THESE BOOKS ARE FOR THE BIRDERS!

THE ATLAS OF BREEDING BIRDS IN NEW YORK STATE

Edited by ROBERT F. ANDRLE and JANET R. CARROLL. This easy-to-use reference, generously illustrated by leading nature artists, gives instant information about 238 birds native to New York State and provides an entirely new computer-generated database. The core of the atlas is a series of accounts of species; each account includes a distribution map and information on the species. On the same page is an illustration of the bird, usually with its nest and young. Eight supplementary acetate map overlays, showing ecozones, elevations, mean

temperatures, precipitation, potential forest type and forest cover, river systems, and Federal and state wildlife areas and counties, may be purchased separately. 250 maps, 242 illustrations, 3 tables. \$29.95. Map overlays \$9.95. *Available in June*

THE WORLD OF NORTHERN EVERGREENS

By E. C. PIELOU. Pielou outlines the identifying features of the evergreens of the northern United States and Canada, describes their reproduction and growth, and assesses the impact of fire, wind, snow, ice, clear-cutting, and air pollution. She also introduces the reader to the flora and fauna of the northern evergreen forests—from birds and mammals to insects and fungi. Clearly written and handsomely illustrated, her book will inform and interest professionals, students, and nature lovers. 140 line drawings. \$10.95 paper; \$36.50 cloth. *Available in May*

Ibis Books, Now Available from Cornell

LIFE OF THE WOODPECKER

By ALEXANDER F. SKUTCH. Illustrated by DANA GARDNER. Many woodpeckers live in groups that closely resemble the ideal monogamous human family; like humans, they maintain dwellings throughout the year, as few birds do. In this profusely illustrated volume, an eminent ornithologist affords us an intimate view of this most unusual family of birds, based on his forty years of field study. 62 color illustrations, 2 maps. \$49.95

A BIRDER'S GUIDE TO JAPAN

By JANE WASHBURN ROBINSON. Specifically designed to help readers who don't know Japanese to find their way to Japan's best birding areas, this book identifies places where scarce and highly local species occur. Robinson offers travel information, tips on how to fit into the Japanese culture and detailed site guides to Hokkaido, Honshu, Kyushu, and five other islands. 57 maps. \$14.95 paper

CORNELL UNIVERSITY PRESS 124 Roberts Place, Ithaca, NY 14850

monumental---enormous---vast---massive---complete---exhaustive---remarkably comprehensive---unique---highly informative---very important---must reading---intriguing---fascinating---excellent reference---will use almost daily---absolutely pertinent---wealth of information and concepts

Lovebirds, Cockatiels, Budgerigars: BEHAVIOR and EVOLUTION

by J. Lee Kavanau, UCLA

...highly informative volume...actually several books under one cover....[the author has] enormous experience with the raising of these birds.....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard U.

Guided by unique, exhaustive laboratory studies of psittacine behavior, the author has achieved an insightful and remarkably comprehensive scenario of many aspects of the origin and evolution of birds & the roots of their behaviors....must reading for all interested in avian behavior and reproduction.....a wealth of information and concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA

.....enormous amount of information....very important contribution to..study of behavior of parrot birds, about which so little is known.... Prof. K. Immelmann, U. Bielefeld

...monumental in its scope....much fascinating reading...many intriguing subjects....enormous project....excellent reference for..experimental behavior or evolutionary science.....I am looking forward to..in-depth study &..to apply [the author's] concepts to every-day aviculture & avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987

...complete study of..groups mentioned....massive..undertaking...vast amount of information...absolutely pertinent to those..who..maintain and breed these birds...reference work that..breeders & aviculturists will use almost daily. Amer. Cage-Bird Mag., Oct., 1987

March, 1987, xxvi + 1,001 pp., 7 indices, 1,455 refs., \$49.95
Prepay ck. or m/o. Add \$4 p/h (\$6 outside U.S.) + \$3.25 Calif. s/t.

The latest volumes in . . .

CURRENT ORNITHOLOGY

edited by Richard F. Johnston

From reviews of Volume 1:

"... an important and welcome new series . . ."
—*The Quarterly Review of Biology*

"... an outstanding collection. . . . If this volume doesn't contain the issue of your dreams, the next one may."
—*The Auk*

This series presents timely reviews, overviews, and essays on research topics of current interest in avian biology.

Volume 5

CONTENTS: Form and function in avian flight. Magnetic orientation in birds. Temporal patterns of pair formation and reproduction in annual cycles and associated endocrinology in waterfowl. Female-biased philopatry, monogamy, and the timing of pair formation in migratory waterfowl. Colony formation in seabirds. Mitochondrial DNA of birds. Nongame bird conservation. Experimental design in ornithology. Description of bird behavior for comparative purposes. Indexes.

0-306-42722-2/436 pp./ill./1988/\$59.50

Volume 4

CONTENTS: Evolutionary processes and patterns of geographic variation in birds. The heritability concept applied to wild birds. History of the Australian avifauna. Clutch size in nidicolous birds. Competition in breeding birds: on the importance of considering processes at the level of the individual. Distribution and abundance of the dickcissel. A bibliography of ornithological translations. Indexes.

0-306-42352-9/338 pp./ill./1986/\$49.50

Volumes 1-3 are available.

“A True Collector’s Item”

‘Birds of Burma’

... although in constant demand it has remained out of print since 1953 and has sold for considerable sums for a relatively modern book. . .

LIMITED

There are two versions of this fully revised third edition.

A special full leather edition with gold lettering and in a slip case. This edition is limited to 200 copies for North America.

A standard edition bound in Baladek (simulated leather) with a laminated jacket. This edition is limited to 1500 copies for North America.

CORNERSTONE

... a true encyclopedia, the most reliable reference available today . . . long awaited, it deserves to be the cornerstone of your bird book library.

MASSIVE

This stunning 13" x 9" reference features 530 pages including a 64 page full colour section spotlighting 291 species both rare and familiar. No other book showcases such a wide diversity of the birds to be found in Burma.

THE BOOK

... the species covered include parrots, pigeons, pheasants, peacocks, marsh birds, ducks, storks, eagles, spider hunters, sunbirds, flowerpeckers, bee-eaters, hornbills, flycatchers and many many more.

MAIL YOUR ORDER TODAY!

One Man's Owl

BY BERND HEINRICH

One Man's Owl

Bernd Heinrich

One Man's Owl invites the reader to share in the experience of watching a great horned owl that Bernd Heinrich adopted during a late spring snow when it was too young to fly or survive by itself. Combining reflections on natural history with a journal of the owl's development, the book is an engaging chronicle of how the author and "Bubo" came to know one another over three summers spent in the Maine woods, and how Bubo eventually grew into an independent hunter.

One Man's Owl, including the author's own drawings and photographs, is a compelling journal of field research and personal observations that makes a strong case for the conservation of our natural resources. Cloth: \$19.50 ISBN 0-691-08470-X

Population Ecology of the Cooperatively Breeding Acorn Woodpecker

Walter D. Koenig and Ronald L. Mumme

Since the acorn woodpecker was first observed, its behavior—particularly the unique habit of caching acorns in specialized storage trees or granaries—has impressed observers. Acorn woodpeckers are also one of the few temperate-zone species in which young are reared communally. This demographic study investigates the complexities of acorn storage and group living in acorn woodpeckers in central coastal California. It is one of the most thorough studies of any avian social system to date.

The Book of Naturalists

An Anthology of the Best Natural History Edited by *William Beebe*

Anyone curious about animals, nature, or the history of biology will find much of interest in this ample and varied collection. Reflecting his infectious enthusiasm for "the best natural history," Beebe's personal assortment of favorites includes excerpts from massive sources, such as Audubon and Darwin, and intriguing pieces from lesser known authors most of us would not normally encounter. Arranged in chronological order, the small masterpieces here range from Aristotle to Rachel Carson. Each of them is introduced by an incisive and sometimes humorous description of its author. This is a book for browsing; a book filled with pleasurable reading.

Paper: \$12.50 ISBN 0-691-02408-1 Cloth: \$45.00 ISBN 0-691-08466-1

Woodcut from Aldrovandi's *Monstrorum Historia* (1642) in the Kenneth Spencer Research Library, University of Kansas. Typefaces are *Libra* (based on a medieval uncial manuscript) and *Bembo* (inspired by an Italian Renaissance letterform first used in 1495).

THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06268.

Copy Editor: K. ELIZABETH K. PACALA

Associate Editors: FRED E. LOHRER (Periodical Literature), M. ROSS LEIN (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are encouraged from throughout the world, but must be written in English.

SUGGESTIONS TO CONTRIBUTORS. Submit the typewritten original and two copies of the text, tables, and all other material to the Editor. Three copies of illustrations should be submitted. *All typewritten material must be double-spaced on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages through the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.*

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow the A.O.U. Check-list of North American Birds and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors (CBE) Style Manual, 5th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

Tables, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ⅓ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 50% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The Auk is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of *The Auk* and the CBE Style Manual for additional details.

A more detailed set of instructions for contributors appeared in *The Auk*, Vol. 105, No. 1 (January 1988), copies of which are available from the Editor.
