Categories of Giving
(as established in 1989)

Sponsor (\$1,000), Patron (\$3,000), Benefactor (\$10,000)
Guarantor (\$25,000)

The names of major donors are listed in perpetuity in the rolls of the
American Ornithologists' Union.

The needs of the American Ornithologists' Union have changed since its
founding over 100 years ago, and they will continue to change. Thus the
A.O.U. strongly recommends that gifts to the Union be unrestricted.

BULLETIN OF THE BRITISH ORNITHOLOGISTS' CLUB

Centenary Volume 112A

November 1992

This important issue, entitled '*Avian Systematics and Taxonomy*' runs to 312 pages and contains papers written specially by eminent leading scientists in these fields. There is a Preface by Professor Ernst Mayr.

The volume, apart from its historic place in any set of volumes of the *Bulletin*, will be of value in particular as a review at this time of the position in modern ornithology of the two subjects for which the *Bulletin* has been so well known since it was first published 100 years ago. Importantly, also, it contains data which will be required for reference in the indefinite future.

- No. 47. *Parent-Offspring Conflict and its Resolution in the European Starling*. Elizabeth Litovich and Harry W. Power. 71 pp. 1992. \$11.70 (\$10.50).

Order from: Max C. Thompson, Assistant to the Treasurer A.O.U., Department of Biology, Southwestern College, 100 College Street, Winfield, KS 67156. Orders must be prepaid, in U.S. dollars; add 5 percent (minimum \$2.00 U.S., \$4.00 all other countries) handling and shipping charge in U.S., and 20 percent (minimum \$3.00) for all other countries. Make checks payable to American Ornithologists' Union. Prices in parentheses are for A.O.U. members.

Kingfishers, Bee-Eaters & Rollers

A Handbook

C. Hilary Fry and Kathie Fry

Illustrated by Alan Harris

Few birds can match the dazzling beauty of kingfishers, bee-eaters, and rollers. Until now no comprehensive treatment of these families has appeared in a single volume. This authoritative guide provides an up-to-the-minute review of all that is known about the world's 123 species.

The forty magnificent plates by Alan Harris show every species, all main subspecies, and most sex and age variations—350 portraits in all. For easy reference, color maps showing breeding and wintering ranges appear opposite the plates. Text and plates are carefully coordinated, with emphasis on behavior, field characters, and identification. Species accounts are liberally illustrated with line drawings.

40 color plates. 118 color maps. 26 line drawings.

Cloth: \$49.50 ISBN 0-691-08780-6

Not available from Princeton in the U.K., Europe, or the Republic of South Africa

The Ostrich Communal Nesting System

Brian C. R. Bertram

As the study of cooperative breeding systems expands, the ostrich is increasingly becoming a textbook species, largely based on Brian Bertram's studies. Here Bertram unravels the basis of the cooperation observed, and explains how a system involving apparent altruism is maintained by natural selection.

Monographs in Behavior and Ecology

John R. Krebs and T. H. Clutton-Brock, Editors

52 line illustrations. 34 tables.

Cloth: \$39.50 ISBN 0-691-08785-7

New in paperback

A Guide to the Birds of Panama

With Costa Rica, Nicaragua, and Honduras

Robert S. Ridgely and John A. Gwynne, Jr.

This is the first paperback version of the second edition of this popular guidebook. The authors have added new information on approximately 200 new species to this second edition. Over 300 additional species have been illustrated. More than a third of the color plates are new or revised. Throughout the book changes were made to accommodate the explosion in knowledge of the birds of Panama and of neotropical birds in general. The basic sequence and systematics of the AOU 1983 Checklist were adopted.

Also included in the revised edition is expanded and updated information on birdfinding in Panama, prepared with the assistance of two of Panama's best resident birders.

48 color plates, 53 line drawings.

Now in paper: \$29.95 ISBN 0-691-02512-6

Lovebirds, Cockatiels, Budgerigars:

BEHAVIOR & EVOLUTION

by J. Lee Kavanau, UCLA

- ▶...highly informative volume...actually several books under one cover...[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard Univ.
- ▶...unique, exhaustive laboratory studies of..behavior...insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors...must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA
- ▶...enormous amount of information...very important contribution to..study of behavior of parrot birds, about which so little is known... Prof. K. Immelmann, Univ. Bielefeld
- ▶...monumental in..scope...much fascinating reading...many intriguing subjects...enormous project....excellent reference for..experimental behavior or evolutionary science...looking forward to..in-depth study &..to apply [the author's] concepts to...aviculture and avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987
- ▶...offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality. Auk, July, 1988
- ▶.....scope..is impressive.....information conveyed..is almost overwhelming.....comprehensive discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution of all birds.....extremely detailed discussion of the avian brain.....fascinating ideas on the evolution of bird reproductive behavior.....should provide much fuel for thought & some debate among students of avian evolution.....detailed descriptions of captive bird breeding and experimentation provide numerous ideas for..research on captive birds..... a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

March, 1987, xxvi + 1,001 pp., 7 indices, 1,455 refs., \$49.95

**POSTDOCTORAL FELLOWSHIP
AT THE
AMERICAN MUSEUM OF NATURAL HISTORY**

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund

Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

How many years would it take to replace your collection?

Oriental Bird Club

The Club's region of interest embraces the entire Indian Subcontinent, South East Asia, the Philippines, Taiwan and much of Indonesia and China.

It is open to all ornithologists throughout the world who share an interest in the region's birds and their conservation.

Members receive two Bulletins and a journal 'Forktail' annually, keeping them in touch with the latest developments in Oriental ornithology.

JOIN TODAY

Membership costs \$15 per annum.

For further details or to join (enclose your fee), write to OBC, c/o Dr R. Kennedy, Cincinatti Museum of Natural History, 1720 Gilbert Avenue, Cincinatti, Ohio 45202, USA

New books in the series . . . **CURRENT ORNITHOLOGY**

Volume 10

edited by **Dennis M. Power**

"This series continues to set standards of excellence."

—**BioScience**

This timely international compendium presents major advances in fundamental aspects of phylogeny, mating, parental care, trophic structure, demography, behavioral ecology, species diversity, and ontogeny. The book also features the most extensive list of international references available on raptor diet and feeding behavior and nocturnality. Individual chapters cover • the role of phylogenetic history in the evolution of contemporary avian mating and parental care systems • trophic structure of raptor communities: a three-continent comparison and synthesis • matrix methods for avian demography • nocturnality in colonial waterbirds: occurrence, special adaptations, and suspected benefits • latitudinal gradients in avian species diversity and the role of long-distance migration • evolution of avian ontogenies.

0-306-44282-5/366 pp. + index/ill./1993/\$85.00 (\$102.00 outside US & Canada)

Volume 9

edited by **Dennis M. Power**

Contributors to this volume provide helpful guidelines for conducting avian research, offer potential topics for future investigations, and explore the implications of ornithological studies on the field of conservation biology. Volume 9 includes discussions on the causes of extinction of the passenger pigeon, population regulation and foraging patterns in seabirds, nest predation and investigator disturbance, and song classification in warblers.

0-306-43990-5/252 pp./ill./1992/\$69.50 (\$83.40 outside US & Canada)

PLENUM PUBLISHING CORPORATION

Telephone orders: 212-620-8000/1-800-221-9369

A Quarterly Journal of Ornithology PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504.

Managing Editor: NEIL J. BUCKLEY.

Associate Editors: JOHN L. TRAPP (Recent Ornithological Literature) and BRUCE M. BEEHLER (Book Reviews).

The Auk welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

Manuscript preparation.—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). **Double-space all written material** (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues (note stylistic changes incorporated in January 1992). The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465-466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1991, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*, NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the fifth edition of the *CBE CBE Style Manual* (1983, available from CBE, 9650 Rockville Pike, Bethesda, Maryland 20814). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

Proofs, reprints, and charges.—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.

Books for review.—Forward books for review directly to: Robert M. Zink, Associate Editor for Book Reviews, Bell Museum of Natural History, 100 Ecology Building, University of Minnesota, St. Paul, Minnesota 55108, USA.
