Bird Bonanzas Tours

are ornithological tours — not “nature” or “natural history” tours. They are designed not by travel agents, or even by “birders,” but by ornithologists with extensive experience in the areas of the tours.

All leaders of our coming spring tours have done advanced study, writing and teaching in the field of ornithology, and, in addition, have lived for extended periods of time in the areas of their tours.

For example, Dr. C. Hilary Fry of the Department of Zoology, University of Aberdeen, who will lead our WEST AFRICA tour has lived in Nigeria seven years. He inaugurated the Nigerian Ornithologists Society and edited its bulletin. His research has taken him to East, South and Central Africa, and he has participated in trans-African expeditions mapping out areas for faunal reserves. He has published numerous articles in the Ibis and other publications.

In designing our West African tour, he didn't think only of tourist attractions, but primarily of faunal and vegetation zones and an itinerary most productive for the visiting ornithologist.

West Africa has much to offer the ornithologist — a diverse fauna and geography and forest zones vastly more extensive than those in East Africa.

During our visit, March 24 - April 13, there will be much courtship activity and native and Palearctic migration will be in full swing. We will visit exotic areas, such

as the great Congo, Volta and Niger Rivers,

Lake Chad and Timbuktu. If you are not

the typical tourist who merely wants

a few photos of elephants (though

you'll see as many mammals as

anywhere in Africa) think

about joining us in

West Africa for a

real ornithological adventure.

BIRD BONANZAS TOURS

India and Nepal offer —

- **a wealth of bird life.** 1,300 species inhabit the Indian subcontinent including 50 pheasants, exotic families such as bee-eaters, flower-peckers, pittas, broadbills, barbets and horn-bills. (*On our 1973 tour to this area 555 species of birds were recorded.*)
- **a wealth of mammal life,** including tigers, elephants, rhinos and many other spectacular mammals. (*On our 1973 tour 32 species of mammals were recorded.*)
- **outstanding scenery.** The towering snow-capped Himalayas. One 1973 participant said, "To be in those mountains is an unforgettable experience." The scenic beauty of the vale of Kashmir. Though we emphasize birds, we will briefly visit the Taj Mahal or similar noteworthy sights during the part of the day when birds are less active.

Plate by John Henry Dick from
"A Field Guide to the Birds of India."
(Actual plate is in full color.)

There is no more competent leader for a tour to this area than Ben King. He has seen more species of birds in Asia than anyone else, as far as we know, 1,066 species in 1973 alone. He has lived in the field months at a time and netted and banded about 93,000 birds of about 500 species in Asia. He spent more than a year in India doing daily field research for "A Field Guide to the Birds of Asia."

Being in a **small group of enthusiastic birders**, as in all **BIRD BONANZAS** tours, you will have the maximum opportunity to see the greatest possible number of birds.

In early 1975 we also have outstanding tours with expert leaders to Ethiopia, West Africa, Panama, Belize-Guatemala and Costa Rica. Send attached coupon for additional information.

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Florida State Museum, University of Florida, Gainesville, Florida 32611, by the following staff:

Editor, OLIVER L. AUSTIN, JR.; *Assistant Editor*, FLORENCE A. PETTIS

Associate Editors, WALTER BOCK (Reviews), HERBERT W. KALE, II
(Periodical Literature), and JAMES J. DINSMORE (Index)

THE AUK welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor. For longer articles (ca. 10,000 words or over) a charge for all printed pages above 20 is assessed at actual costs, currently \$51.00 per page.

SUGGESTIONS TO CONTRIBUTORS.—Submit all MSS in duplicate. They must satisfy the following minimal requirements: MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard ($8\frac{1}{2} \times 11$ in.) bond paper, with at least 1-inch margins all around. Tables (which should be unruled) and figure legends should be typed on separate sheets. Drawings should be in india ink on good board or drafting paper and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to their final width (usually $4\frac{1}{2}$ in.). Illustrations larger than $8\frac{1}{2} \times 11$ in. are not acceptable and should be reduced photographically to that size or smaller. Designate top of each illustration and identify (on the back with soft pencil) by author's name, title, and figure number. Submit a duplicate or readable copy of each figure for use of reviewers.

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in THE AUK, with minor variations, since 1973. Avoid footnotes. If more than five works are cited, references in text should relate to a terminal list of "literature cited" (include no titles not cited). Where critical matter is cited from longer works, indicate the pertinent pages, e.g. (Lack 1947: 96-97). Citations in text should be parenthetical, e.g. (Austin 1971, Families of birds, New York, Golden Press, pp. 44-49) or (Sauer 1972, Auk 39: 717). Verify all citations from original sources unless impossible, in which case so indicate. For spellings, abbreviations, and general conventions of form and style, Auk follows WNI, third ed. (1967); the Columbia Lippincott Gazetteer (1962); the CBE Style Manual, third ed. (1972); and the GPO Style Manual (1973).

For bird weights and measurements use metric units. Other measurements should be in the form usual to the discipline of the paper as practiced in the United States. The 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971) are preferred. Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A.O.U. Check-list, fifth ed. (1957), including the 32nd Supplement (1973, Auk 90: 411-419), or the appropriate equivalent unless departures are explained and defended. Articles more than 10 pages long should include a summary that should not exceed 10% of the length of the article.

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from Allen Press Inc. on the blanks sent with the proof.
