I can also record from Minneapolis, Leucosticte tephrocotis littoralis, a male of which was taken by a young collector on Jan. 3, 1889. It was shot from among a flock of Snow Buntings. I examined the specimen and compared it with one from Colorado collected in April. It was a shade darker than the Colorado bird.—Geo. G. Cantwell, Minneapolis, Minn.

Notes from Wyoming.—While taking field notes on migration of birds during the spring just passed I have been fortunate in finding a few species beyond what appears to be their known eastern or western limit. My record is as follows:—

April 14, Carpodacus mexicanus frontalis, one individual, a male, and also Agelaius gubernator, one male bird in flock of A. phaniceus.

May 23, Dendroica pensylvanica, one male.

May 25, Micropalama himantopus, two birds, possibly a pair.

May 28, Piranga erythromelas, one male.

On June 11, a pair of Carpodacus mexicanus frontalis were found breeding one mile west of Cheyenne. The nest was close up under the eaves of a log house, upon the projecting end of a log. The female, nest, and eggs were brought to me for identification. — Frank Bond, Cheynne, Wyoming.

NOTES AND NEWS.

EUGEN FERDINAND VON HOMEYER, a distinguished ornithologist, and a Corresponding Member of the A. O. U., died at Stolp, Pomerania, May 31, 1889, in the eightieth year of his age, he having been born at Heerdin, near Auklam, Nov. 11, 1809. His principal works were 'Systematische Uebersichtder Vögel Pommerns,' 1837, and Supplement to the same, 1841; 'Beiträge zur Kentniss der Vögel Ostsibiriens und des Amurlandes' (J. f. O., 1868-70); and 'Die Wanderungen der Vögel mit Rücksicht auf die Zuge der Saugethiere, Fische und Insecten', 1881. He was also the author of a long list of important special papers, relating mainly to the birds of the Palæarctic Region, of which he possessed a very rich collection. He was for some years president of the Ornithological Society of Berlin.

THE SEVENTH CONGRESS of the American Ornithologists' Union will be held at the American Museum of Natural History, 77th Street and 8th Avenue, New York City, beginning Tuesday, November 12, 1889. Besides the usual routine of business, and action on important proposed amendments to the 'By-Laws' of the Union, many scientific papers will be presented. A large attendance of both Active and Associate Members is expected. As already announced (Auk, VI, pp. 82, 208) a new feature
