG). One male (1989-144, TPRF #760) at the Sabal Palm Grove, Cameron from 21 May until 5 July 1989 (M&RFa, A&MC, OC, MK, BM). The latter bird was possibly the same bird that was at the Palm Grove in 1988 (Lasley, 1989). Photos of the 1989 bird were published in AB 43:397, 1278.

Red-faced Warbler (Cardellina rubrifrons) (6). One (1988-242) at Boot Spring, BBNP, Brewster on 8 August 1988 (CCa).

Rufous-capped Warbler (Basileuterus rufifrons) (6). One (1989-106) on 9 September 1973 in Campground Canyon, BBNP, Brewster (DW) represented the second Texas and U.S. record. One (1989-99) on the Lost Mine Trail, BBNP, on 12–13 March 1986 (DP).

Common Redpoll (Carduelis flammea) (3). One (1989-11, TPRF #733) at Glen Rose, Somervell from 7 January until 1 March 1989 (OB, CH, JMu, MAT, RPi, CS, CE, GL, AW). Photos of this bird were published in AB 43:271, 339. See Haynie (1989).

Unaccepted Records

A number of factors may contribute to a record being denied acceptance. It is quite uncommon for a record to not be accepted because the bird was obviously misidentified. More commonly, a record is denied acceptance because the material submitted to the TBRC was incomplete, insufficient, superficial, or just too vague to properly document the reported occurrence while eliminating all other similar species. Also, written documentation or descriptions prepared entirely from memory weeks, months, or years after a sighting are seldom voted on favorably by the TBRC. It is important that I stress here that the simple fact of not accepting any given record should by no means indicate that the TBRC or any of its members necessarily feels the record did not occur. The non-acceptance of any record simply reflects the opinion of the TBRC that the documentation, as submitted, did not meet the rigorous standards appropriate for adding data to the formal historical record. The TBRC makes every effort to be as fair and objective as possible regarding each record. If the committee is unsure about any particular record, it prefers to err on the conservative side and not accept a good record rather than validate a bad one. All records, whether accepted or not, remain on file and can be re-submitted to the committee if additional substantive material is presented.

Red-throated Loon (*Gavia stellata*). One (1989-78 in *Galveston* from 23 January–1 March 1975. One (1989-105) at Lake Texoma, *Grayson* on 19 January 1980.

Arctic/Pacific Loon (*Gavia arctica/pacifica*). One (1988-76) on 29 March and 1 April 1958 S of Port Aransas, *Nueces*. One (1989-79) at the Texas City Dike, *Galveston* from 11–23 January 1975. One (1989-80) at Galveston 29 April 1975. Red-necked Grebe (*Podiceps auritus*). One (1989-97) at Possum Kingdom Lake,

Palo Pinto on 25 November 1976. Two (1989-123) in Brazoria on 24 January 1981. One (1989-19) at Smith Point, Chambers on 7 March 1987.

Greater Shearwater (*Puffinus gravis*). One (1988-239) off Port Aransas, *Nueces* on 21 October 1978.

Audubon's Shearwater (*Puffinus lherminineri*). One (1988-201) off Port Aransas, *Nueces* on 13 March 1988.

Brown Booby (Sula leucogaster). A report of 170 (1989-152) off High Island, Galveston on 31 March 1989.

Glossy Ibis (*Plegadis falcinellus*). One (1989-153) at Anahuac NWR, *Chambers* on 9 May 1989.

Trumpeter Swan (Cygnus buccinator). A flock of eight (1989-21) over Brenham, Washington on 6 November 1988.

Muscovy Duck (Cairina moschata). One (1989-158) in Starr on 12 November 1987.

American Black Duck (*Anas rubripes*). Two (1989-60) at Anahuac NWR, *Chambers* on 12 February 1989. There has only been one unquestioned record of this species in Texas since 1937 despite many reports over the years. The extreme variability of Mottled Duck plumages is generally not fully appreciated by many field observers. Any report of American Black Duck must be documented carefully (hopefully by excellent photos or by specimen).

Barrow's Goldeneye (*Bucephala islandica*). One (1988-106) at a private ranch in *Brewster* on 16 March 1984.

Masked Duck (Oxyura dominica). Two (1989-157) at Santa Ana NWR, Hidalgo on 26 April 1983. Two (1989-189) at Aransas NWR, Aransas on 16 January 1988.

Snail Kite (Rostrhamus sociabilis). One (1988-39) at Port Lavaca, Calhoun on 26 April 1974.

Northern Goshawk (*Accipiter gentilis*). One (1989-136) at Lubbock, *Lubbock* on 20 December 1986. One (1988-237) at San Antonio, *Bexar* on 22 March 1988. One (1989-17) at GMNP, *Culberson* on 13 April 1988.

Common Black-Hawk (*Buteogallus anthracinus*). This species has been removed from the rarities Review List (see end of report) however documentation is still requested. One (1988-248) at BBNP, *Brewster* on 23 April 1983. One (1988-111) at Santa Ana NWR, *Hidalgo* on 21 December 1985. One (1988-181) near Lajoya, *Hidalgo* on 13 July 1986. One (1988-182) near San Manuel, *Hidalgo* on 8 March 1987. One (1988-296) near Lasara, *Willacy* on 23 December 1987.

Roadside Hawk (*Buteo magnirostris*). One (1989-156) at Salineno, *Starr* on 12 November 1987.

Swainson's Hawk (*Buteo swainsoni*). Although not on the Review List, the Texas Christmas Bird Count editor has requested the TBRC to review all records of this species submitted on CBC's. One (1989-56) at Waco, *McLennan* on 21 December 1987. One (1989-54) at Ruidosa, Presidio on 29 December 1987. Most descriptions of winter Swainson's Hawks that are submitted are quite superficial and do not allow the committee to vote in favor of them.

Aplomado Falcon (Falco femoralis). One (1988-193) in Hudspeth on 28 November 1980. One (1989-155) at Laguna Atascosa NWR on 14 November 1987. One (1989-96) near Post, Garza on 6 February 1989. This species has been removed from the Review List mainly due to the fact that a captive release program

in *Cameron* has clouded the situation concerning whether or not any particular bird could be a naturally occurring vagrant or a released bird. Documentation is still requested (see end of report).

Purple Sandpiper (*Calidris maritima*). One (1988-253) at Freeport, *Brazoria* from 7 March until 11 April 1976.

Ruff (*Philomachus pugnax*). One (1988-37) near Falfurrias, *Brooks* on 12 April 1975. One (1988-257) at High Island, *Galveston* on 13 April 1976. One (1989-68) in *Galveston* on 14 February and 24 March 1977. One (1989-119) in *Galveston* on 27 August 1978. Two (1988-26) near Winnie, *Chambers* on 29 April 1979.

Common Black-headed Gull (*Larus ridibundus*). One adult (1989-12) at Lake Waco, *McLennan* on 25 December 1988.

California Gull (*Larus californicus*). One adult (1988-109) at Corpus Christi, *Nueces* from 18 December 1977 until 5 January 1978. One first-winter bird (1988-117) on Mustang Island, *Nueces* on 12 February 1986. One first-winter bird (1989-103) at Lake Murvaul, *Panola* on 2 January 1989.

Thayer's Gull (*Larus thayeri*). One first-winter bird (1988-255) at Dallas on 24 January 1976. One first-winter bird (1988-121) at Corpus Christi, *Nueces* on 24 March 1980. Two first-winter birds (1988-79) at Bolivar Flats, *Galveston* on 6–7 April 1981. One second-winter bird (1989-115) near High Island in *Jefferson* on 25 April 1984. One first-winter bird (1988-225) at Corpus Christi, *Nueces* from 22 February until 3 March 1986. Four first-winter birds (1989-101) at Mountain Creek Lake, *Dallas* on 21 January 1989.

Lesser Black-backed Gull (*Larus fuscus*). One adult (1989-4) at Aransas NWR, *Calhoun* from 31 December 1988 until 9 February 1989. One probable third-winter bird (1989-83) at Corpus Christi, *Nueces* on 1–2 January 1989.

Glaucous Gull (*Larus hyperboreus*). One first-winter bird (1989-91) in Galveston on 20 April 1975.

Great Black-backed Gull (*Larus marinus*). One second-winter bird (1988-219) on Mustang Island, *Nueces* on 8 January 1981. One adult (1989-25) at Seadrift, *Calhoun* on 24 February 1989.

Elegant tern (Sterna elegans). One (1989-114) at Freeport, Brazoria from 17-30 July 1965.

Brown Noddy (*Anous stolidus*). Two (1988-73) at Port Aransas, *Nueces* from 19–22 June 1960.

Ruddy Ground-Dove (*Columbina talpacoti*). One female-plumaged bird (1988-124) at Santa Margarita Ranch, *Starr* on 13 January 1988. One male (1988-302) in northern *Hidalgo* from 29 April until 28 May 1988.

Northern Saw-whet Owl (*Aegolius acadicus*). One (1989-90) in Dallas on 7 December 1988.

Tropical Kingbird (*Tyrannus melancholicus*). One (1988-160) at Laguna Atascosa NWR from 8 January until 21 February 1988. If anyone could have tape recorded this calling bird the record may well have been accepted, but due to its visual similarity to Couch's Kingbird and the difficulty in describing its vocalizations the TBRC was not willing to accept this record as the second for Texas.

Clark's Nutcracker (*Nucifraga columbiana*). One (1988-74) at Cedar Bayou, *Liberty* on 7 November 1958.

Black-billed Magpie (*Pica pica*). One (1988-213) at BBNP, *Brewster* on 25 April 1988.

Black-capped Gnatcatcher (*Polioptila nigriceps*). One (1988-254) at Black Gap Wildlife Area, *Brewster* on 27 April 1985.

Clay-colored Robin (*Turdus grayi*). One (1988-195) at Rockport, *Aransas* from 16–24 March 1988.

Varied Thrush (Ixoreus naevius). One (1989-18) at GMNP, Culberson on 8 May 1988.

Yellow-green Vireo (Vireo flavoviridis). One (1989-121) at Lake Jackson, Brazoria on 2 June 1976.

Connecticut Warbler (*Oporornis agilis*). One (1988-15) at San Antonio, *Bexar* on 21 May 1987. One (1989-2) at Corpus Christi, *Nueces* on 10 October 1988.

Gray-crowned Yellowthroat (*Geothlypis poliocephala*). One (1988-175) at Falcon Dam, *Starr* on 15 February 1988. One (1989-86) at Santa Ana NWR, *Hidalgo* on 6 December 1988. One (1989-129) at Santa Ana NWR on 7 March 1989.

Crimson-collared Grosbeak (*Rhodothraupis celaeno*). One (1988-301) at Santa Ana NWR, *Hidalgo* on 17 December 1988.

Yellow Grosbeak (*Pheucticus chrysopeplus*). One (1989-160) at BBNP, *Brewster* on 18 May 1986.

Blue-black Grassquit (*Volatinia jacarina*). A flock of up to 16 (1988-247) at Black Gap Wildlife Area, *Brewster* from "late" August until 2 September 1982 and again on 26 November 1982. Three (1989-159) at BBNP, *Brewster* on 17 and 19 May 1986.

Worthen's Sparrow (*Spizella wortheni*). One (1989-154) at Bentsen SP, *Hidalgo* on 11 November 1987.

Streak-backed Oriole (*Icterus pustulatus*). One immature (1989-138) at Bentsen SP. *Hidalgo* on 22–23 April 1989.

White-winged Crossbill (*Loxia leucoptera*). One (1988-256) at Dallas on 24 September 1972.

TBRC Review List

The TBRC requests details, including descriptions and photos if possible, of all records of the following species.

Bull. Texas Ornith. Soc. 23(1&2): 1990

Review List A: Rarities. These species, in general, include birds that have occurred four or fewer times per year anywhere in Texas over a ten year average. The TBRC requests documentation for review for any record of the below species. The TBRC also requests details on any record of a species not yet accepted on the Texas State List.

Red-throated Loon, Pacific Loon, Yellow-billed Loon, Red-necked Grebe, Yellow-nosed Albatross, Greater Shearwater, Sooty Shearwater, Manx Shearwater, Audubon's Shearwater, Wilson's Storm-Petrel, Leach's Storm-Petrel, Band-rumped Storm-Petrel, Red-billed Tropicbird, Blue-footed Booby, Brown Booby, Red-footed Booby, Glossy Ibis, Jabiru, Greater Flamingo, Trumpeter Swan, Brant, American Black Duck, White-cheeked Pintail, Garganey, Eurasian Wigeon, Barrow's Goldeneye, Masked Duck, Snail Kite, Northern Goshawk, Crane Hawk, Roadside Hawk, Paint-billed Crake, Spotted Rail, Double-striped Thick-Knee, Northern Jacana, Eskimo Curlew, Surfbird, Purple Sandpiper, Curlew Sandpiper, Ruff, Long-tailed Jaeger, Little Gull, Common Black-headed Gull, Heermann's Gull, Mew Gull, California Gull, Thayer's Gull, Lesser Black-backed Gull, Western Gull, Glaucous Gull, Great Black-backed Gull, Black-legged Kittiwake, Sabine's Gull, Elegant Tern, Bridled Tern, Brown Noddy, Black Noddy, Ruddy Ground-Dove, Mangrove Cuckoo, Snowy Owl, Northern Pygmy-Owl, Mottled Owl, Northern Saw-whet Owl, White-collared Swift, Green Violet-ear, Mango Species, Broad-billed Hummingbird, White-eared Hummingbird, Violet-crowned Hummingbird, Antillean Crested Hummingbird, Costa's Hummingbird, Allen's Hummingbird, Elegant Trogon, Lewis' Woodpecker, Ivory-billed Woodpecker (presumed extirpated in Texas), Greenish Elaenia, Greater Pewee, Dusky-capped Flycatcher, Tropical Kingbird, Thick-billed Kingbird, Gray Kingbird, Forktailed Flycatcher, Sulphur-bellied Flycatcher, Rose-throated Becard, Gray-breasted Martin, Clark's Nutcracker, Black-billed Magpie, American Dipper, Clay-colored Robin, Rufous-backed Robin, Varied Thrush, Aztec Thrush, Black Catbird, Bohemian Waxwing, Gray Silky-flycatcher, Black-whiskered Vireo, Yellow-green Vireo, Yucatan Vireo, Connecticut Warbler, Gray-crowned Yellowthroat, Redfaced Warbler, Golden-crowned Warbler, Rufous-capped Warbler, Crimson-collared Grosbeak, Blue Bunting, Henslow's Sparrow, Golden-crowned Sparrow, Yellow-eyed Junco, Snow Bunting, Blackvented Oriole, Pine Grosbeak, White-winged Crossbill, Common Redpoll, Lawrence's Goldfinch.

Review List B: Species under special study by sub-committee of TBRC concerning their distribution and status in Texas. Records of these species will not be formally reviewed by the TBRC (however, any reports of these species that were already logged into the TBRC files prior to 3 March 1990 will be reviewed by the TBRC and reported in the annual report), but documentation is requested to assist in these studies.

Clark's Grebe, Cory's Shearwater, Muscovy Duck, Common Black-Hawk, Aplomado Falcon (reintroduction program in progress), Pomarine Jaeger, Parasitic Jaeger, Spotted Owl, Williamson's Sapsucker, Northern Shrike, Baird's Sparrow.

SHORT COMMUNICATIONS

Recent Literature About Texas Birds

Department of Wildlife and Fisheries Sciences, Texas A&M University College Station, Texas 77843

1988

- Alisauskas, R. T., C. D. Ankney, and E. E. Klaas. 1988. Winter diets and nutrition of mid-continental Lesser Snow Geese. J. Wildl. Manage. 52(3):403-414. Includes data on diets of wintering geese feeding in rice fields on Garwood Prairie.
- Baldassarre, G. A., E. E. Quinlan, and E. G. Bolen. 1988. Mobility and site fidelity of Green-winged Teal wintering on the southern High Plains of Texas. Pp. 483-493 in Waterfowl in winter (M. W. Weller, ed.).
- Banks, R. C. 1988. Geographic variation in the Yellow-billed Cuckoo. Condor 90(2):473-477. Texas birds included in wing and bill measurements of birds from 19 geographic samples; establishes a potential intermediate population between the 2 subspecies recognized by Oberholser.
- Bergstrom, P. W. 1988. Breeding biology of Wilson's Plovers. Wilson Bull. 100(1):25–35. Comprehensive nest study revealed low hatching success with nest failures associated with rain, mammal predation, and cattle; no double brooding.
- Bergstrom. P. W. 1988. Breeding displays and vocalizations of Wilson's Plovers. Wilson Bull. 100(1): 36–49. Compares plovers from Matagorda Island with Virginia plovers and other plover species.
- Boydstun, C. P, and C. A. DeYoung. 1988. Movements of White-tipped Doves in southern Texas. Southwest. Nat. 33(3):365-367. Quantified movements in native subtropical woodland and citrus orchard habitats in Hidalgo County.
- Brown, C. R. 1988. Social foraging in Cliff Swallows: local enhancement, risk sensitivity, competition and the avoidance of predators. Anim. Behav. 36(3):780-792. Includes observations at Lake Texoma, Grayson County; found social foraging increased foraging success over individual foraging.
- Burger, J. 1988. Foraging behavior in gulls: Differences in method, prey, and habitat. Colonial Waterbirds 11(1):9-23. Examined foraging behavior of 15 species of North American gulls; samples included Ring-billed, Herring, and Laughing Gulls in Texas.
- Cain, B. W. 1988. Wintering waterfowl habitat in Texas: shrinking and contaminated. Pp. 583-596 in Waterfowl in winter (M. W. Weller, ed.).
- Cain, F. 1988. First Texas panhandle record for Garganey. Bull. Okla. Ornithol. Soc. 21(3):18. Description of male seen 22 November 1985.
- Campo, J. J., B. Thompson, J. C. Barron, P. P. Durocher, and S. J. Gutreuter. 1988. Feeding habits of Double-crested Cormorants wintering in Texas. Texas Parks and Wild. Dept. 32 pp. Analysis of stomach contents of 494 cormorants collected in East and Central Texas included 29 fish species; males and adults ate larger fish than females and juveniles, respectively.
- Carignan, J. M. 1988. Predation on Rufous Hummingbird by praying mantid. Tex. J. Sci. 40(1): 111. Adult female mantid observed in Brewster County chewing on neck of male Rufous Hummingbird which responded to attack by going into torpor.
- Castle, M. D., B. M. Christensen, and T. E. Rocke. 1988. Hematozoan parasites of Rio Grande Turkeys from southern Texas. J. Wildl. Dis. 24(1):88-96. Samples from 300 turkeys revealed 76% infected with *Haemoproteus meleagridis* and 41% infected with *Plasmodium* spp.
- Chapman, B. R. 1988. History of the White Pelican colonies in South Texas and northern Tamaulipas. Colon. Waterbirds 11(2):275-283. Review of the historical record through 1987 and discussion

- of factors relative to reproductive success in the Laguna Madre colonies in Texas and Tamaulipas.
- Cooke, F., D. T. Parkin, R. F. Rockwell. 1988. Evidence of former allopatry of the two color phases of Lesser Snow Geese (*Chen caerulescens caerulescens*). Auk(3):467-479. Phases merged due to winter feeding on rice-growing areas of inland Texas; interbreeding with no reduced fitness.
- Custer, T. W. 1988. Egg size and laying order in Black-crowned Night-Herons, Snowy Egrets, and Great Egrets, Colon. Waterbird Soc. Newsl. 12(2):26. Abstract only.
- Davis, W. J. 1988. Acoustic communication in the Belted Kingfisher: an example of temporal coding. Behaviour 106(½):1-24. Studied associations between call structure and function in kingfisher vocalizations in Ohio and Travis County, Texas; includes sonographs and message content.
- Dronnen, N. O., G. D. Schmidt, B. R. Allison, and J. W. Mellen. 1988. Some parasitic helminths from the American Oystercatcher, *Haematopus palliatus* Temminck, from the Texas gulf coast and the Common Pied Oystercatcher, *H. ostralegus* Linnaeus, from New Zealand, including *Dildotaenia latovarium* N. Gen. and N. Sp. (Cestoda: Hymenolepididae). J. Parasitol. 74(5): 864–867. First report of *Acanthoparyphium spinulosun* from oystercatcher; specimen from Galveston, Texas.
- Farquhar, C. C. 1988. Ecology and breeding behavior of the White-tailed Hawk. Natl. Wildl. Fed. Sci. Tech. Ser. No. 11. p. 306-315.
- Fedynich, A. M., and R. D. Godfrey, Jr. 1988. Waterfowl mortality surveys on the southern High Plains of Texas. Southwest Nat. 33(2):185–191. Carcasses collected on 15 playa lakes in winter showed mortality was not sex or age specific and avian cholera major cause of non-hunting mortality.
- Gehlbach, F. R. 1988. Population and environmental features that promote adaptation to urban ecosystems: the case of Eastern Screech-Owls (*Otus asio*) in Texas. Proc. Int. Ornithol. Congr. 19:1809–1813.
- Gehlbach, F. R. 1988. Avian biotic provinces of the Texas-Mexican borderlands: new techniques for synthetic resource assessment and mapping. Southwest. Nat. 33(2):129-136. Principal components analysis of selected attributes of breeding birds and natural landscape, climatic, and cultural factors.
- Godfrey, R. D., Jr., and A. M. Fedynich. 1988. Incidental capture of a Northern Harrier (*Circus cyaneus*) in a mammal trap. J. Raptor Res. 22(2):65.
- Guthery, F. S. 1988. Line transect sampling of Bobwhite density on rangeland: evaluation and recommendations. Wildl. Soc. Bull. 16(2):193-203. Observation from >2000 flushings from >6000 km of transects in 9 areas of Texas; line transects reliable method of estimating density.
- Guthery, F. S., N. E. Koerth, and D. S. Smith. 1988. Reproduction of Northern Bobwhites in semiarid environments. J. Wildl. Manage. 52(1):144-149. Studies on Rio Grande Plains showed length of reproductive season and number of females laying decrease as climate becomes hotter and drier.
- Haig, S. M., and L. W. Oring. 1988. Distribution and dispersal in the Piping Plover. Auk 105(4): 630–638. Winter recoveries of 91 individually color banded birds included 26 recovered on the Texas coast.
- Hammons, R. L., M. R. Huges, and R. R. Moldenhauer. 1988. Body water and water flux in fresh water and sea-water acclimated Clapper Rails, Rallus longirostris. Comp. Biochem. Physiol. 91A:539-591. Acclimation slightly reduced water flux but body water not affected; physiological response like other birds with salt glands.
- Henny, C. J., K. E. Riddle, and C. S. Hulse. 1988. Organochlorine pollutants in plasma of spring migrant Peregrine Falcons from coastal Texas, 1984. Pp. 423-427 in Peregrine Falcon populations. Their management and recovery (T. J. Cade, J. H. Enderson, C. G. Thelander, and C. M. White, eds.)
- Hinojos, J. G., and A. G. Canaris. 1988. Metazoan parasites of *Himantopus mexicanus* Muller (Aves) from southwestern Texas, with a checklist of helminth parasites from North America. J. Parasitol. 74(2):326–331. Seven species of arthropod ectoparasites and 19 helminth species were found.
- Hunt, W. G., J. H. Enderson, D. Lanning, M. A. Hitchcock, and B. S. Johnson. 1988. Nesting peregrines in Texas and northern Mexico. Pp. 423–427 in Peregrine Falcon populations. Their management and recovery (T. J. Cade, J. H. Enderson, C. G. Thelander, and C. M. White. eds.).

- Hunt, W. G., and F. P. Ward. 1988. Habitat selection by spring migrant peregrines at Padre Island,
 Texas. Pp. 423-427 in Peregrine Falcon populations. Their management and recovery (T. J. Cade, J. H. Enderson, C. G. Thelander, and C. M. White, eds.)
- Hunter, W. C., R. D. Ohmart, and B. W. Anderson. 1988. Use of exotic saltcedar (*Tamarix chinensis*) by birds in arid riparian systems. Condor 90(1):113-123. Compared avian use of saltcedar along Pecos River and Rio Grande River; examines possible explanations for differences in use.
- Johnson, D. B. and F. S. Guthery. 1988. Loafing coverts used by Northern Bobwhites in subtropical environments. J. Wildl. Manage. 52(3):464-469. Examined structural characteristics, seasonal trends in characteristics, and attributes of coverts selected by bobwhites in southern Texas.
- Johnson, R. R., and L. T. Haight. 1988. Avian use of xeroriparian systems in the Big Bend region, Texas. Chihuahuan Desert Res. Inst., Alpine, Texas. 9 pp.
- Koerth, N. E., and F. S. Guthery. 1988. Reliability of body fat indices for Northern Bobwhite populations. J. Wildl. Manage. 52(1):150-152. Found mean percent wing fat did not reflect mean percent body fat; winter mean gizzard fat reliable for comparing differences in body fat among populations.
- Kopeny, M. T. 1988. White-tailed Hawk. Natl. Wildl. Fed. Sci. Tech. Ser. No. 11. p. 97-104.
- Lasley, G. W., C. Sexton, and D. Hillsman. 1988. First record of Mottled Owl (*Ciccaba virgata*) in the United States. Am. Birds 42(1):23-24. Description of a road-killed specimen near Bentsen-Rio Grande State Park, Hidalgo County, in 1983; accidental transport from Mexico unlikely.
- Martin, R. F., and D. Hector. 1988. Nest lining with sheep wool: potential negative effects on Cave Swallows. Wilson Bull. 100(2):294–296. Use of wool in nests lengthens the incubation period possible due to decreased contact with brood patch, difficulty in turning eggs, and hatch synchronizing communication interference.
- Maxwell, T. C., D. E. Madden, and R. C. Dawkins. 1988. Status of Le Conte's Sparrow, Ammodramus Leconteii (Emberizidae), wintering in western Texas. Southwest. Nat. 33(3):373–375. Avifaunal mist net surveys indicated species more regular and common in migration and winter in West Texas than previous records indicate.
- McKenzie, P. M., P. J. Zwank, and E. B. Moser. 1988. Mottled Duck population trends based on analyses of Christmas Bird Count Data. Am. Birds 42(3):512-516. No apparent trends apparent in Florida, Louisiana, and Texas populations.
- McMillen, J. L. 1988. Conservation of North American cranes. Am. Birds 42(5):1213-1221. Discusses population sizes, histories, captive propagation, reintroduction attempts, and habitat preservation for Sandhill Cranes and Whooping Cranes.
- Millsap, B. A., and R. R. Johnson. 1988. Ferruginous Pygmy-Owl. Natl. Wildl. Fed. Sci. Tech. Ser. No. 11. p. 137-139.

A Herring Gull Nest in Texas

Mike Farmer

National Audubon Society, P.O. Box 5052, Brownsville, Texas 78523

The Herring Gull (Larus argentatus) is a circumboreal breeder (Oberholser 1974) in the Northern Hemisphere, with its traditional North American breeding range extending from the Arctic coast, south to the Great Lakes, and along the northern Atlantic coast. During this century, this species appears to have extended its nesting range along the Atlantic coast from Maine (Bent 1921) to the coastal islands of North Carolina (Drury and Kadlec 1974). At present, Herring Gulls are increasing every year as a breeder in North Carolina, and some continued southward spread is expected (fide H. E. LeGrand, Jr., Southern Atlantic coast regional editor, American Birds). Oberholser (1974) also reported that nonbreeding Herring Gulls are known to irregularly oversummer on the Texas coast.

On 3 June 1989, Bill Graber, Sharon Bartels, Arnold Moorhouse and I found a Herring Gull nest on a dredged-material spoil island (colony 618-180, Texas Colonial Waterbird Society 1982) in the lower Laguna Madre near Green Island. This spoil island is relatively large for the lower Laguna Madre and supports a diverse group of colonial nesting waterbirds, including approximately 1,200 pair of nesting Laughing Gull (*Larus atricilla*).

The Herring Gull nest had been placed on a rather small (200 m²) rise, the highest part of which was not over one meter above mean high tide. The nest was placed on the edge of the rise in a relatively unvegetated area. This particular rise supported a small colony consisting of six nests of Tricolored Heron (*Egretta tricolor*), two nests of Reddish Egret (*Egretta rufescens*) and 12 nests of Laughing Gull. The nest was apparently being incubated by an adult which quickly left the nest at our approach. The nest, itself, consisted of a shallow depression in the clayey soil. Pieces of dried Sea Ox-eye Daisy (*Borrichia frutescens*) had been placed around the lip of the depression and two eggs had been laid directly on the soil at the bottom of the depression. The eggs, measuring approximately 70 × 48 cm, were light olive with rather bold brownish spots.

During subsequent visits, a pair of adults were consistently seen attending the nest. Finally on 24 June, a young Herring Gull chick, not more than a week old, was present at the nest site. The other egg was found to be infertile and has since been deposited in the Texas Cooperative Wildlife Collections at Texas A&M University (TCWC E-143). On and after 2 July, neither the chick nor the adults could be relocated. In all, the adults were present from mid-April to the first week of July.

This represents the first record of a Herring Gull nest in Texas and, if successful, would have been quite a geographic leap for the known nesting range of this species. Is this a one time event? Maybe not. In 1988, I regularly recorded an oversummering breeding plumaged adult in the area of this year's nest. Whether this individual was one of the birds involved in this year's nest attempt is unknown. However, Tinbergen (1960) reported a good deal of site tenacity for the nesting

Bull. Texas Ornith. Soc. 23(1&2): 1990

Herring Gull. South Texas has several open municipal landfills of the type that may influence the spread of this species elsewhere. Therefore, we might expect another nest attempt next year by this same pair.

Herring Gulls can significantly affect other colonial nesting waterbirds by direct predation on eggs and young (Myers 1989) and indirectly by displacement of nest sites (Crowell and Crowell 1946; Erwin et al. 1981). Individuals involved in the conservation of colonial nesting waterbirds should closely monitor establishment of breeding colonies of the larger predatory gulls, including the Herring Gull.

Acknowledgments

I wish to thank Dr. Keith Arnold and Raymond Neck for their helpful suggestions during the review of this note.

Observation of a White-tailed Hawk Pirating from and Talon-grappling with a Swainson's Hawk

Paul C. Palmer

Department of History, Texas A&I University Kingsville, Texas 78363

In the late afternoon of 14 August 1988 Nancy B. Palmer and I saw an adult Swainson's Hawk (*Buteo swainsoni*) perched on the ground in a plowed field approximately 1.5 km west of US 77 on FM road 772 in Kleberg County, Texas. When I approached to within 50 m, the bird flew, carrying a small mammal, apparently a rodent, in its talons. The raptor perched on the cross-member of a utility pole near the road; the bird was then some 10 m above the ground and

Bull. Texas Ornith. Soc. 23(1&2): 1990

probably not more than 20 m from me. I took three photographs, but when I attempted to move closer, the bird flew again with the rodent dangling from its talons. When the Swainson's had flown about 20 m from the pole, an adult White-tailed Hawk (*B. albicaudatus*), which we had not previously noticed, suddenly closed with it and grabbed for the rodent. The two birds appeared to hook talons; they tumbled briefly, making one complete rotation around a common center-of-gravity. The prey fell.

As it fell, the birds immediately disengaged from each other, and both dropped quickly to the ground. The White-tailed Hawk landed nearer the rodent and took possession of it. The Swainson's settled about 20 m away. Neither moved for several minutes; the Swainson's showed no inclination to attempt to recapture its lost prize. When it became clear there was no prospect for further photographs, we left them eyeing each other warily in the field.

There is no mention of talon-grappling by either of these species in Brown and Amadon (1968), Palmer (1988) or Kopeny (1988). Bent (1937) cites a 1919 report by J. A. Murro of Swainson's Hawks in British Columbia grappling with each other in this manner. I know of no record of talon-grappling by the Swainson's Hawk with members of any other species.

Several incidents of White-tailed Hawks pirating or attempting to pirate prey from other raptors have been reported. Actual and intended victims have included the Northern Harrier (*Circus cyaneus*) (Farquhar 1986, Kopeny 1988), Crested Caracara (*Polyborus plancus*) (Kopeny 1988), Black-shouldered Kite (*Elanus caeruleus*) (Heredia and Clark 1984) and other White-tailed Hawks (pers. observations).

There does not appear to be any previous record in the ornithological literature of a White-tailed Hawk taking prey items from Swainson's Hawks.

Acknowledgments

I thank Nancy B. Palmer for helping with this observation, Professor Allan H. Chaney for sharing his correspondence, and Mark Kopeny and Craig Farquhar for sharing information from their field research on the White-tailed Hawk. Thanks also to William S. Clark and R. N. Conner for their comments on earlier drafts.

Pied-billed Grebe Mistakes Barn Roof for Surface Water

Kent Rylander

Department of Biological Sciences, Texas Tech University, Lubbock, Texas 79409

Pied-billed Grebes (*Podilymbus podiceps*) have been found stranded on highways after rains (Auk 75:473–474, 1958). Presumably they mistook the wet pavement for suitable surface water and were unable to take flight because there was an insufficient stretch of water for taxiing.

On 21 April 1990 I was shown an adult Pied-billed Grebe in nuptial plumage that had landed, during a mild rainstorm, on the roof of a barn near Lubbock, Texas. The nearest surface water is a playa lake about one mile away.

The barn had a single, slightly sloping metal roof that was $18 \text{ m} \times 10 \text{ m}$. The bird was assumed to have been on the roof from about 3:30 to 4:05 p.m. (the duration of the storm), when it lost its hold and slid to the ground. It was observed on the roof by the landowners, who asked me to visit the site and identify the bird.

This grebe apparently mistook the wet roof for surface water, a surprising error since the roof was approximately 7 m above ground and presumably would appear to flying birds as a conspicuous, elevated structure, even during a rainstorm.

The apparent vulnerability of adult grebes to being stranded on metal roofs raises the question of how many grebes (including young left in the nest) might die in this part of Texas as the result of the thousands of metal barns that dot this flat landscape. The landowners who reported this occurrence are not typical of the rural residents of this region, very few of whom have sought the identification of wounded, incapacitated or dead birds on their farms and ranches.

The frequency of such accidents may be greater at this season because the spring rains have just begun and many of the numerous playa lakes of the area, where this species nests, are still without water.

NOTES AND NEWS

Information for Contributors

ATTENTION AUTHORS.—The Bulletin of the Texas Ornithological Society is a semi-annual journal which publishes original research reports and short communications in the field of ornithology. Articles on a wide range of subjects are accepted, including documentation of new Texas records, interpretations of laboratory and field studies, historical perspectives on Texas ornithology, and developments in theory and methodology. Although the emphasis is on Texas birds, the Bulletin accepts papers which advance the knowledge of birds in general.

Manuscripts, including tables, should be typed and double-spaced on one side of $8\frac{1}{2} \times 11$ inch $(22 \times 28 \text{ cm})$ white paper. Allow 3 cm margins on all sides. Manuscripts may be printed using a high-resolution dot-matrix or letter-quality printer. The last name of the first author must be at the top of each page of the manuscript and on the back of every figure. Submitted articles should follow the format observed in this and subsequent issues of the *Bulletin of the Texas Ornithological Society*. Feature articles should include an abstract and a "Literature Cited" section. Short Communications do not need an abstract.

Scientific and common names of North American birds must follow the 1983 A.O.U. Check-list and supplements. The 24-hour clock (0730), the continental dating convention (3 January 1989), and the metric system should be used.

Submit an original and two complete copies of the manuscript. Each manuscript will be subject to editing and will normally be reviewed by at least two persons who are knowledgeable in the subject. The reviewers will provide the editor with advice on the article's acceptability and accuracy. If the article passes review and is correct in form, it will be scheduled for publication. A voluntary page charge of \$35 per printed page will be assessed. Payment of complete page charges will normally result in earlier publication. Accepted articles will be published on a "space available" basis if the page charges are not paid. Authors will be sent proofs of their articles prior to the final printing; information on ordering reprints will be supplied at that time.

Articles, reports and other items submitted for inclusion in the *Bulletin* should be sent to the editor, Karen L. P. Benson, Department of Wildlife & Fisheries Sciences, Texas A&M University, College Station, Texas 77843-2258.

ARTISTS.—The *Bulletin* encourages submission of original artwork and photographs of Texas birds to be used on the inside front cover of the publication. Send art and photos to Karen L. P. Benson, Department of Wildlife & Fisheries Sciences, Texas A&M University, College Station, Texas 77843-2258.

ACKNOWLEDGMENT.—The following people critically reviewed one or more manuscripts submitted for publication in Volumes 22–23:

Keith A. Arnold, Robert H. Benson, Gene Blacklock, Stanley D. Casto, Richard N. Conner, Ted L. Eubanks Jr., Mike Farmer, Susan M. Haig, Greg W. Lasley, Raymond Neck, Brent Ortego, L. Karolee Owens, Paul C. Palmer, Jed J. Ramsey, Kenneth Seyffert, Frances Williams.
