

The Auk

*reaches 3,900 ornithologists and
1,000 institutional libraries.*

Rates and Space Dimensions for Advertisements in THE AUK

Space	Dimensions	Per Year (4 issues)	Per Issue
Full page	5" × 8"	\$625	\$240
½ page	5" × 4"	400	150
¼ page	5" × 2"	200	75

These are list prices; agencies receive the usual 15 percent commission. This price list supersedes all previous price lists.

Publication dates: 1 January, 1 April, 1 July, and 1 October.

Closing dates: Eight weeks in advance of publication date.

Columns to page: One, 30 picas wide.

Column size: 5" × 8".

Printing process: Letterpress or offset.

Size of half-tone screen: Up to 150.

Address inquiries and space orders to:

Books on Birds Bought and Sold

An extensive collection of ornithological material is available at all times for research, reference and investment.

Whether your interest lies in the Nearctic species or those belonging to the other great regions of the world, it will ensure satisfaction by contacting the only ornithological literary specialist.

Bird books are purchased either as single items, small collections or complete libraries. Please offer any that are surplus to your requirements.

An authoritative new
illustrated reference
guide by
DEREK GOODWIN

CROWS OF THE WORLD

From birds as familiar as the Blue Jay and the Magpie to little-known birds such as the Sooty Jay and Bush Crow, an eminent ornithologist offers complete information on all living corvid members in this generously illustrated one-volume reference guide.

Derek Goodwin, a Principal Scientific Officer in the Department of Zoology in the British Museum, first covers the family nomenclature, adaptive radiation, and plumage and coloration of this successful group of passerine birds. He then gives an account of many aspects of behavior such as feeding habits, sociability and flocking, communal roosting, threat and fighting, self-assertive display, and voice and vocal mimicry. After discussing the general characteristics of ten groups, he provides descriptions of the 116 known species, with a synopsis of the behavior and biology of each. Nearly all of the species descriptions are accompanied by a distribution map and a scrupulously accurate line drawing by Robert Gillmor.

Based on the author's many years of study and rich personal experience with corvids, this distinguished book will be a welcome addition to your bookshelf. Send for your copy today.

THE FENSMAN PORTABLE BLIND

This all-purpose blind is fully portable and measures 50" × 36" × 36", weighs approx. 7 lb., folded measures only 22" × 7", and is supplied in a carrying grip. Manufactured from camouflaged water resistant canvas, held rigid by four interlocking hardwood poles supported by adjustable guy ropes. The 'Fensman' can be used for photography or general ob-

servation. There are four 2½" × 7" observation slits suitable for binoculars (one on each side), which (a) can be secured with the built-in storm flaps, (b) left fully open, or (c) partially obscured by a fine nylon mesh blind which renders the observer unseen from outside, yet offers an almost unrestricted view from inside. A special feature of the 'Fensman' hide is the camera funnel which can be seen in the photograph.

The hide is being used by the Wild Life Film Units, The Nature Conservancy, etc. and has been well proven in the field.

The bottom of the hide is a double thickness skirt forming an all-round pocket, which, if necessary, can be filled with any material such as sand, beach or earth to give added anchorage in high wind areas, or is useful for the storage of items like note pads, etc. Price (includes carrying grip, all pegs, poles, ropes, etc. and carriage paid): \$58 by air mail.

Special Service to AOU Members

20% DISCOUNT ON VAN TYNE & BERGER

By arrangement with John Wiley & Sons, we can offer several titles to AOU members at a 20% discount:

	List Price	Discount Price
Fundamentals of Ornithology (2nd ed, 1976), Van Tyne & Berger	\$23.75	\$19.00
Ecological Adaptations for Breeding in Birds (1968), D. Lack	13.50	10.80
Radar Ornithology (1967), E. Eastwood	14.75	11.80
Bird Migrations: Ecological and Physiological Factors (1973), B. E. Bykhovskii	31.50	25.20
Zoogeography: The Geographical Distribution of Animals (1957), P. J. Darlington	21.00	16.80
Social Behavior in Animals: With Special Reference to Vertebrates (2nd ed, 1966), N. Tinbergen	4.50	3.60
Pathogenesis of the Avian Embryo: Causes of Malformations and Prenatal Death (1972), A. L. Romanoff	28.50	22.80

Order directly from The Treasurer, American Ornithologists' Union, Department of Zoology, Oregon State University, Corvallis, Oregon 97331.

Remittance, including a \$0.50 mailing charge, must accompany all orders.

Waterfowl of North America

BY PAUL A. JOHNSGARD

A lavishly illustrated treasury of information on all of the ducks, geese, and swans that breed in continental North America, their habitat, food, ecology, migratory movements, pairing and flocking behavior, and other data. 640 pages, drawings, b & w and color photos.

\$32.50

THE BLUEBIRD

How You Can Help Its Fight for Survival

BY LAWRENCE ZELENY

The delightful bluebird has become an endangered species, but prompt action can save it from extinction. Zeleny describes the habits and life history of the species and tells how to make bluebird nesting boxes and establish bluebird trails. 192 pages, drawings, photos, color plates.

\$7.95

Born To Sing

An Interpretation and World Survey of Bird Song

BY CHARLES HARTSHORNE

One of the world's leading authorities on bird song takes into account new findings in biology and psychology in presenting a fresh theory about animal music. "... a subtle, fascinating, and immensely learned book."

INDIANA UNIVERSITY PRESS

10th & Morton Streets, Bloomington, Indiana 47401

Is two-way communication with animals a possibility?

We don't know.

DONALD R. GRIFFIN—a professor at The Rockefeller University and an internationally recognized authority on animal physiology and behavior, particularly animal communication—proposes that scientists might try to find out in

THE QUESTION OF ANIMAL AWARENESS

Evolutionary Continuity of Mental Experience

In this little volume, Dr. Griffin takes a fresh, bold look at current work in behavior, ethology and related fields, and concludes that one entire, promising area may have been overlooked by present research.

Whether you're a specialist or a layman, you will find his arguments challenging.

144 pp., bibliography, indexes \$8.95

NATURALIST'S COLOR GUIDE

by Frank B. Smithe

Published by The American Museum of Natural History

Part I is a looseleaf binder in which eighty-six measured colors are shown with correlating names and numbers.

Part II is a paperbound supplement that explains how the colors were selected from Robert Ridgway's 1912 guide, plus much other valuable information.

Part I is \$9.00, Part II is \$5.00. If both parts are bought together, the price is only \$12.00.

THIRTY-THIRD SUPPLEMENT TO THE AMERICAN ORNITHOLOGISTS'	
UNION CHECK-LIST OF NORTH AMERICAN BIRDS	875
INDEX TO VOLUME 93. <i>Compiled by James J. Dinsmore</i>	880

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Florida State Museum, University of Florida, Gainesville, Florida 32611, by the following staff:

Editor, OLIVER L. AUSTIN, JR.; *Assistant Editor*, JUNE B. GABALDON

Associate Editors, WALTER BOCK (Reviews), HERBERT W. KALE, II (Periodical Literature), and JAMES J. DINSMORE (Index)

THE AUK welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor. For longer articles (ca. 6000 words or over) a charge for all printed pages above 12 is assessed at actual costs, currently \$55.00 per page.

SUGGESTIONS TO CONTRIBUTORS.—Submit all MSS *in duplicate*. They must satisfy the following minimal requirements: *MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard (8½ × 11 in.) bond paper, with at least 1-inch margins all around. Tables (which should be unruled) and figure legends should be typed on separate sheets. Drawings should be in india ink on good board or drafting paper and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to their final width (usually 4½ in.). Illustrations larger than 8½ × 11 in. are not acceptable and should be reduced photographically to that size or smaller. Designate top of each illustration and identify (on the back with soft pencil) by author's name, title, and figure number. Submit a duplicate or readable copy of each figure for use of reviewers.*

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in THE AUK, with minor variations, since 1973. Avoid footnotes. If more than five works are cited, references in text should relate to a terminal list of "literature cited" (*include no titles not cited*). Where critical matter is cited from longer works, indicate the pertinent pages, e.g. (Lack 1947: 96-97). Citations in text should be parenthetical, e.g. (Austin 1971, Families of birds, New York, Golden Press, pp. 44-49) or (Sauer 1972, Auk 39: 717). *Verify all citations from original sources unless impossible, in which case so indicate.* For spellings, abbreviations, and general conventions of form and style, Auk follows WNI, third ed. (1967); the Columbia Lippincott Gazetteer (1962); the CBE Style Manual, third ed. (1972); and the GPO Style Manual (1973).

For bird weights and measurements use metric units. Other measurements should be in the form usual to the discipline of the paper as practiced in the United States. The 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971) are preferred. Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A.O.U. Check-list, fifth ed. (1957), including the 32nd Supplement (1973, Auk 90: 411-419), or the appropriate equivalent unless departures are explained and defended. Articles more than 10 pages long should include a summary that should not exceed 10% of the length of the article.

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from Allen Press Inc. on the blanks sent with the proof.
