

HANDBOOK OF THE BIRDS OF THE WORLD

Volume 1
Ostrich
to
Ducks

ICBP

Lynx Edicions

Edited by
Josep del Horno
Andrés F. Elliot
Irene Sargant

The first ever work to illustrate and cover in detail all the species of birds in the world

Complete chapter dedicated to each family, and individual accounts for each species with a summary of taxonomy, distribution (including subspecies), habitat, feeding, breeding, movements, status, conservation, bibliography and distribution map.

The whole work will comprise 10 large-format volumes of 310 x 240 mm.

Volume 1, with a comprehensive introduction to Class Aves/the Birds and covering the first 27 families, includes: 640 pages • 50 colour plates depicting all species and distinctive subspecies • 17 anatomical colour plates • more than 350 colour photographs • 550 distribution maps • more than 5000 bibliographical references.

Free 4-page brochure available from ICBP:

ICBP, c/o WWF-US,
1250 Twenty-Fourth Street NW,
Washington DC 20037, USA

There is a pre-publication offer with a special price of US \$120.00 (Normal price US \$165.00) + US \$7.00 Postage & Packing. Copies can be ordered by writing to ICBP with payment enclosed (check in US \$ or credit card).

Due September 1992

Offer expires 30 September 1992.

Lovebirds, Cockatiels, Budgerigars:

by J. Lee Kavanau, UCLA

BEHAVIOR & EVOLUTION

- ▶...highly informative volume...actually several books under one cover...[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard Univ.
- ▶...unique, exhaustive laboratory studies of..behavior...insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors....must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA
- ▶....enormous amount of information....very important contribution to..study of behavior of parrot birds, about which so little is known... Prof. K. Immelmann, Univ. Bielefeld
- ▶...monumental in..scope...much fascinating reading...many intriguing subjects....enormous project....excellent reference for..experimental behavior or evolutionary science....looking forward to..in-depth study &..to apply [the author's] concepts to..aviculture and avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987
- ▶...offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality. Auk, July, 1988
- ▶....scope..is impressive.....information conveyed..is almost overwhelming.....comprehensive discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution of all birds.....extremely detailed discussion of the avian brain.....fascinating ideas on the evolution of bird reproductive behavior.....should provide much fuel for thought & some debate among students of avian evolution.....detailed descriptions of captive bird breeding and experimentation provide numerous ideas for..research on captive birds.... a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

March, 1987, xxvi + 1,001 pp., 7 indices, 1,455 refs., \$49.95

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund

Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

TRADE DISCOUNTS AVAILABLE

A Quarterly Journal of Ornithology PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504.

Managing Editor: TIMOTHY C. LAMEY.

Associate Editors: JOHN L. TRAPP (Recent Ornithological Literature) and BRUCE M. BEEHLER (Book Reviews).

The Auk welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

Manuscript preparation.—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). **Double-space all written material** (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues (note stylistic changes incorporated in January 1992). The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465–466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1991, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*. NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the fifth edition of the *CBE CBE Style Manual* (1983, available from CBE, 9650 Rockville Pike, Bethesda, Maryland 20814). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

Proofs, reprints, and charges.—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.

Books for review.—Forward books for review directly to: Frank A. Pitelka, Associate Editor for Book Reviews, Museum of Vertebrate Zoology, University of California, Berkeley, California 94720, USA.
