

A Bird Watcher's Adventures in Tropical America
By Alexander F. Skutch

Here are the adventures of one of the world's foremost bird watchers in the earth's richest and most varied bird-life region. Alexander F. Skutch provides a colorful personal account of his journeys and long sojourns in the wilds of tropical America during the 1930's and early '40's. This relaxed and richly detailed narrative describes the most notable birds he saw, the countryside where he found them, and the people he met along the way.

344 PAGES, ILLUSTRATED, \$13.95

A Fuertes Portfolio of Texas Birds
The Color Plates from the First Edition of The Bird Life of Texas
of Texas

Introduction by Edgar B. Kincaid, Jr.

Only a wildlife artist of the stature of Louis Agassiz Fuertes would have been appropriate to illustrate Harry C. Oberholser's monumental The Bird Life of Texas. The thirty-six color plates from the first edition are now available in portfolio form. The accompanying text sheets, with information on the haunts and habits of each species, are also suitable for framing.

9 X 12 IN. BOXED SET, 36 COLOR PLATES, 40 TEXT SHEETS, \$50.00

Publications of the AOU

Check-list of North American birds. Fifth ed. 1957 (reprinted 1975). Clothbound, 691 pages, \$15.00 (includes 32nd Supplement, 1973, and 33rd Supplement, 1976).

Thirty-second supplement to the American Ornithologists' Union check-list of North American birds (1973, Auk 90: 411-419) and **Corrections and additions to the "Thirty-second supplement to the check-list of North American birds"** (1973, Auk 90: 887). \$1.50 each.

Thirty-third supplement to the American Ornithologists' Union check-list of North American Birds (1976, Auk 93: 875). \$1.50 each.

Proceedings of the 13th International Ornithological Congress, 1963. Two volumes, 1250 pages, clothbound, \$10.00 per two-volume set.

Ten-year indexes to The Auk. 1901-1910, paperbound \$4.00. 1921-1930, paperbound \$4.00. 1931-1940, paperbound \$4.00, clothbound \$5.00. 1941-1950, paperbound \$8.00, clothbound \$10.00. 1951-1960, paperbound \$10.00, clothbound \$12.50. 1961-1970, paperbound \$10.00, clothbound \$12.50.

The American Ornithologists' Union, membership list, 1974. \$1.50 each.

Career opportunities in ornithology (1974, American Birds 28: 741-746). Single copies free from the Secretary of the AOU—include stamped, addressed envelope. Order multiple copies from Assistant to the Treasurer AOU—5 copies \$1.00, 30 copies \$5.00, 75 copies \$10.00.

ORNITHOLOGICAL MONOGRAPHS

No. 1. ***A Distributional Study of the Birds of British Honduras***, by Stephen M. Russell. 195 pp., 2 color plates. 1964. Price \$7.00 (\$5.50 to AOU members).

No. 2. ***A Comparative Study of Some Social Communications Patterns in the Pelecaniformes***, by Gerard Frederick van Tets. 88 pp., 49 text figures. 1965. Price \$3.50 (\$2.50 to AOU members).

No. 3. ***The Birds of Kentucky***, by Robert M. Mengel. Clothbound, 581 pp., 4 color plates plus text figures and vignettes. 1965. Price \$15.00 (\$12.50 to AOU members).

No. 4. ***Evolution of Some Arctic Gulls (Larus): an Experimental Study of Isolating Mechanisms***, by Neal Griffith Smith. 99 pp., 62 text figures. 1966. **Out of print.**

No. 5. ***A Comparative Life-history Study of Four Species of Woodpeckers***, by Louise de Kiriline Lawrence, 156 pp., 33 text figures. 1967. Price \$6.00 (\$4.50 to AOU members).

No. 6. ***Adaptations for Locomotion and Feeding in the Anhinga and the Double-crested Cormorant***, by Oscar T. Owre. 138 pp., 56 text figures. 1967. Price \$6.00 (\$4.50 to AOU members).

No. 7. ***A Distributional Survey of the Birds of Honduras***, by Burt L. Monroe, Jr. 458 pp., 2 color plates, 28 text figures. 1968. Price \$14.00 (\$11.00 to AOU members).

No. 8. ***An Approach to the Study of Ecological Relationships of Grassland Birds***, by John A. Wiens. 93 pp., 30 text figures. 1969. **Out of print.**

No. 9. ***Mating Systems, Sexual Dimorphism, and the Role of Male North American Passerine Birds in the Nesting Cycle***, by Jared Verner and Mary F. Willson. 76 pp. 1969. Price \$4.00 (\$3.00 to AOU members).

No. 10. ***The Behavior of Spotted Antbirds***, by Edwin O. Willis. vi + 162 pp., 3 color plates. 27 text figures. 1972. Price \$9.00 (\$7.50 to AOU members).

No. 11. ***Behavior, Mimetic Songs and Song Dialects, and Relationships of the Parasitic Indigobirds (Vidua) of Africa***, by Robert B. Payne. vi + 333 pp., 2 color plates, 50 text figures, 40 audiospectographs. 1973. Price \$12.50 (\$10.00 to AOU members).

*Announcing the first
volume of the*
**Handbook of the Birds
of Europe, the Middle
East, and North Africa**

The Birds of the Western Palearctic

Edited by **STANLEY CRAMP** and **K.E.L. SIMMONS**.

This new *Handbook* is planned as a comprehensive and authoritative reference work for both the professional scientist and the amateur ornithologist. The seven volumes will cover all the 795 species of birds occurring in the area, taking stock of the great advances in ornithological and geographical knowledge to date.

Volume I covers: Ostriches; Divers; Grebes; Albatrosses; Petrels and Shearwaters; Storm-petrels; Tropicbirds; Gannets and Boobies; Cormorants; Pelicans; Frigate-birds; Bitterns, Egrets, Darters, and Herons; Storks; Ibises and Spoonbills; Flamingoes; Swans, Geese, and Ducks.

Special features of the Handbook include:

- Full descriptions of most species, with sections on field characteristics, habitat, distribution, mortality and longevity, and population with maps showing breeding and wintering areas, social patterns and behavior, breeding, food, voice, plumages, molts, measurements, weights, structure, and geographical variation.
- Color plates of eggs, numerous black-and-white illustrations, and text figures showing such features as display postures, voice sonograms and melograms, and annual cycles.
- Color plate illustrations showing the full range of normal plumage together with more distant flight views.
- Indexes, bibliography, and glossaries of scientific terms for each volume.

December 1977

732 pp.; approx. 350 line drawings;

**Welty:
THE LIFE OF BIRDS
Second Edition**

The first edition was hailed as "the best and broadest coverage of bird biology" (American Birds), "unsurpassed in presenting the truly absorbing story of bird life" (National Wildlife), and "the best [general bird book] on the market today" (Audubon Magazine). The second edition promises to uphold and enhance this reputation.

Professor Welty provides a comprehensive, completely up-dated overview of ornithology that makes enjoyable, informative reading for any bird enthusiast. It incorporates the latest findings on *photoperiodism, circadian rhythms, celestial orientation, territorial instinct, magnetic sensitivity, vocalization and evolution*. Material on *plumage and molting, reproduction, avian behavior, migration, population dynamics, and conservation* has been extensively revised.

By **Joel Carl Welty**, Professor Emeritus of Biology, Beloit College. 623 pp. 290 ill. Published June 1975. \$19.75.

The paintings of Norman Lighton for Roberts Birds of South Africa

Roberts "Birds of South Africa" has become famous not only in Southern Africa but throughout Africa and even further afield. To date more than one hundred and twenty thousand copies of this book have been sold.

One of the criticisms of "Roberts" has been the relatively small size of its illustrations. "The paintings of Norman Lighton" more than compensate for this, as the illustrations are more than five times in area the size of those shown in "Roberts". Fifty-two of the plates (except the frontispiece and four "lost" plates) measuring 37 x 26 cm are reproduced by modern lithographic techniques directly from the original paintings of Lighton. There are 962 birds

illustrated in full colour. No text is provided as the book is intended to be used in conjunction with "Roberts", but the scientific and vernacular names as well as the "Roberts" numbers of the birds are printed on the pages facing the illustrations. Biographical notes on the artist precede the colour section.

THE EMU

The quarterly journal of the Royal Australasian Ornithologists Union and the leading journal in Australia devoted to original research and observation on the birds of the Australasian region. Of importance to all ornithologists and institutions because the avifauna is highly endemic with peculiarities of behaviour and breeding not usual elsewhere.

Dues: membership \$A15.00 p.a. (\$A17.00 1st year); institutions \$A25.00 p.a. (\$A27 1st year). All members and institutions subscribing receive THE EMU and the RAOU NEWSLETTER quarterly. The Union has recently published needed revisions of its 1926 Checklist of Australian Birds: *Checklist, Part I, Non-passerines* (\$A11.10) and an *Interim List* of passerines (\$A3.00).

Enquiries to the Secretary, RAOU, 119 Dryburgh St., North Melbourne, Vic. 3051.

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Florida State Museum, University of Florida, Gainesville, Florida 32611, by the following staff:

Editor, OLIVER L. AUSTIN, JR.; *Assistant Editor*, JUNE B. GABALDON

Associate Editors, WALTER BOCK (Reviews), HERBERT W. KALE, II (Periodical Literature), and JUDITH W. MCINTYRE (Index).

THE AUK welcomes original reports dealing with the biology of birds, and emphasizing the documentation, analysis, and interpretation of laboratory and field studies. Contributions dealing with theoretical or methodological developments also are encouraged, as are occasional reviews of existing information or ideas. Contributions are welcomed from throughout the world, but must be written in English.

Submit all contributions for Vol. 95 to the Editor-Elect, John A. Wiens, Department of Zoology, Oregon State University, Corvallis, Oregon 97331 USA.

SUGGESTIONS TO CONTRIBUTORS. Submit the typewritten original and two copies of the text, tables, illustrations, and all other material. *All typewritten material must be double-spaced* on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear Xerox or carbon reproductions. Number pages through the Literature Cited; include tables and legends for figures on separate unnumbered pages. Avoid footnotes.

The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted, followed by your present address, if different. The title of the paper should be concise and informative. The cover page should also include the name and full address of the individual to whom proof is to be sent.

Each Article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and (if any) English names of birds always should be given where first mentioned in the text, and should follow the A.O.U. Check-list of North American Birds (Fifth ed., 1957; 32nd Supplement, Auk 90:411-419; 33rd Supplement, Auk 93:875-879) or the appropriate equivalent unless departures are explained and defended. Metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors (CBE) Style Manual (Third ed., 1972. American Institute of Biological Sciences, 1401 Wilson Blvd., Arlington, Virginia 22209). Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971). In other matters of style the CBE Style Manual, the GPO Style Manual, and recent issues of *The Auk* will be helpful.

Tables, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings.

Illustrations (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. Copies accompanying the original for use of reviewers should be good quality reproductions of the original illustrations. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page.

Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ½ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 50% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Avoid bold, heavy, or ornate letters. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials.

In articles containing more than five references, the citations are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. For five or fewer references, cite them in the text following these examples: Sauer (1972, Auk 39: 717), or (Sauer 1972, Auk 39: 717). Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204-207). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials (1974, BioSciences Information Service of Biological Abstracts). Consult recent issues of *The Auk* and *The CBE Style Manual* for additional details. A more detailed set of instructions for contributors appeared in *The Auk*, Vol. 94, No. 1 (January 1977), copies of which are available upon request from the Editor-Elect.
