

Just in time for Holiday giving...

THE GAME BIRDWATCHERS ARE WATCHING.

Introducing the new interactive VCR/board game that's a competitive challenge for birders and a delightful introduction for non-birders.

It's both a fascinating and endlessly entertaining game, as well as a superb method of learning field identification from the comfort of your armchair.

You'll observe and learn to identify over 350 species in their natural habitats, as actress-birder Jane Alexander, comedian-birder Bill Oddie and naturalist-author Peter Alden take you on the ultimate avian adventure through 100 birding hotspots of North America.

Beautifully produced with over two hours of magnificent video action by top wildlife cinematographers, *Gone Birding!* is a game you'll cherish. Features a Big Day competition with exciting prizes including a nature safari to Africa.

For 1-6 players of all ages.

Here's what the critics are saying...

"...a serious effort that could revolutionize the teaching of bird identification. Look out ornithology class, we're moving into the 21st century."

BIRDER'S WORLD

"This is the most effective and enjoyable way ever devised for novice and mid-level birders to become expert at field identification."

BIRD WATCHER'S DIGEST

"*Gone Birding!* is challenging, informative and very well-conceived."

**PETER MATTHIESSEN, Author of
*The Snow Leopard, Far Tortuga,
and Wildlife in America***

"The *Gone Birding!* VCR game is...far more instructive than any field guide can be... The video's quality is most impressive. You definitely don't have to be a birder to enjoy this game! I'm expecting to enjoy *Gone Birding!* for years."

BIRD OBSERVER MAGAZINE

GONE BIRDING!

A video adventure in bird identification.™

Lovebirds, Cockatiels, Budgerigars: BEHAVIOR & EVOLUTION

by J. Lee Kavanau, UCLA

- ▶...highly informative volume...actually several books under one cover...[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard Univ.
- ▶...unique, exhaustive laboratory studies of..behavior....insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors....must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA
- ▶....enormous amount of information....very important contribution to..study of behavior of parrot birds, about which so little is known... Prof. K. Immelmann, Univ. Bielefeld
- ▶...monumental in..scope...much fascinating reading...many intriguing subjects....enormous project....excellent reference for..experimental behavior or evolutionary science...looking forward to..in-depth study &..to apply [the author's] concepts to...aviculture and avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987
- ▶...offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality. Auk, July, 1988
- ▶.....scope..is impressive.....information conveyed..is almost overwhelming.....comprehensive discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution of all birds.....extremely detailed discussion of the avian brain.....fascinating ideas on the evolution of bird reproductive behavior.....should provide much fuel for thought & some debate among students of avian evolution.....detailed descriptions of captive bird breeding and experimentation provide numerous ideas for..research on captive birds..... a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

Bird Trapping and Bird Banding

by Hans Bub, Frances Hamerstrom and Karin Wuertz-Schaefer
Most drawings bei Winfried Noll and Eitel Raddatz

*

448pp. approx · 456 photos and line drawings, 1 col. frontispiece · 6 1/2" × 9 1/2" ·
clothbound 98,00 DM approx. · ISBN 3-7403-0231-3

The most comprehensive book on bird trapping in this century, and since scientific bird banding exists. 456 illustrations show the wide spectrum of possibilities by which many bird species can be captured for banding and therewith for the work on the field of ornithology. George M. Jonkel, Chief Bird Banding Laboratory U.S. Fish and Wildlife Service Laurel, says in the foreword: "This book is primarily about live bird capture, but also includes other informations useful and interesting to professional and amateur ornithologists."

New From Princeton

Revised Edition

A Guide to the Birds of Puerto Rico and the Virgin Islands

Herbert A. Raffaele

"This well-written book is the first comprehensive guide to the birds of Puerto Rico and the Virgin Islands. All species, including winter visitors (which comprise 47 percent of the avifauna) are described and illustrated, making a second volume for identification of North American migrants unnecessary. . . . Aside from being a fine field guide, the book contains useful summaries of the biogeography of the region and the ecology of avian populations. . . . A major contribution is Raffaele's presentation of a wealth of hitherto unpublished information on the natural history of the region's birds." —*James W. Wiley, Ibis*

25 color plates, 16 b&w plates, 7 maps.

New in Paper: \$15.95 ISBN 0-691-02424-3. Cloth: \$39.50 ISBN 0-691-08554-4

Second edition

A Guide to the Birds of Panama with Costa Rica, Nicaragua, and Honduras

Robert S. Ridgely and John A. Gwynne, Jr.

The second edition of the popular **A Guide to the Birds of Panama** now includes information on Costa Rica, Nicaragua, and Honduras. The illustration coverage has been substantially expanded: approximately 200 new species have been added, sixteen new plates are included, and three of the original plates have been replaced by improved versions. Throughout, changes have been made to accommodate the explosion in knowledge of the birds of Panama and nearby areas and of neotropical birds in general.

48 color plates, 53 line drawings.

Cloth: \$49.50 ISBN 0-691-08529-3 • \$40.00 through December 31, 1989

A Field Guide to Birds of the USSR

V. E. Flint, R. L. Boehme, Y. V. Kostin, and A. A. Kuznetsov

Translated by Natalia Bourso-Leland

"A seminal contribution to world birding."

—*Howard Simons, The Washington Post Book World*

"This field guide, a most satisfactory translation of the earlier Soviet edition, will make life much easier for Western bird-watchers when they seek out the avifauna of Eastern Europe, of the Caucasus and Central Asia, of the Siberian tundra and of the Soviet Far East." —*John A. C. Greppin, The Times Literary Supplement*

48 color plates, 71 line drawings, 303 maps.

New in Paper: \$27.50 ISBN 0-691-02430-8 Cloth: \$75.00 ISBN 0-691-08244-8

DELIGHTFUL

Two by ALEXANDER F. SKUTCH
with Illustrations by DANA GARDNER

A Guide to the Birds of Costa Rica

By F. GARY STILES and ALEXANDER F. SKUTCH. Illustrated by DANA GARDNER. "This long-awaited, much-needed volume may be the best field guide I've ever seen, and it's sure to become the standard against which all new field guides will be measured. Technically excellent and comprehensive, it's the kind of book readers will not put down at the end of the day, but will savor in the evenings back at camp."—Marcy F. Lawton, University of Alabama. **52 color plates, 43 b&w illus.** \$65.00 cloth, \$35.00 softcover

Bird Etchings

The Illustrators and Their Books, 1655-1855

By CHRISTINE E. JACKSON. *New in paper!* "A handsomely produced and well-illustrated volume. . . . The story, which documents the development of ornithology, is built around 16 amateur naturalists from Willughby and Ray to Audubon, and is fascinating reading. . . . A must for all interested in the history of ornithology and its associated art."—*British Birds*

"Jackson provides an exciting view of a vibrant time in ornithological history."—*Auk*. **4 color plates, 79 b&w illus.** \$19.95 paper, \$55.00 cloth

Painting by Dana Gardner.

Life of the Tanager

"Dr. Skutch's gracefully written account of the tanagers—their ways and place in the ecosystem, is adorned by Mr. Gardner's vivid paintings in which the profusion of jungle flower and leaf complements the endless variety and charm of the tanagers. An outstanding book!"—Dean Amadon. **19 line drawings, 24 colorplates.** \$36.50

Life of the Woodpecker

This is the only book for the general reader which deals authoritatively with these remarkable birds. "Skutch is a rare breed, a knowledgeable scientist who writes with charm and grace."—*The Living Bird Quarterly*. **62 color plates.** \$49.95

The Sea and the Ice

A Naturalist in Antarctica

By LOUIS J. HALLE. *New in paper!* "Mr. Halle's chief interest is the sea birds of the region, such as the Wandering Albatross and various petrels, but he also includes a good deal of Antarctic lore. A thoroughly pleasurable book."—*New York Times Book Review*. **28 b&w illus.** \$12.95 paper

A Birder's Guide to Japan

By JANE WASHBURN ROBINSON. "An excellent guide not only to where to find the birds in this diverse country but to some of the customs and habits of the people who live there."—*Indiana Audubon Quarterly*.

"Absolutely necessary. . . . Take this book when you go."—*Auk*. **56 maps.** \$14.95 paper

INVITES YOU TO CHRISTCHURCH
for the 20th International Ornithological Congress
2-9 December 1990

The IOC logo bird is flightless, but that
doesn't mean you have to be!
FLY WITH US . . . and enjoy the excitement
and bird life of beautiful New Zealand

Air New Zealand is the AOU's official carrier to the Christchurch IOC,
and is proud of its contribution to the AOU's SecondCentury Campaign.

We suggest you book your flight at least 6 months in advance.
Contact your local travel agent or Air New Zealand,
(800) 262-1234, soon!

Process Bird Sightings With WORLD BirdBase

Easy entry of sightings and comments, using Clements' 1989-updated list of scientific and common names of every world species plus a name finding facility. Species can be added, split, combined, or renamed. Versatile display of taxonomically sorted sightings, with selection by: faunal zone, country or area, state or province, trip or place, special feature, species, first sightings only, date, or any combination. All displays can be shown on screen, printed, or written to disk files readable by word processors, spread sheets, etc. Nearly 33,000 sightings can be stored in any directory, and occupy only about 2 M bytes of disk space. The program requires an IBM-compatible PC with 640 K bytes of RAM memory and a hard disk. Send your check or major-organization purchase order for US\$99.00 (with 6% tax if CA order) plus US\$5.00 s&h (US\$10.00 if foreign order). Request 3.5 inch disks if needed for drive A of your computer.

POSTDOCTORAL FELLOWSHIP at the AMERICAN MUSEUM OF NATURAL HISTORY

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January 1990.

For application form and brochure,
please write to:

F.M. Chapman Memorial Fund
Department of Ornithology
American Museum of Natural History
Central Park West at 79th Street
New York, NY 10024-5192, U.S.A.

Ibis

Journal of the British Ornithologists' Union

Edited by **Dr Peter Jones** *Department of Forestry and Natural Resources,
University of Edinburgh, King's Buildings, Edinburgh EH9 3JU, UK*

One of the most prestigious bird journals in the world, *Ibis* has been in existence since 1859. It publishes papers from both professionals and amateurs on all aspects of ornithology ranging from geographical distribution to bird behaviour, covering topics such as kin selection, altruism and breeding systems. Reviews of the ornithological literature have always been an important feature of the journal. Although it is published for the British Ornithologists' Union it is by no means exclusively British, and less than half the papers deal with British birds.

Subscription Information

Ibis is published quarterly. Subscription rates for 1989 are £72.00 (UK), \$149.00 (USA & Canada), £86.50 (overseas) post free. Subscriptions and free specimen copies are available from the publishers at the address below.

ORNITHOLOGICAL MONOGRAPHS NO. 43

**A DISTRIBUTIONAL SURVEY
OF THE BIRDS OF THE
MEXICAN STATE OF OAXACA**

by
Laurence C. Binford

This scholarly treatise, culminating 30 years of research, is based on field exploration and data gleaned from 17,400 museum specimens and over 400 cited references. Oaxaca offers a diversity of animal habitats unsurpassed elsewhere in Mexico, ranging from humid and arid lowland tropics through subtropical cloud forest and scrub to temperate pine-oak forest at over 11,000 feet. Each habitat is described, classified, depicted (28 photos), and mapped. Oaxaca's avifauna of 680 species exceeds that of any other Mexican state, Guatemala, or Honduras. Each species account documents abundance, mode and timing of occurrence, habitat preference, geographic and elevational range, breeding evidence, and subspecies. An ecogeographical analysis of the 465 breeding species considers barriers, corridors, and regions of endemism. Other chapters discuss physiography (mapped), climate, type localities and endemic subspecies, migration, and birds of hypothetical occurrence (39 species).

VOL. 106, NO. 2—26 APRIL 1989

VOL. 106, NO. 3—25 JULY 1989

VOL. 106, NO. 4—31 OCTOBER 1989

THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06268.

Copy Editor: GAIL W. HUNTER

Associate Editors: FRED E. LOHRER (Periodical Literature), M. ROSS LEIN (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are encouraged from throughout the world, but must be written in English.

SUGGESTIONS TO CONTRIBUTORS. Submit the typewritten original and two copies of the text, tables, and all other material to the Editor. Every manuscript must be accompanied by a **letter of transmittal** (1988, *Auk* 105: 803). Three copies of illustrations should be submitted. *All typewritten material must be double-spaced on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins.* Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages throughout the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow *The A.O.U. Checklist of North American Birds* and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors' *CBE Style Manual*, 5th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

Tables, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ⅓ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 70% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The *Auk* is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of *The Auk* and the *CBE Style Manual* for additional details.

A more detailed set of instructions for contributors appeared in *The Auk*, Vol. 105, No. 1 (January 1988), copies of which are available from the Editor.

Bioacousticians

Your workstation is here.

The DSP Sona-Graph™, model 5500 is a signal analysis workstation designed for the acquisition, processing and display of time-varying biological signals. The 5500 acquires, analyzes and displays signals in real-time with a continuous scrolling display, combining the features of a real-time spectrograph, a high-speed dual channel FFT and a computer-based data acquisition system.

It's a "wish list" workstation for the bioacoustician. The 5500 includes digital anti-aliasing filters, 16 bit A/D and 1.5 Mbytes of ROM storage for signal processing programs. Designed with you in mind, the 5500 provides up to 8 Mbytes of signal storage (one or two signals), on-screen cursors, extensive editing, high fidelity playback and computer interface capabilities.

- ✓ Two channel simultaneous display
- ✓ Real-time to 32 kHz
- ✓ Continuous thermal printing
- ✓ On-screen noise reduction feature
- ✓ High resolution color/grey scale display
- ✓ High fidelity playback and editing

To find out more about using the DSP Sona-Graph in your work, call **Robert McClurkin** at 800-289-5297 or write to the address listed below.
