ERRATUM

In our paper "Female-female pairs and other unusual reproductive associations in Ring-billed and California gulls" (*Auk* 96: 6-9, 1979), we erroneously stated on page 8 that Ryder and Somppi (*Auk* 96: 1-5, 1979) had reported a 31% fertility rate for eggs from female-female pairs. The actual level of fertility should have been 66%, making their findings similar to our own.—MICHAEL CONOVER
