

# "A True Collector's Item"

## 'Birds of Burma'

... although in constant demand it has remained out of print since 1953 and has sold for considerable sums for a relatively modern book. . .

### LIMITED

There are two versions of this fully revised third edition.

A special full leather edition with gold lettering and in a slip case. This edition is limited to 200 copies for North America.

A standard edition bound in Baladek (simulated leather) with a laminated jacket.

This edition is limited to 1500 copies for North America.

### CORNERSTONE

... a true encyclopedia, the most reliable reference available today . . . long awaited, it deserves to be the cornerstone of your bird book library.

### MASSIVE

This stunning 13" x 9" reference features 530 pages including a 64 page full colour section spotlighting 291 species both rare and familiar. No other book showcases such a wide diversity of the birds to be found in Burma.

### THE BOOK

... the species covered include parrots, pigeons, pheasants, peacocks, marsh birds, ducks, storks, eagles, spider hunters, sunbirds, flowerpeckers, bee-eaters, hornbills, flycatchers and many many more.

**Lovebirds, Cockatiels, Budgerigars:  
BEHAVIOR AND EVOLUTION**

by J. Lee Kavanau  
University of California at Los Angeles

*Guided by unique, exhaustive laboratory studies of psittacine behavior, the author has deduced an insightful and remarkably comprehensive scenario of many aspects of the origin and evolution of birds and the roots of their behaviors.....must reading for all interested in avian behavior and reproduction.....a wealth of information and concepts that will be of interest to all evolutionists. Professor E.C. Olson*

Feb., 1987      1,005 pp., 7 indices, 1,455 refs.      \$69

- A broad analysis and synthesis of avian evolution guided by newly discovered, relict reproductive behavior of small parrots that yields insights into ancestral habits of nesting and egg care.
- Courtship, pair bonding, coitus, nesting, egg recovery, incubation, allofeeding and brooding of young, and familial interactions.
- Laboratory care, general biology, morphology, reproductive physiology, endocrinology, neurology, pathology, developmental biology, ecology, biogeography, paleological correlates, and comparisons with reptiles and other vertebrates.

**Companion to *A Sand County Almanac***  
Interpretive and Critical Essays

*Edited by J. Baird Callicott*

Aldo Leopold's *A Sand County Almanac* is the bible of the modern American conservation movement, its capstone essay, "The Land Ethic," repeatedly invoked by scholars, professionals, and environmentally-aware citizens everywhere. This collection of articles represents the first sustained study of Leopold's seminal book as a work of art, philosophy, and social commentary. It will serve to enrich the general reader's appreciation of a favorite literary friend while it provides new information and thoughtful analysis for environmental scholars, managers, and planners.

**Bird Conservation, No. 3**

*Edited by Jerome Jackson*

The contributors to this volume detail some of North America's most unique—and troubled—ecosystems. Topics range from changing Appalachian forest bird populations and acid rain to large-scale changes in bird populations in northwestern California. Also included are updates on ICBP activities and a bibliography of current efforts in bird conservation.

# THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

*Editor:* ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06268.

*Copy Editor:* K. ELIZABETH K. PACALA

*Editorial Board:* J. F. LYNCH, D. MOCK, R. B. PAYNE

*Associate Editors:* FRED E. LOHRER (Periodical Literature), M. ROSS LEIN (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are encouraged from throughout the world, but must be written in English.

**SUGGESTIONS TO CONTRIBUTORS.** Submit the typewritten original and two copies of the text, tables, and all other material to the Editor. Three copies of illustrations should be submitted. *All typewritten material must be double-spaced on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages through the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.*

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow the A.O.U. Check-list of North American Birds and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors (CBE) Style Manual, 4th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

*Tables*, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ⅓ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 50% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The Auk is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of The Auk and the CBE Style Manual for additional details.

A more detailed set of instructions for contributors appeared in the Auk, Vol. 99, No. 1 (January 1982), copies of which are available from the Editor.
