

Cornell Books

The Black-capped Chickadee

Behavioral Ecology and Natural History

By **SUSAN M. SMITH**. "A remarkable and comprehensive work which belongs on the library shelf of every chickadee enthusiast. And there are more of them every day!"—Frank B. Gill, *The Academy of Natural Sciences*. 116 *b&w illus.* \$46.50 cloth, \$17.95 paper

The Mountain and the Migration

A Guide to Hawk Mountain Revised and Expanded Edition

By **JAMES J. BRETT**. Foreword by **Roger Tory Peterson**. This handy book is a new and improved edition of a guide (first published in 1986) to the sanctuary and also to the general natural history of the larger Appalachian region of Pennsylvania, New Jersey, and southern New York. 17 *plates*, 31 *color illus.*, 20 *b&w illus.* \$13.95 paper

Bird Trapping and Bird Banding

A Handbook for Trapping Methods All Over the World

By **HANS BUB**. Translated by **Frances Hamerstrom** and **Karin Wuertz-Schaefer**. Intended for professional and amateur ornithologists, this handbook describes trapping methods that do not harm birds, and it also treats safe, human ways of handling captive birds. 456 *b&w illus.* \$69.50

At bookstores, or call 607-277-2211 (credit card orders only)

Origins of the Higher Groups of Tetrapods

Controversy and Consensus

Edited by **HANS-PETER SCHULTZE** and **LINDA TRUEB**.

This volume explores the various views on the origins of tetrapods—views that agree or differ depending in part on how certain fossil animals are classified and which methodology is used for classification. 370 *b&w illus.* \$95.00

A Guide to the Birds of Trinidad and Tobago

Second Edition

By **RICHARD FFRENCH**. Illustrated by **John P. O'Neill** and **Don R. Eckelberry**. This easy-to-use book is the second edition of a comprehensive yet compact field guide to more than 430 species of the islands' birds. 29 *color plates*, 9 *color portraits*, 43 *b&w illus.* \$72.50 cloth, \$34.50 paper

Life of the Pigeon

By **ALEXANDER F. SKUTCH**. Illustrated by **Dana Gardner**. "Beautiful and inspiring. . . . To those familiar with Dr Skutch's works this book will need no advocacy. To those who, by unhappy chance are not, it can be heartily recommended."—Derek Goodwin, *Pigeons and Doves of the World*. 24 *color plates*, 29 *b&w illus.* \$49.95

Cornell University Press / 124 Roberts Place, Ithaca NY 14850

COMPUTER SOFTWARE FOR ORNITHOLOGISTS

BirdBase 2 has been described in an Auk (v. 108, p. 456) review as "a sophisticated database management program specifically tailored for anyone who works with lists of birds.....remarkably fast.....a great program." With all the AOU-ABA birds of North America and Hawaii, this IBM-compatible software sells for US\$59.95 plus US\$3.00 shipping. With every bird in Dr. James Clements' Birds of the World (4th Ed.) also included, it costs US\$99.95 plus US\$5.00 shipping.

BirdLexi contains an MS-DOS ASCII file listing alphabetically every word in the scientific species, genus, family, and order names of Clements' nearly 9700 birds, a second file with words from his common names not in spelling checkers, and a third with words from AOU-ABA bird names not in the other files. Any of these can be used to add their words to most IBM or Macintosh word processor spelling checkers. The price is US\$49.95 plus US\$3.00 shipping.

MasterCard, Visa, US dollar checks, and major organization purchase orders are accepted. Double shipping charges for overseas orders. Add 8% tax for CA orders. Specify the size of an IBM compatible's drive A or, for a Macintosh, of the drive that is IBM compatible.

POSTDOCTORAL FELLOWSHIP AT THE AMERICAN MUSEUM OF NATURAL HISTORY

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund

Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

THE QUARTERLY REVIEW OF BIOLOGY

Since its inception in 1926, *The Quarterly Review of Biology* has enjoyed an enviable reputation for its comprehensive reviews of pivotal fields of biology, critical syntheses of significant research, and insightful historical and philosophical treatments of important biological topics. The **QRB** provides biological researchers and educators (as well as general readers) with timely assessments of the life sciences in a convenient and economical format.

Review Articles

The major articles in the **QRB** present outstanding assessments of recent research. Their incisive treatment of theory and data serves to guide future biological inquiry. **QRB** subscribers read articles whose impact and citation record will endure for years to come.

Book Reviews

In each annual volume, the *Quarterly's* extensive book review sections feature 500 signed reviews, arranged by subject category and indexed by title, author, and reviewer. These critical reviews alert you to important new books from a wide spectrum of biological interests.

Software Reviews

This section, initiated in 1989, features thorough evaluations of newly released database, tutorial, modeling, statistics, and simulation programs for researchers, teachers, and students. Educational software reviewed here ranges from undergraduate through graduate and professional levels.

BIRDS OF MISSOURI

Their Distribution & Abundance

MARK B. ROBBINS AND DAVID A. EASTERLA

Robbins and Easterla offer the most comprehensive treatment of the birds recorded in Missouri since Otto Widmann's landmark publication at the turn of the century. *Birds of Missouri* presents a historical perspective, which includes much unpublished information, as well as an up-to-date assessment of each species recorded in the state. Professional ornithologists and casual bird-watchers alike will find this an invaluable reference guide.

456 pages, 13 color and 37 b&w illustrations, \$59.95

- ◆ includes color illustrations and pen-and-ink drawings by well-known nature artist David Plank
- ◆ an invaluable reference guide with over 35 color and black and white photographs, along with maps, charts, and tables
- ◆ detailed, up-to-date species accounts for every species ever recorded in Missouri

Introducing...

Bird Conservation International

Published for the International Council for Bird Preservation by Cambridge University Press

A major new journal of international conservation

Bird Conservation International is a new quarterly journal focusing on the major conservation issues affecting birds – especially globally threatened species – and their habitats. Founded by the International Council for Bird Preservation, the journal provides a stimulating, international and up-to-date coverage of bird conservation topics critically important in today's world.

Why you should read Bird Conservation International

With original papers and reviews, **Bird Conservation International** will keep you informed about endangered bird species, habitat destruction, wildlife trade and recent scientific research findings. In addition much of the journal's published material has its origins in ICBP's *Red Data Research Programme* (used by governments and environmental decision makers world-wide) and its *Conservation Programme of Field Projects*.

Essential reading for anyone interested in:

- species conservation
- preservation of habitats
- environmental issues
- ornithology

Subscription

Bird Conservation International is published quarterly in April, June, September and December. Volume 2 in 1992, ISSN 0959-2709 £59 for institutions; £30 for individuals; £25 for members of the World Bird Club; airmail £12 per year extra.

ORNITHOLOGICAL MONOGRAPHS NOS. 45 & 46

**DESCRIPTIONS OF THIRTY-TWO NEW SPECIES OF
BIRDS FROM THE HAWAIIAN ISLANDS:**

PART I. NON-PASSERIFORMES

by

Storrs L. Olson and Helen F. James

PART II. PASSERIFORMES

by

Helen F. James and Storrs L. Olson

These monographs, based on 15 years of fieldwork, document one of the most unexpected ornithological discoveries of the century, the existence of dozens of strange birds that were extirpated through human agency in the 1500 years prior to the first scientific exploration of the Hawaiian archipelago. These new birds, which were part of the modern but now highly disturbed ecosystems, are known from thousands of bones recovered in sand dunes, sinkholes, lava tubes, a crater

lake, and archeological midden deposits on five of the main islands. The total number of prehistorically extinct species approximately doubles the size of the historically known avifauna. Part I briefly recounts the collecting sites and provides formal scientific descriptions for 3 new genera non-passerines. These include a petrel, a flightless ibis, 2 new genera and 3 species of ponderous flightless ducks (*moa-nalos*) that may have been the

ecological counterparts of tortoises, a goose related to the Nene, 5 species of flightless rails, a peculiarly adapted harrier, and a new genus with 4 new species of long-legged bird-eating owls. Part II continues with the descriptions of 2 new species of large crows, and 4 new genera and 14 new species of Hawaiian finches (*Drepanidini*), including a disproportionate number of finch-billed species, several icterid-like gapers, and an enigmatic new genus with no recognized modern analog. Discussions focus on patterns of colonization and extinction of Hawaiian birds.

1991, Part I 88pp.; Part II 88pp. Paperback--bound together, not available separately: \$25.00 (22.50 to AOU Members) + 5% shipping & handling (minimum \$2.00 U.S., \$3.00 elsewhere). MasterCard and VISA accepted.

Order from: Max C. Thompson, Assistant to Treasurer, American Ornithologists' Union, Department of Biology, Southwestern College, 100 College Street, Winfield Kansas 67156

- No. 44. *Recent Advances in the Study of Neogene Fossil Birds. I. The Birds of the Late Miocene-Early Pliocene Big Sandy Formation, Mohave County, Arizona (K. J. Bickart); II. Fossil Birds of the San Diego Formation, Late Pliocene, Blancan, San Diego County, California (R. M. Chandler)*. vi + 161 pp. 1990. \$19.75 (\$17.75).
- Nos. 45 & 46. *Descriptions of Thirty-two New Species of Birds from the Hawaiian Islands: Part I. Non-Passeriformes (S. L. Olson and H. F. James)*. 88 pp.; *Part II. Passeriformes (H. F. James and S. L. Olson)*. 88 pp. 1991. Bound together (not available separately) \$25.00 (\$22.50).

Order from: Max C. Thompson, Assistant to the Treasurer A.O.U., Department of Biology, Southwestern College, 100 College Street, Winfield, KS 67156. Orders must be prepaid, in U.S. dollars; add 5 percent (minimum \$2.00) handling and shipping charge in U.S., and 20 percent (minimum \$3.00) for all other countries. Make checks payable to American Ornithologists' Union. Prices in parentheses are for A.O.U. members.

A Quarterly Journal of Ornithology PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504.

Managing Editor: TIMOTHY C. LAMEY.

Associate Editors: JOHN L. TRAPP (Recent Ornithological Literature) and BRUCE M. BEEHLER (Book Reviews).

The Auk welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

Manuscript preparation.—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). Double-space all written material (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues (note stylistic changes incorporated in January 1992). The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465-466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1991, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*. NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the fifth edition of the *CBE CBE Style Manual* (1983, available from CBE, 9650 Rockville Pike, Bethesda, Maryland 20814). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

Proofs, reprints, and charges.—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.

Books for review.—Forward books for review directly to: Bruce M. Beehler, Associate Editor for Book Reviews, *The Auk*, NHB Room 336, Smithsonian Institution, Washington, D.C. 20560, USA.
