# THE WORLD ATLAS OF BIRDS

There has never been a bird book like this one before.

With its unique continent-by-continent approach, THE WORLD ATLAS OF BIRDS offers a fresh look at what birds are, how they live, and what lies behind their extraordinary success in coming to terms with virtually every habitat available on our planet.

Written by 14 of the world's outstanding authorities on ornithology, THE WORLD ATLAS OF BIRDS features clear, complete maps and classification charts... concise, illuminat-

ing text... comprehensive index and glossary... and full-color illustrations on nearly every page.

The individual entry for each species, coupled with a superb, large color painting, is designed to illustrate a particular facet of bird life—a hunting technique or physical specialization, courtship behavior or feeding habit. A special section diagrams the evolution and relationships of the world's 155 bird families.

THE WORLD ATLAS OF BIRDS is now at your bookstore. Or, if you prefer, you may obtain a copy by sending the coupon below.

- more than 500 original full-color paintings
- 270 line illustrations
- profiles of over 500 species of birds
- special essays on nearly 100 topics
- 167 maps and diagrams

# Louisiana Birds

*Revised edition*

Dr. George H. Lowery, Jr.

More than half of all bird species in the United States have been found in Louisiana. This completely revised and updated edition describes the 410 species of birds found in Louisiana, including 43 discovered since the book

was first published in 1955. Profusely illustrated, with 14 color plates and over a hundred photographs. More than a state bird book, *Louisiana Birds* is an engaging, intelligent guide to bird-watching as a hobby.

## BIRD BONANZAS TOURS

### India and Nepal offer —

- **a wealth of bird life.** 1,300 species inhabit the Indian subcontinent including 50 pheasants, exotic families such as bee-eaters, flower-peckers, pittas, broadbills, barbets and hornbills. (On our 1973 tour to this area 555 species of birds were recorded.)
- **a wealth of mammal life,** including tigers, elephants, rhinos and many other spectacular mammals. (On our 1973 tour 32 species of mammals were recorded.)
- **outstanding scenery.** The towering snow-capped Himalayas. One 1973 participant said, "To be in those mountains is an unforgettable experience." The scenic beauty of the vale of Kashmir. Though we emphasize birds, we will briefly visit the Taj Mahal or similar noteworthy sights during the part of the day when birds are less active.

Plate by John Henry Dick from  
"A Field Guide to the Birds of India."  
(Actual plate is in full color.)

**There is no more competent leader** for a tour to this area than Ben King. He has seen more species of birds in Asia than anyone else, as far as we know, 1,066 species in 1973 alone. He has lived in the field months at a time and netted and banded about 93,000 birds of about 500 species in Asia. He spent more than a year in India doing daily field research for "A Field Guide to the Birds of India." Being in a **small group of enthusiastic birders**, as in all **BIRD BONANZAS** tours, you will have the maximum opportunity to see the greatest possible number of birds. *In early 1975 we also have outstanding tours with expert leaders to Ethiopia, West Africa, Panama, Belize-Guatemala and Costa Rica. Send attached coupon for additional information.*

# THE AUK

## A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Florida State Museum, University of Florida, Gainesville, Florida 32611, by the following staff:

*Editor*, OLIVER L. AUSTIN, JR.; *Assistant Editor*, FLORENCE A. PETTIS

*Associate Editors*, WALTER BOCK (Reviews), HERBERT W. KALE, II  
(Periodical Literature), and JAMES J. DINSMORE (Index)

THE AUK welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor. For longer articles (ca. 8000 words or over) a charge for all printed pages above 16 is assessed at actual costs, currently \$51.00 per page.

**SUGGESTIONS TO CONTRIBUTORS.**—Submit all MSS *in duplicate*. They must satisfy the following minimal requirements: *MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard (8½ × 11 in.) bond paper, with at least 1-inch margins all around. Tables (which should be unruled) and figure legends should be typed on separate sheets. Drawings should be in india ink on good board or drafting paper and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to their final width (usually 4⅓ in.). Illustrations larger than 8½ × 11 in. are not acceptable and should be reduced photographically to that size or smaller. Designate top of each illustration and identify (on the back with soft pencil) by author's name, title, and figure number. Submit a duplicate or readable copy of each figure for use of reviewers.*

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in THE AUK, with minor variations, since 1973. Avoid footnotes. If more than five works are cited, references in text should relate to a terminal list of "literature cited" (*include no titles not cited*). Where critical matter is cited from longer works, indicate the pertinent pages, e.g. (Lack 1947: 96-97). Citations in text should be parenthetical, e.g. (Austin 1971, Families of birds, New York, Golden Press, pp. 44-49) or (Sauer 1972, Auk 39: 717). *Verify all citations from original sources unless impossible, in which case so indicate.* For spellings, abbreviations, and general conventions of form and style, Auk follows WNI, third ed. (1967); the Columbia Lippincott Gazetteer (1962); the CBE Style Manual, third ed. (1972); and the GPO Style Manual (1973).

For bird weights and measurements use metric units. Other measurements should be in the form usual to the discipline of the paper as practiced in the United States. The 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971) are preferred. Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A.O.U. Check-list, fifth ed. (1957), including the 32nd Supplement (1973, Auk 90: 411-419), or the appropriate equivalent unless departures are explained and defended. Articles more than 10 pages long should include a summary that should not exceed 10% of the length of the article.

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from Allen Press Inc. on the blanks sent with the proof.
