# THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

Manuscripts should be typewritten if possible. As an aid in bibliography, title should be brief, within one printed line. References to literature may be inserted in parentheses at the appropriate places in the text, or listed at the end of the paper rather than in footnotes. Roman numerals and extensive tables are to be avoided. Line drawings intended for text illustrations should be in India ink; halftones can only be printed as plates. Longer articles should have a brief summary at the end. Except on request, no proofs of 'General Notes' or short communications will be submitted to authors.

Twenty-five reprints of leading articles are furnished authors free of charge. Reprints from 'General Notes,' 'Correspondence,' etc., and those from leading articles in excess of twenty-five must be paid for by the author, and must be ordered from the editor when the manuscript is submitted. Printed covers can be furnished at additional cost.

All articles and communications intended for publication and all books and publications intended for review should be sent to the Editor,

JOHN T. ZIMMER  
*American Museum of Natural History*  
79th Street and Central Park West  
New York, N. Y.

Information relative to advertising, subscriptions, requests for back numbers of 'The Auk,' as well as for other publications of the Union, changes of address and remittances should be sent to the Treasurer and Business Manager. Claims for replacement of missing or defective copies of 'The Auk' will not be honored unless received by the Business Manager within six months of publication of the particular number involved.

RUDYERD BOULTON  
*Field Museum of Natural History*  
Chicago, Illinois

## OFFICERS OF THE AMERICAN ORNITHOLOGISTS' UNION

*President:* DR. JAMES P. CHAPIN, American Museum of Natural History, New York, New York.

*Vice-Presidents:* JAMES L. PETERS, Museum of Comparative Zoology, Cambridge, Massachusetts.

GEORGE WILLETT, Los Angeles Museum, Los Angeles, California.

*Secretary:* DR. LAWRENCE E. HICKS, Ohio Wildlife Research Station, Ohio State University, Columbus, Ohio.

*Treasurer and Business Manager:* RUDYERD BOULTON, Field Museum of Natural History, Chicago, Illinois.

# Research Monographs

The National Audubon Society considers facts obtainable through scientific research the essential basis for wise policies governing the conservation of wildlife resources.

The Ivory-billed Woodpecker is the rarest North American bird. Efforts to conserve and restore it must be of prompt application as the factors undermining its survival continue to develop with increasing tempo. The present war's pressure for maximum lumber production underscores the predicament of the Ivory-bills.

The Roseate Spoonbill is one of the most exquisitely beautiful birds in the world. It was nearly extinct as a breeder in the United States. Protection by the Audubon wardens in Texas has produced favorable results, but, as a nester in Florida, the Spoonbill is still losing ground despite protection.

Intensive field studies of these two birds were sponsored and financed by the National Audubon Society. Comprehensive monographs, abundantly illustrated with halftones and line drawings, with colored frontispieces and bound in paper covers, are now available. The author of the Ivory-bill monograph is James T. Tanner; of the Roseate Spoonbill monograph, Robert P. Allen. Price \$2.50 each, postpaid.
