

inca (p. 88) Huanuco, Peru; *Chlorophanes spiza axillaris* (p. 90) Bahia, Brazil; *Tangara chilensis chlorocorys* (p. 91) Vista Alegre, Peru; *Thraupis episcopus caeruleus* (p. 94) Vista Alegre; *Ramphocelus melanogaster transitus* (p. 95) Chinchao, Peru.

The discussion is very full and replete with information about related forms, distribution, etc., which is very helpful.

Zimmer, John T.—The Birds of the Neotropical Genus *Deconychura*. (Publ. 257. Field Mus. Nat. Hist., Zool. Series, Vol. XVII, No. 1, pp. 1-18. May 18, 1929.)

A careful review in which two species *longicauda* (with five races) and *stictolaema* (with four races) are recognized.

D. l. pallida (p. 6) Hyutanahan, Brazil; *D. l. connectens* (p. 8) Puerto Bermudez, Peru; and *D. s. clarior* (p. 14) Pied Saut, French Guiana are described as new.—W. S.

The Ornithological Journals.

Bird-Lore. XXXI, No. 2. March-April, 1929.

The Loon at Close Range. By Dr. Frank N. Wilson.—An intimate account of the habits of nesting Loons with some remarkably fine photographs of the female and nest.

Bird-Life at an Iowa Mill Pond. By Fred J. Pierce.—Notes on Cormorants, Ducks, Grebes, etc.

Flycatcher Habitats. By J. T. Nichols.

Dr. A. A. Allen, in the Audubon Department, has an account of the Chipping Sparrow, illustrated by some of his exquisite photographs, while the colored plate figures the Three-toed Woodpeckers from a painting by Sutton.

Bird-Lore. XXXI, No. 3. May-June, 1929.

Robert Ridgway. By Frank M. Chapman.—An appreciation and reproduction of a letter written only a little more than a month before his death, with a recent photograph.

A Cedar Waxwing in Northern Michigan. By William A. Gross.—With admirable photographs of the birds and nest.

Warbler Ways. By Roger T. Peterson.—Photographs of Mourning and Chestnut-sided Warblers and Maryland Yellow-throat.

Dr. A. A. Allen has an excellent account of the life history of the Kingfisher, illustrated, and there is a colored frontispiece of the Blue-gray Gnatcatcher by Brooks.

The Condor. XXXI, No. 2. March-April, 1929.

Down-Tree Progress of *Sitta pygmaea*. By J. Eugene Law.—A most interesting and original study of this Nuthatch showing that the body is almost always held at right angles to the trunk with one foot supporting it from above and the other holding it away from the tree. A series of remarkable photographs illustrate the article.
