

AN ATLAS OF THE BIRDS OF THE WESTERN PALAEARCTIC

Colin Harrison

Expanding the artificial range usually studied by European ornithologists and birdwatchers, Colin Harrison includes in this volume 639 species, presented both in 3-color maps and in individual text, with another 167 extralimital species shown in full or in part on maps. The book covers the Himalayas, the Caucasus, the Atlas, and the eastern European plains, as well as western Europe.

320 pages. 673 maps + 810 illus. of birds.

STUDIES IN AVIAN BIOLOGY

A Publication of the Cooper Ornithological Society

Recently Published

ESTIMATING NUMBERS OF TERRESTRIAL BIRDS. EDITED BY C. JOHN RALPH AND J. MICHAEL SCOTT. OCTOBER 1981. 630 PP. STUDIES IN AVIAN BIOLOGY No. 6. This publication of the proceedings of a symposium held in October 1980 features more than 100 original contributions by participants from a number of countries. Included are a reader's guide, introductions and summaries to each of the several sections, and a comprehensive bibliography.

ANNUAL VARIATION OF DAILY ENERGY EXPENDITURE BY THE BLACK-BILLED MAGPIE: A STUDY OF THERMAL AND BEHAVIORAL ENERGETICS. BY JOHN N. MUGAAS AND JAMES R. KING. MAY 1981. 78 PP. STUDIES IN AVIAN BIOLOGY No. 5. This analysis of energy expenditure by the Black-billed Magpie through one annual cycle in eastern Washington is the result of integrated field and laboratory study. Principal topics considered include the thermal environment and its influence on the biology of the magpie and energy budgeting in the annual cycle, followed by a discussion of these in relation to other aspects of the ecology and behavior of the species and a comparison with other species.

STATUS AND DISTRIBUTION OF ALASKA BIRDS. BY BRINA KESSEL AND DANIEL D. GIBSON. NOVEMBER 1978. 100 PP. SAB No. 1. Brings up to date the knowledge of distribution and occurrence of birds of Alaska, based on published and unpublished records since Gabrielson and Lincoln's *The Birds of Alaska*, 1959 \$9.00

SHOREBIRDS IN MARINE ENVIRONMENTS. EDITED BY FRANK A. PITELKA. JUNE 1979. 261 PP. SAB No. 2. A collection of 25 papers by 39 authors, resulting from a 1979 symposium sponsored by the Pacific Seabird Group. Research reported focuses on the Pacific Coast, from Alaska to California but with reports from Peru, Costa Rica, England, and the northeastern American coast. The papers are divided into two sections, each with a summary: Distribution, Migration, and Conservation (15) and Ecology (9) out of print

BIRD COMMUNITY DYNAMICS IN A PONDEROSA PINE FOREST. BY ROBERT C. SZARO AND RUSSELL P. BALDA. OCTOBER 1979. 66 PP. SAB No. 3. Analysis of breeding bird communities on clear cut, uniform cut, silviculturally cut, and control plots in the Coconino National Forest near Flagstaff, Arizona, during three years of study \$6.50

THE AVIFAUNA OF THE SOUTH FARALLON ISLANDS, CALIFORNIA. BY DAVID F. DESANTE AND DAVID G. AINLEY. APRIL 1980. 104 PP. SAB No. 4. Based on over 11 years of daily observations by Point Reyes Bird Observatory personnel, this work summarizes all known data for the 346 species of birds occurring on or around the islands; 223 are freshwater or terrestrial forms, for a landmass of 0.41 km², 32 km from the northern California coast \$10.00

FINE ANTIQUARIAN ORNITHOLOGY

Bernard Quaritch Limited, who have been trading in London since 1847, are major specialists in colour plate ornithological literature of the 18th and 19th century. Our clients include museums, ornithological institutes, university libraries and private collectors.

We hold a large stock of the better known illustrated bird books. At the moment this stock includes, inter alia: Gould's Humming Birds and Birds of Europe, Elliot's Monograph of the Pheasants, Schlegel's Traite de Fauconnerie, Sharpe's Monograph of the Birds of Paradise, Shelley's Monograph of the Sunbirds, Levaillant's Histoire naturelle des Perroquets, Edward's Natural History of Uncommon Birds, Mathew's Birds of Australia, Dresser's Birds of Europe and Monograph of the Rollers, David and Oustalet's Oiseaux de la Chine and Sclater's Exotic Ornithology.

We publish at least one general Natural History catalogue a year which includes ornithology. Please let us know if you would like to receive these catalogues and advise us of any particular item you require. We may have it in stock or be able to trace a copy for you.

BIRDS OF BRAZIL IDENTIFICATION GUIDE

Now it's easy to discover the name of any Brazilian bird. In this book, J.D. Frisch gives the scientific name, the popular names (in Portuguese, Spanish and English) along with the habits and more than 1,560 drawings that facilitate identification by illustrating the original colors. Printed in Italy by Mondadori, this bestseller in its field, now includes an Addendum translating the major parts of the text into English.

THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: JOHN A. WIENS, Department of Biology, University of New Mexico, Albuquerque, New Mexico 87131

Assistant to the Editor: JEAN FERNER

Editorial Board: WALTER BOCK, JAMES R. KING, HELMUT C. MUELLER, RICHARD L. ZUSI

Associate Editors: HERBERT W. KALE, II (Periodical Literature), WILLIAM E. SOUTHERN (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are welcomed from throughout the world, but must be written in English.

SUGGESTIONS TO CONTRIBUTORS. Submit the typewritten original and two copies of the text, tables, and all other material to the editor. Three copies of illustrations should be submitted. *All typewritten material must be double-spaced* on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages through the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow the A.O.U. Check-list of North American Birds and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors (CBE) Style Manual, 4th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

Tables, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ⅓ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 50% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The Auk is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of *The Auk* and the CBE Style Manual for additional details.

A more detailed set of instructions for contributors appeared in the *Auk*, Vol. 99, No. 1 (January 1982), copies of which are available from the Editor.

ORNITHOLOGICAL MONOGRAPHS

Order from Glen E. Woolfenden, Assistant to the Treasurer A.O.U., Department of Biology, University of South Florida, Tampa, Florida 33620. All orders must be prepaid and include a \$0.50 handling charge. Prices to AOU members are given in parentheses.

- No. 1. *A Distributional Study of the Birds of British Honduras*, by Stephen M. Russell. 1964. \$7.00 (\$5.50).
- No. 2. *A Comparative Study of Some Social Communication Patterns in the Pelecaniformes*, by Gerard Frederick van Tets. 1965. \$3.50 (\$2.50).
- No. 3. *The Birds of Kentucky*, by Robert M. Mengel. 1965. \$15.00 (\$12.50).
- No. 6. *Adaptations for Locomotion and Feeding in the Anhinga and the Double-crested Cormorant*, by Oscar T. Owre. 1967. \$6.00 (\$4.50).
- No. 7. *A Distributional Survey of the Birds of Honduras*, by Burt L. Monroe, Jr. 1968. \$14.00 (\$11.00).
- No. 9. *Mating Systems, Sexual Dimorphism, and the Role of Male North American Passerine Birds in the Nesting Cycle*, by Jared Verner and Mary F. Willson. 1969. \$4.00 (\$3.00).
- No. 10. *The Behavior of Spotted Antbirds*, by Edwin O. Willis. 1972. \$9.00 (\$7.50).
