THE FENSMAN PORTABLE BLIND

This all-purpose blind is fully portable and measures 50" X 36" X 36", weighs approx. 7 lb., folded measures only 22" X 7", and is supplied in a carrying grip. Manufactured from camouflaged water resistant canvas, held rigid by four interlocking hardwood poles supported by adjustable guy ropes. The 'Fensman' can be used for photography or general ob-

servaion. There are four 2½" X 7" observation slits suitable for binoculars (one on each side), which (a) can be secured with the built-in storm flaps, (b) left fully open, or (c) partially obscured by a fine nylon mesh blind which renders the observer unseen from outside, yet offers an almost unrestricted view from inside. A special feature of the 'Fensman' hide is the camera funnel which can be seen in the photograph.

The hide is being used by the Wild Life Film Units, The Nature Conservancy, etc. and has been well proven in the field.

The bottom of the hide is a double thickness skirt forming an all-round pocket, which, if necessary, can be filled with any material such as sand, beach or earth to give added anchorage in high wind areas, or is useful for the storage of items like note pads, etc. Price (includes carrying grip, all pegs, poles, ropes, etc. and carriage paid): \$45 by surface mail, \$55 by air mail.

FUNDAMENTALS OF ORNITHOLOGY

2nd Edition

Josselyn Van Tyne & Andrew J. Berger

This up-to-date edition discusses the major aspects of bird study—distribution, migration, navigational ability, special senses, behavioral patterns, feeding, and breeding. It also provides an introduction to the origin of birds and their flight. Over 500 original photographs and drawings, plus extensive references. Retains in updated version the invaluable section, "Birds of the World."

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Florida State Museum, University of Florida, Gainesville, Florida 32611, by the following staff:

Editor, OLIVER L. AUSTIN, JR.; *Assistant Editor*, FLORENCE A. PETTIS

Associate Editors, WALTER BOCK (Reviews), HERBERT W. KALE, II (Periodical Literature), and JAMES J. DINSMORE (Index)

THE AUK welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor. For longer articles (ca. 6000 words or over) a charge for all printed pages above 12 is assessed at actual costs, currently \$53.00 per page.

SUGGESTIONS TO CONTRIBUTORS.—Submit all MSS *in duplicate*. They must satisfy the following minimal requirements: *MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard (8½ × 11 in.) bond paper, with at least 1-inch margins all around. Tables (which should be unruled) and figure legends should be typed on separate sheets. Drawings should be in india ink on good board or drafting paper and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to their final width (usually 4½ in.). Illustrations larger than 8½ × 11 in. are not acceptable and should be reduced photographically to that size or smaller. Designate top of each illustration and identify (on the back with soft pencil) by author's name, title, and figure number. Submit a duplicate or readable copy of each figure for use of reviewers.*

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in THE AUK, with minor variations, since 1973. Avoid footnotes. If more than five works are cited, references in text should relate to a terminal list of "literature cited" (*include no titles not cited*). Where critical matter is cited from longer works, indicate the pertinent pages, e.g. (Lack 1947: 96-97). Citations in text should be parenthetical, e.g. (Austin 1971, Families of birds, New York, Golden Press, pp. 44-49) or (Sauer 1972, Auk 39: 717). *Verify all citations from original sources unless impossible, in which case so indicate.* For spellings, abbreviations, and general conventions of form and style, Auk follows WNI, third ed. (1967); the Columbia Lippincott Gazetteer (1962); the CBE Style Manual, third ed. (1972); and the GPO Style Manual (1973).

For bird weights and measurements use metric units. Other measurements should be in the form usual to the discipline of the paper as practiced in the United States. The 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971) are preferred. Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A.O.U. Check-list, fifth ed. (1957), including the 32nd Supplement (1973, Auk 90: 411-419), or the appropriate equivalent unless departures are explained and defended. Articles more than 10 pages long should include a summary that should not exceed 10% of the length of the article.

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from Allen Press Inc. on the blanks sent with the proof.
