

DR. CHARLES GORDON HEWITT,<sup>5</sup> aged 35, died at Ottawa, Canada, February 29, 1920.

ROBERT LENOX MAITLAND<sup>6</sup> died in his 66th year at New Rochelle, N. Y., March 11, 1920.

MISS CAROLINE GRAY SOULE, of Brookline, Mass., died April 27, 1920.

MISS FANNIE HUBERTA FOOTE, of Yonkers, N. Y., died 1920.

HORACE WINSLOW WRIGHT,<sup>7</sup> aged 72, died at Jefferson Highlands, N. H., June 3, 1920.

MISS EMILY HINDS THOMAS, of Bryn Mawr, Pa., died October 17, 1920.

NELSON RUSH WOOD died in his 63rd year at Washington, D. C., November 8, 1920.

---

### GENERAL NOTES

**The Horned Grebe (*Colymbus auritus*) at Hatley, Stanstead County, Quebec.** Since my last list of the birds of Hatley was written, the above species has been added, making a total in all of 177 species. In Knight's 'Birds of Maine,' 1908, p. 21, we read of the Horned Grebe as occurring rarely in spring and fall in the interior, whilst in the Province of Quebec the same thing seems to occur, judging from the literature on the subject. At Hatley the bird can safely be described as a not common migrant, for I have never seen it on my little marsh, nor yet on Lake Massawippi, and Mr. Greer tells me that in his fifteen or twenty years' experience as a taxidermist no examples have been brought to him to mount until the present season, when two birds were obtained by different parties on Lake Massawippi. One of these was shot on November 1, and the other on November 7, both of which I saw in the mounted state when calling on Mr. Greer on November 20. Apparently this has been somewhat of a 'Grebe' year, for my little marsh has produced several examples of the Pied-billed Grebe (*Podilymbus podiceps*) a bird I had personally never seen there before.—H. MOUSLEY, *Hatley, Que.*

**The Glaucous Gull (*Larus hyperboreus*) at Buffalo, N. Y.**—On March 24, 1918, while walking along the southern shore of Lake Erie from the Lackawanna Steel Plant to the foot of Louisiana Street, my attention was arrested by the presence of a large, wholly-white gull. The bird was associated with four or five Herring Gulls near shore; it was noticeably larger than its companions, and appeared at a distance to be entirely white. The light was very good at the time, and I was able to
