

JOHN K. TERRES *Says . . .*

Writer, Naturalist and Editor

"Any field writer in ornithology will testify to the great reference value of *Audubon Field Notes*; however, its usefulness to writers and editors is seldom mentioned. Any one who writes about birds will find much information in each issue—information essential in keeping up with the changing distribution of birds in North America. For one who edits either popular or scientific articles and books about birds, its usefulness ranks with that of the *A.O.U. Check-List*. During the time that I was Editor of *Audubon Magazine* I relied on *Audubon Field Notes* to check the distributional status of birds mentioned in articles we were preparing for publication, and often to supplement the articles with information from the valuable section, "The Changing Seasons." *Audubon Field Notes* is the only periodical of its kind in North America. Every writer on American birds, and every editor of popular or scientific natural history publications should find it profitable to be a subscriber."

WILEY BOOKS

A basic reference on the world of birds . . .

Bird Study

By ANDREW J. BERGER, Associate Professor of Anatomy, University of Michigan Medical School.

BEAUTIFULLY ILLUSTRATED

1961 389 pages \$9.00

A distinguished ornithologist concentrates in this new book on field studies of the living bird — location, identification, and the many facets of bird behavior.

OBSERVATIONS FROM NATURE AND AVIARY
Basic but not "popularized," *Bird Study* offers the keys to understanding song, courtship, nesting, eggs, raising young, migration, and the mysteries of navigation. It covers behavior on a neuroanatomical and hormonal basis, and has a strong section on breeding parasitism.

AND CONSERVATION . . .

A special chapter shows birds as an integral part of their environment, and the vital need for protecting both as a part of the entire conservation picture. Here, the prodigal use of insecticides receives its due. *Bird Study* is a "must" for the ornithologist's library.

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

All articles and notes submitted for publication and all books and publications intended for review should be sent to the Editor:

DONALD S. FARNER, *Department of Zoology, Washington State University, Pullman, Washington.*

All persons interested in ornithology are invited to join the American Ornithologists' Union. Application may be made to the Treasurer; dues for Members are \$5.00 per year. 'The Auk' is sent without charge to all classes of members not in arrears for dues.

Send changes of address, claims for undelivered or defective copies of 'The Auk,' and requests for information relative to advertising, subscriptions, back numbers of 'The Auk,' as well as for other publications of the Union, to the Treasurer: CHARLES G. SIBLEY, *Fernow Hall, Cornell University, Ithaca, New York.*

OFFICERS OF THE AMERICAN ORNITHOLOGISTS' UNION

President: GEORGE H. LOWERY, JR., *Museum of Zoology, Louisiana State University, Baton Rouge, Louisiana.*

First Vice-President: AUSTIN L. RAND, *Chicago Natural History Museum, Chicago 5, Illinois.*

Second Vice-President: JOHN T. EMLÉN, JR., *University of Wisconsin, Madison, Wisconsin.*

Editor: DONALD S. FARNER, *Department of Zoology, Washington State University, Pullman, Washington.*

Managing Editor: HENRY GROSSHANS, *Office of Publications, Washington State University, Pullman, Washington.*

Secretary: HERBERT G. DEIGNAN, *U. S. National Museum, Washington 25, D. C.*

Treasurer: CHARLES G. SIBLEY, *Fernow Hall, Cornell University, Ithaca, N. Y.*

TOM IMHOF

STUDENT OF ALABAMA BIRDS

Says:

"*Audubon Field Notes* is an unusual magazine with continent-wide coverage which keeps the bird student informed of changes in the abundance of birds, range extensions, invasions, big flights, migration delays and speed-ups, and almost any type of bird movement, with interesting commentary by experts. A bird student without this information is like a physician without his medical journals, a military commander without intelligence reports, a politician without his 'ears to the ground.' He simply cannot afford to be without it."

ATLAS OF AVIAN HEMATOLOGY

ALFRED M. LUCAS and CASIMIR JAMROZ

This reference monograph of basic research prepared at the Regional Poultry Research Laboratory, East Lansing, Michigan (U. S. Department of Agriculture), was written for those who wish to identify accurately different types of avian blood cells. There are 48 plates from original water colors. Blood from representative wild birds is included for comparison with that of the chicken. The monograph covers the cells of the circulating blood in both the adult and embryo. Developmental stages from hematopoietic organs are illustrated and described.

The monograph is the first publication in any language that covers extensively the cytologic aspects of avian hematology.

Copies may be purchased from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.
