July 1950

JEFF GILL'S IMPROVED SPARROW TRAP - continued from last issue.

**IMPROVED SPARROW TRAP**

**End View**

**STEP TWO:** Construct center unit separately and paint black if desired. Y" is a piece of 
\(\frac{1}{2}\) mesh hardware cloth 15" high and 22" wide. Unravel one or two strands of this wire so that the finish is 16" x 20" with an inch fringe on all four sides like the drawing below:

\(\text{Y}''\) is a piece of \(\frac{1}{2}\) mesh hardware cloth 22" x 11\(\frac{1}{2}\)". Make fringes around so that the finish is 20" x 10". On one 20" side there will be a \(\frac{1}{2}\)" fringe - this weaves into the mesh of \(\text{Y}''\) as shown after bending as shown in the drawing on the right below. After \(\text{Y}''\) is fast to \(\text{Y}''\) put in the center partition.

\(\text{Z}''\) is a piece of \(\frac{1}{2}\) mesh hardware cloth 13\(\frac{1}{2}\)" x 22" - the long edge with the \(\frac{1}{2}\)" fringe weaves into \(\text{Y}''\) after bending as shown, then place the two partitions in six inches from each end.
