

Bird=Lore

for 1901 will be enlarged one fourth.

BIRD-LORE'S special aim during the coming year will be to assist teachers and students of birds by telling them just what to teach and just what to study at the proper season. It will, therefore, publish a series of articles, by authorities, on the birds of a number of localities from the Atlantic to the Pacific, including the vicinity of Boston, New York, Philadelphia, Chicago and San Francisco, in which the more important events in the bird-life of each month will be pointed out, and lists of the birds of the month be given. To these will be added 'Suggestions for the Months' Study' and 'Suggestions for the Months' Reading.' Under the former attention will be called to the more characteristic phases of the bird-life of the year as they are controlled by season, such subjects as migration, mating, singing, nesting, molting, etc., being considered in their due time. Under the latter, references will be given to the natural history literature of the season. The whole thus forms a definite plan of study which, it is believed, will be of the utmost value to the instructor, to the independent observer, and to bird-clubs and natural history societies. In this connection much assistance will be rendered by BIRD-LORE'S *Advisory Council*, composed of over fifty prominent ornithologists, residing throughout the United States and Canada, who have consented to respond to requests for information and advice.

While a number of the more general articles for the year will bear on the month's subject for study, as, for instance Dr. Dwight's paper on 'How Birds Molt,' there will also be contributions of wide popular interest, among the more important of which may be mentioned an address on Audubon, by Dr. Elliot Coues; letters written by Audubon in 1826; John Burroughs' list of his rarer bird visitors; Frank M. Chapman's fully illustrated account of a bird-nesting expedition with this genial naturalist; Ernest Seton-Thompson's 'How to Know the Hawks and Owls' (illustrated); Tudor Jenks' 'From an Amateur Point of View'; T. S. Palmer's 'Ostrich Farming in America' (illustrated); F. A. Lucas' 'Birds of Walrus Island,' with remarkable illustrations; H. W. Henshaw's 'Impressions of Hawaiian Birds'; C. Will Beebe's illustrated account of some of the birds under his charge at the New York Zoölogical Garden, and an important paper on 'Bird Protection in Great Britain,' by Montagu Sharpe, chairman of the English Society for the Protection of Birds.

Increased space will be devoted to reviews of current literature, the ornithological magazines coming in for their share of attention; Dr. J. Dwight, Jr., reviewing 'The Auk,' Dr. A. K. Fisher, 'The Osprey' and 'Wilson Bulletin,' and Dr. T. S. Palmer, 'The Condor.'

Annual Subscription, \$1.00; Single numbers, 20 cents.

Volumes I and II can still be had at \$1.00 each.

Send 2 cent stamp for a specimen copy.

Subscribers to Vol. III, 1901, beginning with No. 1, Feb. 1, 1901, will receive, free, a copy of the December, 1900, number containing the first articles in the year's series on 'Birds and Seasons.'

Members of the A. O. U. will also receive, free, a copy of the October, 1899, number containing the group photograph of the twenty-five Founders of the Union, and history of the organization of the Union by Dr. J. A. Allen.

in Bird Study and Photo-
graphy is marked in

**The Home Life
of Wild Birds**

Its method of study is revolutionary. Its hundred and forty-one illustrations are from life, photographed at a distance of about two feet from the nest, and form the most interesting series of bird pictures ever published. Such short range photography has never before been heard of. Mr. Herrick has noted and pictured every movement of scores of bird families at home, their growth and history. This remarkable book gives a new authoritativeness to the science, and a new delight to lovers of birds.

By FRANCIS H. HERRICK, of the Department of Biology, Adelbert College.
Frontispiece in photogravure. Quarto, \$2.50 net. Send for descriptive circular.

Every Ornithologist

should find the past and present publications of the Cooper Ornithological Club of California, of greatest interest and value. The proceedings of this live Western Club consist of two series:

THE CONDOR,

A 24-page bi-monthly, illustrated magazine, issued on the fifteenth of each alternate month, and aimed to fill the field of an up-to-date bird journal, publishing articles of special interest to technical ornithologists, nidologists and active field workers generally. The two volumes thus far completed outline the journal's policy and scope for the future, and it can safely be assumed the **THE CONDOR** for 1901 will eclipse its previous record in extent and value of material published.

Vol. I (1899), \$2; Vol. II (1900), \$1.; Current Volume, \$1.

PACIFIC COAST AVIFAUNA NO. 1,

"Birds of the Kotzebue Sound Region, Alaska," by Joseph Grinnell. A large octavo 80-page publication, embracing an accurate, detailed and interesting narrative of the author's experiences among the birds of the Far North, during a year's sojourn north of the Arctic circle. The biographies of the 113 species and subspecies of birds treated in the paper are unusually valuable, and the paper is accompanied by a 3-page map of the region.

A sample copy of 'The Condor' will be mailed on application. Address all subscriptions and communications to
