

A Canadian Research Directory

The Canadian Society of Wildlife and Fishery Biologists has produced a directory of current research in Canada in wildlife and fishery biology. Projects are listed by Province, agency, title, and leader with probable date of completion. The directory contains some 705 entries which are fully indexed and cross-indexed. It is mimeographed and in ring binding so that new material can be added. Present plans are to revise the directory every two years. The directory is free to members of the Canadian Society or can be purchased for \$3.00 from the Secretary-Treasurer, C.S.W.F.B., Box 2292, Postal Station "D," Ottawa, Ontario.

ROBERT J. NEWMAN **Says:**

TREASURER, AMERICAN ORNITHOLOGISTS' UNION

"Though frequently called 'bird watchers,' most American bird enthusiasts concentrate on bird-finding, a fascinating pursuit that is particularly fascinating on this continent and an activity at which they are especially adept. *Audubon Field Notes* provides the most up-to-date and comprehensive news regarding bird-finding and is therefore a 'must' for every such enthusiast. At the same time, the journal is accumulating a wealth of data about the distribution of birds with vast potentialities for scientific analysis. As a result, *Audubon Field Notes* is one bird periodical that neither the specialized student of bird ranges nor the average amateur can afford to miss."

SPECIMEN CABINETS

Double Wall Construction

Pest-Proof and Air Tight Seal

Fumigant Compartment

- Double Wall Construction
- Pest-Proof and Air Tight Seal
- Double Panel Door
- Lift-Off Safe Type Hinge
- Fumigant Compartment
 - 3-Point Locking Mechanism
 - Front and Back Air Tight Seals
 - Specimen Trays of Aluminum and Masonite. Lightweight, sturdy and easy to handle.

Skin Case #201 (illustrated)
 Holds large trays for larger specimens.

Skin Case # 202 (not illustrated)
 Divided for half-size trays for smaller specimens.

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Museum of Natural History, The University of Kansas, Lawrence, Kansas, by the following staff:

Editor, ROBERT M. MENGEL; *Assistant Editors*, RICHARD F. JOHNSTON and J. KNOX JONES, JR.;

Editorial Assistants, MARION J. PHILLIPS and JOYCE L. WILDENTHAL.

The Auk welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor.

Suggestions to contributors.—The efficient and economical transmission of knowledge by means of the printed word requires effective participation of author, editor, and printer. In order to facilitate the task of the printer, the editor should receive from authors MSS satisfying the following minimal requirements: *MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard (8½ × 11 in.) bond paper, with at least one inch margin all around. Tables (which should be unruled) and legends should be typed on separate sheets. Drawings should be in India ink on good board or drafting papers and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to ½ their original dimensions (final width will usually be 4¼ in.).*

Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A. O. U. Check-list (1957) or the appropriate equivalent unless departures are explained and defended.

For bird weights and measurements, use metric units; for environmental and other precise measurements, metric units are recommended but English equivalents may be supplied parenthetically. The 24-hour clock and "continental" dating (e.g., 1 July 1758) are likewise recommended.

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in *The Auk*, with minor variations, since 1950. If more than 10 works are cited, references in text should relate to a terminal list of "literature cited" (see *Auk*, vols. 78 or 79 for form; *include no titles not cited*) except in general notes, where citation should normally be in text. Avoid footnotes. *Where critical matter is cited from longer papers, indicate the pertinent pages, e.g. "(Lack, 1947: 96-97)."* Citations in text should be parenthetical, e.g. "(D. Lack, 1947. *Darwin's finches*. Cambridge Univ. Press)" or "(*Auk*, 79: 251, 1962)." *Verify all citations from original sources unless impossible, in which case so indicate.*

Articles more than 10 pp. long should include a summary that should not exceed 10 per cent of the length of the article.

For abbreviations and minor matters of form see recent issues of *The Auk*. The *Style manual for biological journals* (Washington, D. C., Amer. Inst. Biol. Sci. 1960) is generally useful also. In controversial matters of form *The Auk* frequently relies finally on the dicta of *A manual of style* (Chicago, Univ. Chicago Press, 1949).

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from the editor on the blanks sent with the proof and to be returned therewith. Printed covers can be furnished at additional cost.

CONTENTS

ROCKHOPPER PENGUINS	frontispiece, facing p. 229
THE ROCKHOPPER PENGUIN, <i>EUDYPTES CHRYSOCOME</i> , AT MACQUARIE ISLAND. <i>John Warham</i>	229
ORIENTATION BEHAVIOR OF FOUR SPECIES OF WATERFOWL. <i>Frank C. Bellrose</i>	257
IN MEMORIAM: ARTHUR H. HOWELL. <i>Viola S. Schantz</i>	290
MORTALITY OF COMMON EGRETS AND OTHER HERONS. <i>M. Philip Kahl, Jr.</i>	295
PELLET FORMATION IN A GREAT HORNED OWL: A ROENTGENOGRAPHIC STUDY. <i>Robert J. Grimm and Walter M. Whitehouse</i>	301
COURTSHIP OF THE AMERICAN REDSTART. <i>Millicent S. Ficken</i>	307
TENTATIVE FIELD ESTIMATES OF METABOLISM IN BUNTINGS. <i>Carl W. Helms</i>	318
THE FOSSIL AVIFAUNA OF ICHTUCKNEE RIVER, FLORIDA. <i>John J. McCoy</i>	335
REPORT OF THE COMMITTEE ON BIRD PROTECTION, 1962.	352
GENERAL NOTES	
Caspian Tern breeds in Florida. <i>Glen E. Woolfenden and Andrew J. Meyerriecks</i>	365
Albinism in a Canada Goose. <i>Robert W. Skinner</i>	366
Breeding range expansion of the Burrowing Owl in Florida. <i>J. David Ligon</i>	367
Additions to the known breeding ranges of several species in south Texas. <i>Travis C. Meitsen</i>	368
The nesting of the Lucifer Hummingbird in the United States. <i>Warren M. Pulich, Sr., and Warren M. Pulich, Jr.</i>	370
Records of the Brown Creeper for interior Alaska. <i>Willet T. Van Velsen</i>	371
Wing-flashing in the Galápagos Mockingbird. <i>Margaret H. Hundley</i>	372
Notes on methods of feeding and the use of tools in the Geospizinae. <i>Margaret H. Hundley</i>	372
Interspecific preening display by the Rice Grackle, <i>Psomocolax oryzivorus</i> . <i>C. J. O. Harrison</i>	373
Another albinistic Blue Jay. <i>Margarette E. Morse</i>	374
Reproductive condition of feral pigeons in winter. <i>Ralph Dunmore and David E. Davis</i>	374
A Cinnamon Teal specimen from Alabama. <i>Thomas Z. Atheson, Jr.</i>	374
Head-scratching in the Hairy Woodpecker, <i>Dendrocopos villosus</i> . <i>David W. Dunham</i>	375
Herring Gull extends breeding range south to North Carolina. <i>Jack P. Hailman</i>	375
A simultaneous nesting of the Robin and the Blue Jay in one tree. <i>George E. Watson</i>	377
First nesting record of the Cattle Egret (<i>Bubulcus ibis</i>) in Canada. <i>Udo Buerkle and W. Dan Mansell</i>	378
Bulwer's Petrel (<i>Bulweria bulwerii</i>) in Trinidad, West Indies. <i>Richard Ffrench</i>	379
Black-throated Sparrows in the eastern United States. <i>John L. Bull</i>	379
REVIEWS	381
