

BIRDS OF COLORADO

by

ALFRED M. BAILEY and ROBERT J. NIEDRACH

Volume I, pp. i-xxii, 1-454, inserts 136 pp. (612 pp.)

Volume II, pp. i-x, 455-895, inserts 112 pp., and map. (563 pp.)

Total pages 1175 (12" × 9" wide)

Illustrated with 124 plates depicting in full color 420 species (approximately 700 individual birds) and over 400 photographs in black and white. The paintings by 23 artists—among them outstanding bird artists of the world—were made especially for *Birds of Colorado*.

Four hundred thirty-nine species and an additional sixty-four subspecies are recorded in the sequence followed in *The Checklist of North American Birds*. The data given for each cover recognition, range, status in Colorado and in the neighboring states of Nebraska, Kansas, New Mexico, Utah, and Wyoming, concluding with a narrative of the life-history activities of each Colorado breeding form.

For more than forty years the authors, Alfred M. Bailey, Director, and Robert J. Niedrach, Curator of Birds, of the Denver Museum of Natural History, have roamed from the prairies to mountain peaks of Colorado at all seasons. In *Birds of Colorado* they have endeavored to present copy primarily of interest to amateur bird observers, but also to professional ornithologists as well. An attempt has been made to give early arrival and late departure dates, where and when to look for each species, its relative abundance, and the nesting habits of breeding summer residents of the state.

REGULAR EDITION \$35.00

Colorado residents please add 3% sales tax; Denver residents, 5%.

Catalogues free on Request

WE INVITE YOUR INQUIRIES and specifications for publications or books in the field of Ornithology.

WE OFFER COMPLETE SERVICES in typography, engravings or color separations for lithography; top quality process letterpress or lithographic reproductions; pamphlet, perfect or hard binding.

RECENT PRODUCTIONS include the 220 page edition (104 full color plates) of "Birds of Wisconsin" by Owen J. Gromme for University of Wisconsin Press, letterpress; and "Topflight — Speed Index of North American Waterfowl" in full color lithography with 262 separate color illustrations by John Ruthven and W. Zimmermann.

ONE OF OUR TRAINED GRAPHIC ARTS SERVICE PERSONNEL is assigned to each publication project. For further information, write or phone collect to Carl Moebius 414-276-5311 at Moebius Printing Company, 300 North Jefferson Street, Milwaukee, Wisconsin 53202.

Pennsylvania Birds

An Annotated List

by EARL L. POOLE

The first complete study of the distribution and occurrence of Pennsylvania birds in 75 years. Data on 361 species and 47 hypotheticals. Line drawings and 34 maps by the author. A publication of the Delaware Valley Ornithological Club. Cloth-bound. \$4.00

LIVINGSTON PUBLISHING COMPANY

Narberth, Pennsylvania 19072

ANOTHER NUTTALL ORNITHOLOGICAL CLUB PUBLICATION

No. 5. ECOLOGY AND BIOENERGETICS OF THE LONG-BILLED MARSH WREN (*TELMATODYTES PALUSTRIS GRISEUS*) IN GEORGIA SALT MARSHES. By Herbert W. Kale II. 1965. 142 pp., 61 tables, 22 figs., cloth. \$4.00.

The breeding biology and population ecology of this difficult to observe bird were carefully investigated for five years, resulting in one of the most complete studies of its kind for any avian species. Dr. Kale's lucid and interesting monograph will certainly become a cornerstone in the rapidly developing field of quantitative ecology.

A list of Nuttall Club publications will be sent on request.

ORNITHOLOGICAL MONOGRAPHS

MONOGRAPH No. 1. *A Distributional Study of the Birds of British Honduras*, by Stephen M. Russell. 195 pp., 2 color plates. Price \$4.50 (\$3.60 to AOU members).

MONOGRAPH No. 2. *A Comparative Study of Some Social Communications Patterns in the Pelicaniformes*, by Gerard Frederick van Tets. 88 pp., 49 text figures. Price \$2.00 (\$1.60 to AOU members).

MONOGRAPH No. 3. *The Birds of Kentucky*, by Robert M. Mengel. Cloth bound, 575 pp., 4 color plates plus text figures and vignettes. Price \$10.00 (\$8.00 to AOU members).

Like all other AOU publications, *Ornithological Monographs* are shipped prepaid. Make checks payable to "The American Ornithologists' Union." For the convenience of those who wish to maintain complete sets of *Monographs* and to receive new numbers immediately upon issue, standing orders will be accepted. Monograph No. 4 will be "Evolution of Some Arctic Gulls (*Larus*): an Experimental Study of Isolating Mechanisms," by Neal Griffith Smith.

Order from: **Burt L. Monroe, Sr., Treasurer, American Ornithologists' Union, Box 23447, Anchorage, Kentucky 40223**

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Museum of Natural History, The University of Kansas, Lawrence, Kansas 66044, by the following staff:

Editor, ROBERT M. MENGEL; *Assistant Editors*, J. KNOX JONES, JR., and CLAYTON M. WHITE.
Editorial Assistant, DENNIS M. POWER.

The Auk welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor.

Suggestions to contributors.—The efficient and economical transmission of knowledge by means of the printed word requires effective participation of author, editor, and printer. In order to facilitate the task of the printer, the editor should receive from authors MSS satisfying the following minimal requirements: *MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard (8½ × 11 in.) bond paper, with at least one inch margin all around. Tables (which should be unruled) and legends should be typed on separate sheets. Drawings should be in India ink on good board or drafting papers and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to ½ their original dimensions (final width will usually be 4¼ in.).*

Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A.O.U. Check-list (1957) or the appropriate equivalent unless departures are explained and defended.

For bird weights and measurements, use metric units. Other measurements should be in the form usual to the discipline of the paper as practiced in the United States. The 24-hour clock and "continental dating (e.g., 1 July 1858) are recommended.

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in *The Auk*, with minor variations, since 1950. If more than 10 works are cited, references in text should relate to a terminal list of "literature cited" (see *Auk*, vols. 78 or 79 for form; *include no titles not cited*) except in general notes, where citation should normally be in text. Avoid footnotes. *Where critical matter is cited from longer papers, indicate the pertinent pages, e.g. "(Lack, 1947: 96-97)."* Citations in text should be parenthetical, e.g. "(D. Lack. *Darwin's finches*. Cambridge Univ. Press, 1947.)" or "(*Auk*, 79: 251, 1962)." *Verify all citations from original sources unless impossible, in which case so indicate.*

Articles more than 10 pp. long should include a summary that should not exceed 10 per cent of the length of the article.

For abbreviations and minor matters of form see recent issues of *The Auk*. The *Style manual for biological journals* (Washington, D. C., Amer. Inst. Biol. Sci. 1960) is generally useful also. In controversial matters of form *The Auk* frequently relies finally on the dicta of *A manual of style* (Chicago, Univ. Chicago Press, 1949).

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from Allen Press Inc. on the blanks sent with the proof.
