

Let this handsome,  
exciting volume take  
you to where you'll  
find the birds you've  
always wanted to see!

## THE BIRD WATCHER'S AMERICA

Edited by Olin Sewall Pettingill, Jr.

*Director, Laboratory of Ornithology, Cornell University; contributing editor, Audubon Magazine; author of the Oxford bird guides.*

Writing expressly for this splendid new book, 44 of America's leading naturalists describe the ornithological attractions of their favorite haunts in the United States and Canada. More than a field guide, the volume provides first-hand experiences enlivened with personal anecdotes and touches of humor, 50 line drawings by celebrated bird artist John Henry Dick, and vital information on locating both common and rare species. Every bird-watcher—armchair or field—will be delighted with the rich experiences and the delightful narratives of the contributors.

Every area of the U. S. and Canada is covered; Down East in Maine (Allan D. Cruickshank); The Florida Keys (Robert Porter Allen); Great Smoky Mountains National Park (Arthur Stupka); The Black Hills of South Dakota (Herbert Krause); The Pribilofs (Roger Tory Peterson); Ontario's Algonquin Park (Fred Bodsworth); The Black Mesa Country of Oklahoma (George Miksch Sutton); The New York City Region (John Bull); and much, much more. From the Atlantic to the Pacific, from the Rio Grande to Hudson Bay, you'll find many hours of pleasure and profit in this unusual volume. Over 440 pages, illustrated, 6" x 8½", \$7.50.

**EXAMINE FREE FOR 10 DAYS.** Send the coupon today and enjoy *The Bird Watcher's America* at home for 10 days, with no obligation to buy. If you're not delighted with it, return it for a full refund.

**A must for every bird- or nature-lover . . .**

# **THE BIRDS OF CAPE COD, MASSACHUSETTS**

**by DR. NORMAN P. HILL • Introduction by Roger Tory Peterson**

Conceived nearly twenty years ago by the distinguished botanist and ornithologist, Ludlow Griscom, based in part on his field notes, and now brought to completion by Dr. Hill, this is *the* definitive work in its field.

Here is a full listing of all the birds of Cape Cod—with photographs and beautiful illustrations by Marcia Norman of Chatham.

With its careful documentation and attention to details of history and environment, this is a book to be cherished by all serious bird-fanciers, amateur or professional.

\$6.00 at your booksellers—or from the publisher . . .

## ***Birds of the Niagara Frontier Region: An Annotated Check-list***

By **Clark S. Beardslee and Harold D. Mitchell**

This is the only comprehensive work on a most interesting ornithological region. It contains not only an annotated check-list but also the avian history of the area, territorial outline and life zones, and localities of special note. It was published by the Buffalo Society of Natural Sciences as Volume 22 of its Scientific Bulletins.

478 pages      38 illustrations      2-color map      bibliography      index  
 Hard cover \$10      Soft cover \$9  
 Please include 35¢ for handling and postage.

## ORNITHOLOGICAL MONOGRAPHS

ORNITHOLOGICAL MONOGRAPHS No. 1 A Distributional Study of the Birds of British Honduras, by Stephen M. Russell. 195 pp., 2 colored plates. Price, \$4.50, prepaid (\$3.60 to A.O.U. members).

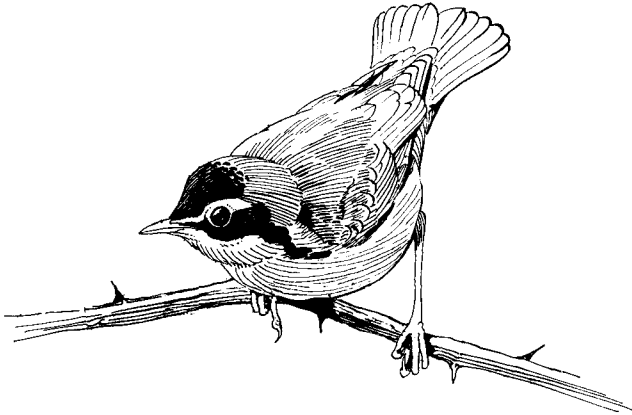

### Comments by reviewers:

"This nice, solid piece of work makes a fitting lead-off paper for the A.O.U.'s new monograph series." O. L. Austin, Jr. (in *Bird-Banding*).

"A very careful and thorough account of the avifauna of a relatively neglected portion of Central America . . . its usefulness extends considerably beyond the borders of the area with which it deals. Both author and publisher are to be congratulated on a fine first effort." Thomas R. Howell (in *The Wilson Bulletin*).

ORNITHOLOGICAL MONOGRAPHS No. 2 A Comparative Study of Some Social Communication Patterns in the Pelecaniformes, by Gerard Frederick van Tets. 88 pp., 49 text figures. Price \$2.00, prepaid (\$1.60 to members of the A.O.U.). Ready in August.

ORNITHOLOGICAL MONOGRAPHS No. 3 The Birds of Kentucky, by Robert M. Mengel. Approximately 575 pp., 4 colored plates plus text figures and vignettes. Cloth bound. Price \$10.00, prepaid (\$8.00 to members of the A.O.U.). Ready in September.

ORNITHOLOGICAL MONOGRAPHS No. 4 Evolution of Some Arctic Gulls (*Larus*): an Experimental Study of Isolating Mechanisms, by Neal Griffith Smith. In preparation.

# THE AUK

## A Quarterly Journal of Ornithology

### ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Museum of Natural History, The University of Kansas, Lawrence, Kansas 66045, by the following staff:

*Editor*, ROBERT M. MENGEL; *Assistant Editor*, J. KNOX JONES, JR.

*Editorial Assistants*, GARY C. PACKARD and DENNIS M. POWER.

*The Auk* welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor.

*Note to contributors to The Auk.*—The operation of a large journal on a quarterly schedule with limited editorial assistance poses demanding problems in organization and timing. The latter frequently is the all-important factor in meeting the production schedule.

Extreme pains are taken in the present operation to avoid the perpetration of error. (1) All MSS are read and edited by the editor and rechecked by at least one other member of the editorial staff. (2) All MSS which receive significant revision, discounting trivia of journal style, are returned to authors for consideration. (3) All galley proofs are read to copy at the Allen Press by their trained proof-readers, once-corrected, and the corrected lines read again before the editorial staff sees them. (4) All galley proof is then read to copy by the editorial staff, corrected, and the corrected copy (page proof) read once (and sometimes twice) more. At this point any residual errors discovered are corrected. (5) All galley proofs are submitted to their authors for checking.

It is here that we may realize a significant saving in time. If authors will maintain for their own use an up-to-date carbon copy, it is possible for the editorial staff to read proof to the ribbon copy *simultaneously* with the author's reading to the carbon copy. (Otherwise we must either complete this reading to the ribbon copy before mailing proof, or defer such reading until the proof and [hopefully] ribbon copy are returned by the author.) We estimate that with some issues as much as two weeks of production time is saved by this procedure. Further, it allows us to utilize an additional time-saving service that Allen Press provides if desired: namely the mailing directly from the press of proofs to authors, immediately as they are ready.

To be sure, MSS in which changes are minimal and self-evident may not be returned; however, as noted above, all MSS submitted to considerable editorial modification are routinely cleared with authors before being committed to type, and at this time the carbon copy may and should be adjusted for ultimate reading to proof. In some cases, where time is certainly adequate (often meaning that the article will be scheduled two issues ahead), the ribbon copy will continue to be returned with the galley proofs and may be retained by its author unless its return is explicitly requested.

The editorial staff solicits the understanding of authors in this matter and profoundly appreciates their cooperation. This in the main has continued to be exemplary.

It may be appropriate, finally, here to urge that authors contemplating absence from their usual haunts take pains either to notify the editor of their temporary addresses or to appoint representatives empowered to read their proofs and order their reprints. The editor naturally recognizes an obligation to make proof available; he cannot, however, accept the obligation either to search for missing authors or materially to delay the publication or alter the content of any issue on account of delinquent proof.
