Each issue of the QRB contains

- major review articles that describe, synthesize, and evaluate developments in the fields under discussion
- the largest book-review section in the life sciences of any journal in the world (an average of 130 books are evaluated per issue)—a superb survey of what is going on across the entire breadth of biology
- commentaries on topics of special interest to biologists and on controversies in biological circles.

## Ecological Aspects of Social Evolution

Birds and Mammals

Edited by *Daniel I. Rubenstein*  
and *Richard W. Wrangham*

Seeking common principles of social evolution in different taxonomic groups, the contributors to this volume discuss eighteen groups of birds and mammals for which long-term field studies have been carried out. They examine how social organization is shaped by the interaction between proximate ecological pressures and "culture" — the social traditions already in place and shaped by local and phylogenetic history. Strategies of females and males are analyzed separately with respect to avoiding predators and obtaining access to both environmental resources and mates.

P: \$23.50. C: \$65.00

## Ecology and Evolution of Darwin's Finches

*Peter R. Grant*

After his famous visit to the Galápagos Islands, Darwin speculated that "one might really fancy that, from an original paucity of birds in this archipelago, one species had been taken and modified for different ends." This book is a comprehensive effort to demonstrate how much has been since learned about the evolution of these remarkable birds. It brings a broad range of material to bear on central problems of evolution, emphasizing the role of interspecific competition and of forces of natural selection acting strongly enough on genetic variation in contemporary populations to produce observable and measurable evolutionary change.

## Lovebirds, Cockatiels, Budgerigars: BEHAVIOR AND EVOLUTION

by *J. Lee Kavanau*

University of California at Los Angeles

*Guided by unique, exhaustive laboratory studies of psittacine behavior, the author has deduced an insightful and remarkably comprehensive scenario of many aspects of the origin and evolution of birds and the roots of their behaviors....must reading for all interested in avian behavior and reproduction.....a wealth of information and concepts that will be of interest to all evolutionists.* Professor E.C. Olson

Feb., 1987

1,005 pp., 7 indices, 1,455 refs.

\$69

- A broad analysis and synthesis of avian evolution guided by newly discovered, relict reproductive behavior of small parrots that yields insights into ancestral habits of nesting and egg care.
- Courtship, pair bonding, coitus, nesting, egg recovery, incubation, allofeeding and brooding of young, and familial interactions.
- Laboratory care, general biology, morphology, reproductive physiology, endocrinology, neurology, pathology, developmental biology, ecology, biogeography, paleological correlates, and comparisons with reptiles and other vertebrates.

Prepay only, check or money order. Add U.S. \$4 for postage and handling within, or \$6 outside, continental U.S. In California add \$4.50 for sales tax. Mail orders only.

## LOOKING FOR SOMETHING ?

The American Ornithologists' Union offers  
Six Invaluable Source Books

The Check-List of North American Birds  
Sixth Edition - 1983

Habitats and distributions for species  
from the Arctic through Panama (West Indies  
and Hawaii). 1985 supplement included.  
\$38.00 (\$29.00 for AOU members)

Ornithology in the Neotropics:  
A Directory 1985

Current research activities, conservation  
projects, regulations in more than 40 countries.  
More than 400 organizations listed with names of  
people to contact for information.  
\$10.00 (\$7.50 for AOU members)

Specimen Inventory Series

World Inventory of Avian Spirit Specimens, 1982. \$25.00  
Revised World Inventory of Avian Skeletons, 1986. \$40.00  
Inventory of Bird Egg Collections of North America, 1985. \$40.00  
World Inventory of Avian Anatomical Specimens:  
Geographical Analysis. 1984. \$30.00

The holdings of more than 90 museums around the world  
are given. The geographical analysis lists avifaunas for  
60 areas, covering the world.

# THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

*Editor:* ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06268.

*Copy Editor:* K. ELIZABETH K. PACALA

*Editorial Board:* J. F. LYNCH, D. MOCK, R. B. PAYNE

*Associate Editors:* FRED E. LOHRER (Periodical Literature), M. ROSS LEIN (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are encouraged from throughout the world, but must be written in English.

**SUGGESTIONS TO CONTRIBUTORS.** Submit the typewritten original and two copies of the text, tables, and all other material to the Editor. Three copies of illustrations should be submitted. *All typewritten material must be double-spaced* on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages through the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow the A.O.U. Check-list of North American Birds and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors (CBE) Style Manual, 4th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

*Tables*, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ½ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 50% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The Auk is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of The Auk and the CBE Style Manual for additional details.

**A more detailed set of instructions for contributors appeared in the Auk, Vol. 99, No. 1 (January 1982), copies of which are available from the Editor.**
