

Delightful Books

Two by ALEXANDER F. SKUTCH
with Illustrations by DANA GARDNER

Life of the Tanager

"Dr. Skutch's gracefully written account of the tanagers—their ways and place in the ecosystem, is adorned by Mr. Gardner's vivid paintings in which the profusion of jungle flower and leaf complements the endless variety and charm of the tanagers. An outstanding book!"—Dean Amadon. 19 line drawings, 24 colorplates. \$36.50

Life of the Woodpecker

This is the only book for the general reader which deals authoritatively with these remarkable birds. "Skutch is a rare breed, a knowledgeable scientist who writes with charm and grace."—*The Living Bird Quarterly*. 62 color plates. \$49.95

The Sea and the Ice

A Naturalist in Antarctica

By LOUIS J. HALLE. *New in paper!* "Mr. Halle's chief interest is the sea birds of the region, such as the Wandering Albatross and various petrels, but he also includes a good deal of Antarctic lore. A thoroughly pleasurable book."—*New York Times Book Review*. 28 b&w illus. \$12.95 paper

The Atlas of Breeding Birds in New York State

Edited by ROBERT F. ANDRLE and JANET R. CARROLL. This generously illustrated, reference gives instant information on 238 species that breed in New York State. \$29.95 cloth. 242 b&w illus., 250 maps. Eight acetate overlays \$12.95

A Birder's Guide to Japan

By JANE WASHBURN ROBINSON. "An excellent guide not only to where to find the birds in this diverse country but to some of the customs and habits of the people who live there."—*Indiana Audubon Quarterly*. "Absolutely necessary. . . . Take this book when you go."—*Auk*. 56 maps. \$14.95 paper

Painting

C O R N E L L

**1989 CENTENNIAL MEETING OF THE
AMERICAN SOCIETY OF ZOOLOGISTS
AND
AMERICAN MICROSCOPICAL SOCIETY,
ANIMAL BEHAVIOR SOCIETY,
THE CRUSTACEAN SOCIETY,
INTERNATIONAL ASSOCIATION OF ASTACOLOGY,
AND SOCIETY OF SYSTEMATIC ZOOLOGY**

Marriott Copley Place • Westin Copley Place • Copley Plaza Hotel
Boston, Massachusetts — December 27-30

Abstract Deadline: August 4, 1989 Call for Papers: April, 1989 for Oral and Poster Presentations.
Note that posters are particularly encouraged, and the ASZ Division of History and Philosophy of Biology
welcomes posters as a second paper.

Schedule for December 27, 28 and 29: Plenary Lectures • Oral Papers • Poster Presentations

Schedule for December 30: Society/Divisional Symposia and Workshops plus Elephant and the
Blind Zoologists Program

PLENARY LECTURES DECEMBER 27, 28 AND 29:

Wednesday, December 27

EMERGING SYSTEMS: COMPONENTS OF ORGANISMS INCLUDING IONS, MOLECULES, GENES AND CELLS
(Keith Porter, Joseph Bonaventura, Gary W. Litman, and Lynn Margulis)

Thursday, December 28

ORGANISMS AS INTEGRATED SYSTEMS: CELLS, ORGANS, TISSUES
(Hugh Huxley, Howard A. Bern, Berta Scharrer and Marvalee H. Wake)

Friday, December 29

ORGANISMAL SYSTEMS: ANIMALS AND BEHAVIOR
(George O. Mackie, Masakazu Konishi, Stephen J. Gould and E.O. Wilson)

Art, Book and Instrument Exhibits at the
Westin Hotel and Harvard University.

Programs on Public Affairs, Ethics, and
Tools and Technologies

ASZ Symphony Orchestra
Impersonation of Charles Darwin by Richard Eakin

Socials include a party at the New England Aquarium,
closing banquet honoring international guests,
and the Third Annual Endowment Auction

Meeting Hosted by Harvard University
and Northeastern University
Karel F. Liem and Kenneth P. Sebens
Co-Chairpersons of the Local Arrangements Committee

For more information, contact:
Mary Adams-Wiley, Executive Officer
American Society of Zoologists
104 Sirius Circle, Thousand Oaks, CA 91360

AIR NEW ZEALAND

INVITES YOU TO CHRISTCHURCH
for the 20th International Ornithological Congress
2-9 December 1990

The IOC logo bird is flightless, but that
doesn't mean you have to be!

**FLY WITH US . . . and enjoy the excitement
and bird life of beautiful New Zealand**

Air New Zealand is the AOU's official carrier to the Christchurch IOC,
and is proud of its contribution to the AOU's SecondCentury Campaign.

We suggest you book your flight at least 6 months in advance.
Contact your local travel agent or Air New Zealand,
(800) 262-1234, soon!

Process Bird Sightings With WORLD BirdBase

Easy entry of sightings and comments, using Clements' 1989-updated list of scientific and common names of every world species plus a name finding facility. Species can be added, split, combined, or renamed. Versatile display of taxonomically sorted sightings, with selection by: faunal zone, country or area, state or province, trip or place, special feature, species, first sightings only, date, or any combination. All displays can be shown on screen, printed, or written to disk files readable by word processors, spread sheets, etc. Nearly 33,000 sightings can be stored in any directory, and occupy only about 2 M bytes of disk space. The program requires an IBM-compatible PC with 640 K bytes of RAM memory and a hard disk. Send your check or major-organization purchase order for US\$99.00 (with 6% tax if CA order) plus US\$5.00 s&h (US\$10.00 if foreign order). Request 3.5 inch disks if needed for drive A of your computer.

NEW

THE AMERICAN CROW AND THE COMMON RAVEN

Lawrence Kilham

Illustrations by Joan Waltermire

LAWRENCE KILHAM SPENT FIVE YEARS studying the crow population on a Florida cattle ranch where years of isolation and successful wildlife preservation had largely erased fear of humans. At his New England home he continued to observe crows and began studying ravens. In thoughtful prose, Kilham describes his discovery that American crows are cooperative breeders, with a number of adult crows helping the breeding pair in nesting and fledging. And in greater detail than has been published to date, he discusses how crows maintain group territories, store food while nesting and at other times as well, attack young or weakened mammals, and make many unusual vocalizations audible only at close range. The author's observations of these birds' remarkable intelligence and ability are enlightening as well as entertaining. Of special interest are his delightful accounts of his pet crows and of the young raven he rescued and then raised. With discussions backed by an extensive survey of international literature on crows and ravens, Kilham's study will appeal to professional as well as amateur ornithologists. 7x10. 272 pp. 5 b&w photos. 12 line drawings. \$29.50

A25

Selected topics of interest in:

Lovebirds, Cockatiels, Budgerigars: **BEHAVIOR and EVOLUTION**

by J. Lee Kavanau, UCLA

---origin and distribution of parrots---avian behavior & avian brain--relict egg care & primitive nesting habits--evol'y sequence of mechanisms of predation--evol'y transition to avian ovipositional modes---follicular maturation & recapitulation---transition to herbivory---divergences in avian & mammalian lineages---synthesis of avian evolution

...highly informative volume...actually several books under one cover....[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new.

Prof. Ernst Mayr, Harvard U.

...unique, exhaustive laboratory studies of..behavior....insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors...must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists.

Prof. E. C. Olson, UCLA

....enormous amount of information....very important contribution to..study of behavior of parrot birds, about which so little is known....

Prof. K. Immelmann, U. Bielefeld

...monumental in..scope...much fascinating reading...many intriguing subjects....enormous project....excellent reference for..experimental behavior or evolutionary science....looking forward to..in-depth study &..to apply [the author's] concepts to...aviculture and avian veterinary medicine.

G. J. Harrison, DVM, Bird World, Nov., 1987

....offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality.

Auk, July, 1988

March, 1987, xxvi + 1,001 pp., 7 indices, 1,455 refs., \$49.95
Prepay ck. or m/o. Add \$4 p/h (\$6 outside U.S.) + \$3.25 Calif. s/t.

Order from: **Max C. Thompson**, Assistant to the Treasurer A.O.U., Department of Biology, Southwestern College, 100 College Street, Winfield, KS 67156. Orders must be **prepaid**, in U.S. dollars; add **5 percent** (minimum \$2.00) handling and shipping charge. Make checks payable to American Ornithologists' Union. Prices in parentheses are for **A.O.U. members**.

THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06268.

Copy Editor: GAIL W. HUNTER

Associate Editors: FRED E. LOHRER (Periodical Literature), M. ROSS LEIN (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are encouraged from throughout the world, but must be written in English.

SUGGESTIONS TO CONTRIBUTORS. Submit the typewritten original and two copies of the text, tables, and all other material to the Editor. Three copies of illustrations should be submitted. *All typewritten material must be double-spaced on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins.* Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages through the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow *The A.O.U. Checklist of North American Birds* and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors' *CBE Style Manual*, 5th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

Tables, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ⅓ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 70% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The Auk is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of *The Auk* and the *CBE Style Manual* for additional details.

A more detailed set of instructions for contributors appeared in *The Auk*, Vol. 105, No. 1 (January 1988), copies of which are available from the Editor.

Bioacousticians

Your workstation is here.

The DSP Sona-Graph™, model 5500 is a signal analysis workstation designed for the acquisition, processing and display of time-varying biological signals. The 5500 acquires, analyzes and displays signals in real-time with a continuous scrolling display, combining the features of a real-time spectrograph, a high-speed dual channel FFT and a computer-based data acquisition system.

It's a "wish list" workstation for the bioacoustician. The 5500 includes digital anti-aliasing filters, 16 bit A/D and 1.5 Mbytes of ROM storage for signal processing programs. Designed with you in mind, the 5500 provides up to 8 Mbytes of signal storage (one or two signals), on-screen cursors, extensive editing, high fidelity playback and computer interface capabilities.

- ✓ Two channel simultaneous display
- ✓ Real-time to 32 kHz
- ✓ Continuous thermal printing
- ✓ On-screen noise reduction feature
- ✓ High resolution color / grey scale display
- ✓ High fidelity playback and editing

To find out more about using the DSP Sona-Graph in your work, call **Robert McClurkin** at 800-289-5297 or write to the address listed below.
