## GENERAL NOTES.

**The Yellow-legs (*Totanus flavipes*) Breeding in Ontario County, N. Y.**—A pair of Yellow-legs (*Totanus flavipes*) remained this season and bred in a wet pasture in company with Killdeers (*Ægialitis vocifera*) and Spotted Sandpipers (*Actitis macularia*). I do not know of any former record of their breeding in the County. The owner of the pasture, who is somewhat of a sportsman, and who first called my attention to the birds, would not permit their being disturbed, as he was anxious that they should make it a regular breeding ground. I repeatedly saw the birds at close quarters and fully identified them. During the latter part of June I noticed four young accompanying the parents who permitted of much closer approach than formerly. The young were about half grown and I endeavored to catch one of them but they eluded pursuit and finally escaped into a swamp close at hand.—B. S. BOWDISH, *Phelps, N. Y.*

**The Turkey Vulture (*Cathartes aura*) in Ontario County, N. Y.**—July 3 Charles Donnelly, a young sportsman of this place, shot a Turkey Vulture (*Cathartes aura*) which was one of a flock of eight, seen in the vicinity of a marshy wood. On the 5th the bird was presented to me, and although in poor condition—being badly shot—was preserved as a good specimen. The bird is a female. The flock remained in the vicinity the entire afternoon, but the next morning were gone, and none have been seen since. This is, so far as I know, the first record of the bird being taken in the County.—B. S. BOWDISH, *Phelps, N. Y.*

**An Abnormal Specimen of *Coccyzus maynardi*.**—A peculiar example of what is probably *Coccyzus maynardi* has been lately received from Inagua, Bahamas. The bird has the general appearance and marking of *C. maynardi*, but the head, neck, and underparts are plumbeous gray, and the back and upper tail-coverts ash-gray. The quills are pale brown and the tail-feathers black, which, with the exception of the two central feathers are tipped with white. The bird, a female, was taken near North-west Point, Inagua, May 28, 1891. — CHARLES B. CORY, *Boston, Mass.*
