Categories of Giving
(as established in 1989)

Sponsor ($1,000), Patron ($3,000), Benefactor ($10,000)
Guarantor ($25,000)

The names of major donors are listed in perpetuity in the rolls of the American Ornithologists’ Union.

The needs of the American Ornithologists’ Union have changed since its founding over 100 years ago, and they will continue to change. Thus the A. O. U. strongly recommends that gifts to the Union be unrestricted.
ORNITHOLOGICAL MONOGRAPHS 45 & 46

DESCRIPTIONS OF THIRTY-TWO NEW SPECIES OF BIRDS
FROM THE HAWAIIAN ISLANDS

Part I. Non-Passeriformes
by
STORRS L. OLSON and HELEN F. JAMES

Part II. Passeriformes
by
HELEN F. JAMES AND STORRS L. OLSON

Bound as one volume - 176 pp
$25.00 ($22.50 to AOU Members)
Postage $2.00 N. Am., $4.00 all other countries
MasterCard and VISA accepted

**Prodigious Birds**
Moas and Moa-hunting in New Zealand
**Atholl Anderson**
Brings a historical perspective to the development of moa research and its formative debates, analytical methods, and results, reviewing evidence from paleontology, biology, archaeology, ethnography, and history.
1990 280 pp. 35209-6 Hardcover $79.50

**Bird Life of Mountain and Upland**
**Derek Ratcliffe**
"...a cut above the average bird book, and is the first in what promises to be an outstanding series on bird habitats of the British Isles...it is also a source of valuable insights into bird ecology and conservation."
---Nature
Bird Life Series
1991 268 pp. 33123-4 Hardcover $44.50

**Bird Migration**
**Thomas Alerstam**
**David A. Christie, Translator**
Presents the life histories and migratory habits of nine different ecological categories of birds. It details the course and timing of the flight journeys, flight behavior, fuel economy, flocking, and the hazards from disorientation and predation.
1990 428 pp. 32865-9 Hardcover $105.00

**Process Bird Sightings With WORLD BirdBase**
Easy entry of sightings and comments, using Clements' 1989-updated list of scientific and common names of every world species plus a name finding facility. Species can be added, split, combined, or renamed. Versatile display of taxonomically sorted sightings, with selection by: faunal zone, country or area, state or province, trip or place, special feature, species, first sightings only, date, or any combination. All displays can be shown on screen, printed, or written to disk files readable by word processors, spread sheets, etc. Nearly 33,000 sightings can be stored in any directory, and occupy only about 2 M bytes of disk space. The program requires an IBM-compatible PC with 640 K bytes of RAM memory and a hard disk. Send your check or major-organization purchase order for US$99.00 (with 6% tax if CA order) plus US$5.00 s&h (US$10.00 if foreign order). Request 3.5 inch disks if needed for drive A of your computer.

The Handbook of Australian, New Zealand and Antarctic Birds
Volume 1: Ratites to Ducks, Parts A & B
EDITED BY STEPHEN MARCHANT AND PETER HIGGINS

The Handbook of Australian, New Zealand and Antarctic Birds (HANZAB) details the fascinating world of birdlife in Australasia, and is the first comprehensive study since Gregory Mathew’s 1927 treatise Birds of Australia. Each volume examines all aspects of field identification, social organization, behavior, voice, habitat, distribution, breeding, movement, food, measurements, moult and precise plumage characteristics. One hundred superb color plates by Jeff Davies provide accurate detail. Essential for collectors.
1991 • 1056 pp.; 100 color, 300 b&w plates
$295.00

The Birds of Sumatra and Kalimantan
DEREK HOLMES
ILLUSTRATED BY STEPHEN NASH
This book introduces 148 species from the rich lowland and coastal habitats of Sumatra and Kalimantan. The plumage, behavior, habitat, and species distribution and references for 129 other species are included.
1991 • 122 pp.; 148 illus.
$24.95

The Birds of Dry Places
Bustards, Hemipodes, and Sandgrouse
PAUL A. JOHNSGARD
This is the first monograph to cover all 51 extant species of these diverse bird families. Comparative chapters on the taxonomy and phylogeny of the three groups, their zoogeographic patterns, social behavior, and breeding biology make it essential reading for ornithologists, zoologists, and naturalists.
October 1991 • 304 pp.; 51 color plates, 53 illus.
$135.00

The Birds of Pakistan
Volume 1: Regional Studies and Non-Passeriformes
T.J. ROBERTS
This two-volume set, by world-famous ornithologist Tom Roberts, is the first complete account of the avifauna of Pakistan.
1991 • 666 pp.; 76 illus., 23 color plates, $85.00

Volume 2
December 1991 • 624 pp.; 24 color plates, 16 illus.
$85.00

Songbirds in Singapore
The Growth of a Pastime
LESLEY LAYTON
This book discusses the popularity of bird-keeping in Singapore and describes the most popular songbirds and the paraphernalia that surrounds their care.
$19.95

The Breeding Birds of Kashmir
R.S.P. BATES AND E.H.N. LOWTHER
Bates and Lowther traversed the western Himalayan region for 20 years to photograph the 116 remarkable bird species identified in this richly illustrated volume.
January 1991 • 384 pp.; 5 pp color plates, 151 photos
$35.00

Investigating new advances . . .
CURRENT ORNITHOLOGY
edited by Dennis M. Power

From reviews of earlier volumes:
"Current Ornithology . . . is an outstanding collection. . . . Buy it, and be ready to shell out more for subsequent numbers in the series."
—The Auk
". . . these chapters are written by the established authorities in the respective fields. . . . Serious ornithologists should have this book. . . . and probably subsequent volumes."
—The Wilson Bulletin

Current Ornithology presents timely reviews, overviews, and essays on topics of current interest in avian biology. Covering all facets of biology pertinent to ornithology, the series is designed to give the reader understanding and insight into new developments in this fascinating field. Contributions are profusely illustrated and are accompanied by extensive bibliographies.

Volume 8
Here, leading experts in the field provide new information on avian studies in New Zealand and the southern Pacific Ocean. They discuss a variety of timely issues, including avian radioecology, enemy recognition and nest parasitism, and the relation between showy plumage and blood parasites using the New Guinea avifauna.
0-306-43640-X/352 pp./ill./1991/$75.00 ($90.00 outside US & Canada)

Volume 7
Contributors examine bird population declines in relation to global conservation, energy storage, reproductive biology, evolution of colonial breeding, nonbreeding social organization in Parus, age-specific variation in reproductive performance of birds, the ecology and evolution of extra-pair copulations in birds, and survival rates and their relationship to life-history traits in some common British birds.
0-306-43307-9/402 pp./ill./1990/$75.00 ($90.00 outside US & Canada)

IBIS
Journal of the British Ornithologists’ Union
Edited by Dr Peter Jones
Department of Forestry and Natural Resources, University of Edinburgh, King’s Buildings, Edinburgh EH9 3JU, UK

One of the most prestigious bird journals in the world, Ibis has been in existence since 1859. It publishes papers from both professionals and amateurs on all aspects of ornithology ranging from geographical distribution to bird behaviour, covering topics such as kin selection, altruism and breeding systems. Reviews of the ornithological literature have always been an important feature of the journal. Although it is published for the British Ornithologists’ Union it is by no means exclusively British, and less than half the papers deal with British birds.

Subscription Information
Ibis is published quarterly. Subscription rates for 1991 are £95.00 (UK), £110.00 (overseas) and US$199.50 (USA & Canada) post free.
The Journals of the British Ecological Society

JOURNAL OF ECOLOGY
Edited by J. White and P. Moore
The Journal of Ecology is one of the world’s oldest and most respected publications in the science. The objects of the journal are: (1) to foster and promote the study of vegetation and ecology, especially in the British Isles; (2) to afford an outlet for original work on these subjects; (3) as far as possible to present a record of the commentary on the progress of these studies throughout the world. The journal includes the series Biological Flora of the British Isles, which appear in most issues of the journal but are also available as separate offprints on standing orders.

JOURNAL OF ANIMAL ECOLOGY
Edited by B. Shorrocks and J.M. Elliott
This leading international journal publishes papers on original research in all branches of animal ecology. A balance is sought between aquatic and terrestrial environments, between invertebrates and vertebrates, and between theoretical, experimental and analytical approaches to soundly-based field data. Occasional purely descriptive, theoretical or review papers may be published at the discretion of the editors on animals or concepts of special interest or as part of an extensive development of a subject or as an adjunct to a long-term project.

Subscription Information
The Journal of Ecology is published quarterly, the Journal of Animal Ecology and Journal of Applied Ecology are published three times a year and Functional Ecology is published bi-monthly. The subscription rates for 1991 are, for each one: £130.00 (UK), £148.00 (overseas) and US$257.50 (USA & Canada) post free.

Subscriptions and free specimen copies are available from:

Lovebirds, Cockatiels, Budgerigars: BEHAVIOR & EVOLUTION
by J. Lee Kavanau, UCLA

...highly informative volume...actually several books under one cover....[the author has]
enormous experience with the raising of these birds.....presenting a great deal of interest-
ing information, much of it new.   Prof. Ernst Mayr, Harvard Univ.

...unique, exhaustive laboratory studies of..behavior....insightful and remarkably compre-
prehensive scenario of..origin & evolution of birds &..roots of their behaviors.....must read-
ing for all interested in avian behavior & reproduction....wealth of information & con-
cepts that will be of interest to all evolutionists.   Prof. E. C. Olson, UCLA

...enormous amount of information....very important contribution to..study of behavior
of parrot birds, about which so little is known.... Prof. K. Immelmann, Univ. Bielefeld

...monumental in..scope...much fascinating reading....many intriguing subjects....enormous
project.....excellent reference for..experimental behavior or evolutionary science....looking
forward to..in-depth study &..to apply [the author’s] concepts to..aviculture and avian
veterinary medicine.   G. J. Harrison, DVM, Bird World, Nov., 1987

...offers an interesting synthesis of avian evolution, in general, tying together [the au-
thor’s] views on evolutionary sequences involved in thermoregulation, insulation, egg
care, care of young, mode of feeding, and degree of arboreality.   Auk, July, 1988

...scope..is impressive.....information conveyed..is almost overwhelming.....comprehensive
discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution
of all birds.....extremely detailed discussion of the avian brain......fascinating ideas on
the evolution of bird reproductive behavior.....should provide much fuel for thought &
some debate among students of avian evolution.....detailed descriptions of captive bird
breeding and experimentation provide numerous ideas for..research on captive birds.....
a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

March, 1987, xxvi + 1,001 pp., 7 indices, 1,455 refs., $49.95
Prepay ck. or m/o. Add $4 p/h ($6 outside U.S.) + $3.25 s/t in Calif.

POSTDOCTORAL FELLOWSHIP
AT THE
AMERICAN MUSEUM OF NATURAL HISTORY

The Frank M. Chapman Memorial Fund Committee welcomes
applications for the Postdoctoral Fellowship Program in the areas
of evolutionary and systematic ornithology. The Fellowship is
usually for one year, but applicants may apply for two years, with
a review of performance after the first year.
Deadline for applications is 15 January.
For application form and brochure, please write to:

Frank M. Chapman Memorial Fund
Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street  New York, New York 10024-5192, U.S.A.
Are you regularly reading these journals?

The Journal of Comparative Physiology is essential for researchers of invertebrates, vertebrates, and non-human mammals. Researchers of higher mammals – especially humans – refer to the journal frequently, as studies of other animals have laid the groundwork for our understanding of the complex processes in higher vertebrates.

Appearing monthly, Journal of Comparative Physiology A - Sensory, Neural, and Behavioral Physiology is concerned with the sense organs and all aspects of neuronal and neural processes as well as with the experimental analysis of behavior, especially neuro-ethology.

In 1984, the Journal of Comparative Physiology was split into two sections, each available separately. Appearing bimonthly, Journal of Comparative Physiology B - Biochemical, Systemic, and Environmental Physiology publishes articles concerning the "machinery" of animals, from the molecular level up to the organismic level. Covered are comparative aspects of metabolism and enzymology, metabolic regulation, respiration and gas transport, circulation, physiology of body fluids, temperature relations, and muscular physiology.

If not, why not start today...

THE AUK A Quarterly Journal of Ornithology
PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06269.
Copy Editor: GAIL W. HUNTER
Associate Editors: JOHN L. TRAPP (Recent Ornithological Literature) AND BRUCE M. BEEHLER (Book Reviews)

THE AUK welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

SUGGESTIONS TO CONTRIBUTORS

Manuscript preparation.—Submit the original and two clear copies of the text, tables, and all other text materials along with a letter of transmittal (Auk 105: 803), and three copies of all illustrations (retain original figures). Double-space all written material (including tables and figure legends) on one side of 8½ x 11 inch (21.5 x 28 cm) good quality bond paper, with at least 1 inch (2.5 cm) margins. Number pages through the Literature Cited. Do not right justify. Type tables separately from the text; type figure legends consecutively on one sheet. Mail figures flat and on text-sized sheets with your name and figure number penciled on the back. Do not use boldface, italics, or reduced type. Signify italics by underlining.

Manuscript style.—The style of manuscripts should conform to general usage in recent issues. The title page contains the full title (avoid colons or questions, please) and author’s name and address at the time of research. The present address, if different, is given in a footnote. The cover page includes the name and mailing address of the individual to whom proof is to be sent, and a shortened version of the title (< 36 characters).

An Abstract (<5% of the paper length) that summarizes important premises, recapitulates your findings, and gives your conclusions precedes each regular article. In articles, text citations should include author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations on the same topic are arranged chronologically. Quotations and citations from longer works require page numbers (Matthew 1976: 193). Acknowledgments follow the text and precede the Literature Cited. Abbreviations of titles of serial publications are found in “Serial Sources for the BIOSIS Data Base.” Scientific and English names of birds are given at first mention, and they follow the AOU “Check-list of North American Birds” and supplements unless departures are explained and defined. All measurements are in SI metric units. In general, abbreviations of statistical terms and mensural units conform to the latest Council of Biological Editors’ “CBE Style Manual.” Use the 24-hour clock (0800 and 2035) and continental dating (29 September 1934).

Tables and figures.—Tables and figures must not duplicate material in either the text or each other. Each table requires a short but complete heading and no vertical rules. Illustrations must allow reduction to one-column (16 pica) width or, if necessary, 26-pica (11 cm) width—without reduction in clarity or readability. Style and size among figures should be uniform. Typewritten lettering is not acceptable on figures. Computer-generated figures of good contrast and sharpness on bond paper are encouraged. Drawings should be prepared with undiluted india ink. Photographs should be glossy prints of the highest possible quality, and approximately the same size as they will appear in print. Letters, arrows, and symbols on photographs are best applied by pressure-sensitive materials. Color figures will be considered both as figure plates and for the frontispiece.

Copies of a more detailed set of instructions (Auk 105: 231) are available from the Editor.
