

# Behavioral Mechanisms in Ecology

*Douglass H. Morse*

"If I were able to express enthusiasm for only a single volume each year, this season's choice would be Morse's *Behavioral Mechanisms in Ecology* ... Morse, I believe, is the first in two decades to have provided an integrated treatment of the ecological problems of interest to ethologists which at the same time meets the criteria of scholarly thoroughness and accuracy ... The ideas and supporting (or dissenting) arguments and examples emerge clearly and economically ... An essential volume for ecologists!"

### FINE ANTIQUARIAN ORNITHOLOGY

Bernard Quaritch Limited, who have been trading in London since 1847, are major specialists in colour plate ornithological literature of the 18th and 19th century. Our clients include museums, ornithological institutes, university libraries and private collectors.

We hold a large stock of the better known illustrated bird books. At the moment this stock includes, inter alia: Gould's Humming Birds and Birds of Europe, Elliot's Monograph of the Pheasants, Schlegel's *Traite de Fauconnerie*, Sharpe's Monograph of the Birds of Paradise, Shelley's Monograph of the Sunbirds, Levaillant's *Histoire naturelle des Perroquets*, Edward's Natural History of Uncommon Birds, Mathew's Birds of Australia, Dresser's Birds of Europe and Monograph of the Rollers, David and Oustalet's *Oiseaux de la Chine* and Sclater's *Exotic Ornithology*.

We publish at least one general Natural History catalogue a year which includes ornithology. Please let us know if you would like to receive these catalogues and advise us of any particular item you require. We may have it in stock or be able to trace a copy for you.

## **The Falcons of the World**

By TOM J. CADE, with illustrations by R. DAVID DIGBY. Magnificently illustrated with 40 full-page color paintings, 4 double-spread paintings and 31 maps—all specially commissioned for this volume—this superb book by one of the world's leading experts on falcons is an indispensable reference which is certain to become a collector's item. (A Comstock Book) Large format. 44 color plates, 9 drawings, 31 maps, 8 tables. \$38.50

## **The Cotingas**

By DAVID W. SNOW, with illustrations by MARTIN WOODCOCK. The Cotingas may be the most spectacular of the exotic bird families of the American tropics. This is the first comprehensive treatment of the family Cotingidae in book form, and it has been put together by an expert with years of field experience. All 65 species are illustrated, many in splendid color paintings. Published in cooperation with the British Museum (Natural History). Large format. 22 color plates, 15 drawings, 30 maps, 8 tables. \$45.00

## **Estrildid Finches of the World**

By DEREK GOODWIN, with illustrations by MARTIN WOODCOCK. Because of their beauty, their fascinating display, and the ease with which some of them can be bred in captivity, the estrildid finches have long been popular cage and aviary birds. Here, in this generously illustrated volume, an eminent ornithologist offers authoritative information on all species of the family Estrildidae. Published in cooperation with the British Museum (Natural History). Large format. 8 color plates, 100 drawings, 100 maps. \$45.00

## **Pigeons and Doves of the World**

*Third Edition*

By DEREK GOODWIN, with illustrations by ROBERT GILLMOR. The previous two editions of this authoritative guide to all living or recently extinct species aroused a great deal of interest among professionals and amateurs alike. With the comprehensive revisions in this new edition, together with a number of new illustrations, this important reference remains the most complete work available on pigeons and doves. Published in cooperation with the British Museum (Natural History). Large format. 6 color plates, 148 drawings. \$39.50

# THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

*Editor:* JOHN A. WIENS, Department of Biology, University of New Mexico, Albuquerque, New Mexico 87131

*Assistant to the Editor:* JEAN FERNER

*Editorial Board:* WALTER BOCK, JAMES R. KING, HELMUT C. MUELLER, RICHARD L. ZUSI

*Associate Editors:* HERBERT W. KALE, II (Periodical Literature), WILLIAM E. SOUTHERN (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are welcomed from throughout the world, but must be written in English.

**SUGGESTIONS TO CONTRIBUTORS.** Submit the typewritten original and two copies of the text, tables, and all other material to the editor. Three copies of illustrations should be submitted. *All typewritten material must be double-spaced on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages through the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.*

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow the A.O.U. Check-list of North American Birds and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors (CBE) Style Manual, 4th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

*Tables*, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ⅓ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 50% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The Auk is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of The Auk and the CBE Style Manual for additional details.

A more detailed set of instructions for contributors appeared in the Auk, Vol. 99, No. 1 (January 1982), copies of which are available from the Editor.
