

INDEX TO VOLUME 92

Compiled by James J. Dinsmore

This index is primarily one to new information. Previously published information referred to in this volume has not been indexed unless extensive comparisons or reinterpretations are involved. For some species, especially ones not in the A.O.U. Check-list, scientific names only have been entered, and in some instances entries under scientific names are more extensive than those under vernacular names. New generic, specific, and subspecific names are printed in **boldface** type. Note that page numbers followed by "A" refer to the July supplement to No. 3, those followed by "B" will be found in the October supplement to No. 4.
