

experience of most of us, but we have long desired just such a vivid and intimate picture of this wonderful tropic country as Capt. Beebe has given us.

The title of the little book is explained in the first chapter. The author had played his part in the great struggle that has just come to a close in Europe and after the horrors of war he says "the mind seeks amelioration — some symbol of worthy content and peace — and for my part I turn with all desire to the jungles of the tropics. . . . The peace of the jungle is beyond all telling."

The chapters entitled, 'Sea-wrack' and 'Islands,' cover the voyage to British Guiana with visits to the Lesser Antilles and Barbados; while the others: 'The Pomeroun Trail,' 'A Hunt for Hoatzins'; 'Hoatzins at Home'; 'A Wilderness Laboratory'; 'The Convict Trail'; 'With an Army of Ants "Somewhere" in the Jungle', and 'Jungle Night,' treat of the Bartica District, British Guiana, and that on 'A Yard of Jungle' relates to Para at the mouth of the Amazon. All but three of the chapters have appeared in 'The Atlantic Monthly' and the many who enjoyed reading them there will be glad to have them brought together in the handy volume.— W. S.

Riley on a Collection of Birds from Northeastern Siberia.¹— Mr. Copley Amory, Jr., accompanied the Koren Expedition to the Kolyma River region of northeastern Siberia in 1914 and obtained 228 specimens of birds and a few eggs which were all presented to the National Museum and are here reported upon by Mr. Riley. As Thayer and Bangs had already described a collection made by Mr. Koren on a previous expedition to the same region it was not to be expected that any new forms would be included in the present material, but many notes of interest on plumage and relationship are presented as well as some field notes by Mr. Amory. Seventy-six species are listed and of all but one of these specimens were obtained.— W. S.

Shufeldt on the Skeleton of the Kea Parrot.²— Dr. Shufeldt has had the opportunity of studying the skeleton of a specimen of *Nestor notabilis* recently received at the National Zoölogical Park, in a shipment of nine individuals presented by the New Zealand Government, this individual having died en route. He has prepared ten admirable photographs showing all the portions of the skeleton, and these have been excellently reproduced. There is also a detailed description of the bones, covering thirteen pages, in which there is occasional comparison with *Ara chloroptera* and *Amazona* and with Mivart's figure of the tongue of *Lorius flavopalliatus*.
