

CAPTIVATING BIRD REFERENCES AND GUIDES FROM ACADEMIC PRESS

A Photographic Guide to North American Raptors

Brian K. Wheeler
William S. Clark

In this authoritative reference, two of the world's top experts on raptors provide an essential guide to the variations in the species, allowing for easier recognition of key identification points. All the distinguishing marks described have been exhaustively tested in a wide range of field conditions by the authors as well as the colleagues and students who have learned from them.

CONTENTS (Species List): Foreword by Peter Dunne. Glossary and Anatomy. Black Vulture. Turkey Vulture. California Condor. Osprey. Hook-billed Kite. Swallow-tailed Kite. White-tailed Kite. Snail Kite. Mississippi Kite. Bald Eagle. North Harrier. Sharp-shinned Hawk. Cooper's Hawk. Northern Goshawk. Common Black Hawk. Harris' Hawk. Gray Hawk. Red-shouldered Hawk. Broad-winged Hawk. Short-tailed Hawk. Swainson's Hawk. White-tailed Hawk. Zone-tailed Hawk. Red-tailed Hawk. Ferruginous Hawk. Rough-legged Hawk. Golden Eagle. Crested Caracara. American Kestrel. Merlin. Aplomado Falcon. Gyrfalcon. Peregrine. Prairie Falcon. Crane Hawk. Roadside Hawk. Hawaiian Hawk. Red-backed Hawk. Steller's Sea Eagle. White-tailed Eagle. Collared Forest Falcon. Northern Hobby. Common Kestrel. Raptor ID Problems.

The Summer Atlas of North American Birds

Jeff Price
Sam Droege
Amy Price

The last seasonal maps based on survey data showing the distribution of North American Birds in Summer. This unique book is a must for bird enthusiasts. As an authoritative guide, it includes 350 maps of the continental species, covering most of the birds that breed in North America. Breeding locations are indicated for species too locally distributed to map effectively.

Princeton Guidebooks

TERNs OF EUROPE AND NORTH AMERICA

**Klaus Malling Olsen
and Hans Larsson**

Terns are elegant sea and marshland birds that live throughout the world. In Europe and North America twenty-three species are found, all of which are described in this book. The variations among the species and their subspecies are great, and birders will be helped immensely by the text and illustrations. The text covers each bird in the field, in moult, and in the hand. It is accompanied by over forty color plates, and the book concludes with a 48-page photographic section, also in full color

Named 1994 Bird Book of the Year by Birdwatch magazine
Cloth: \$39.50 ISBN 0-691-04387-6

WHERE TO WATCH BIRDS IN SOUTH AMERICA

Nigel Wheatley

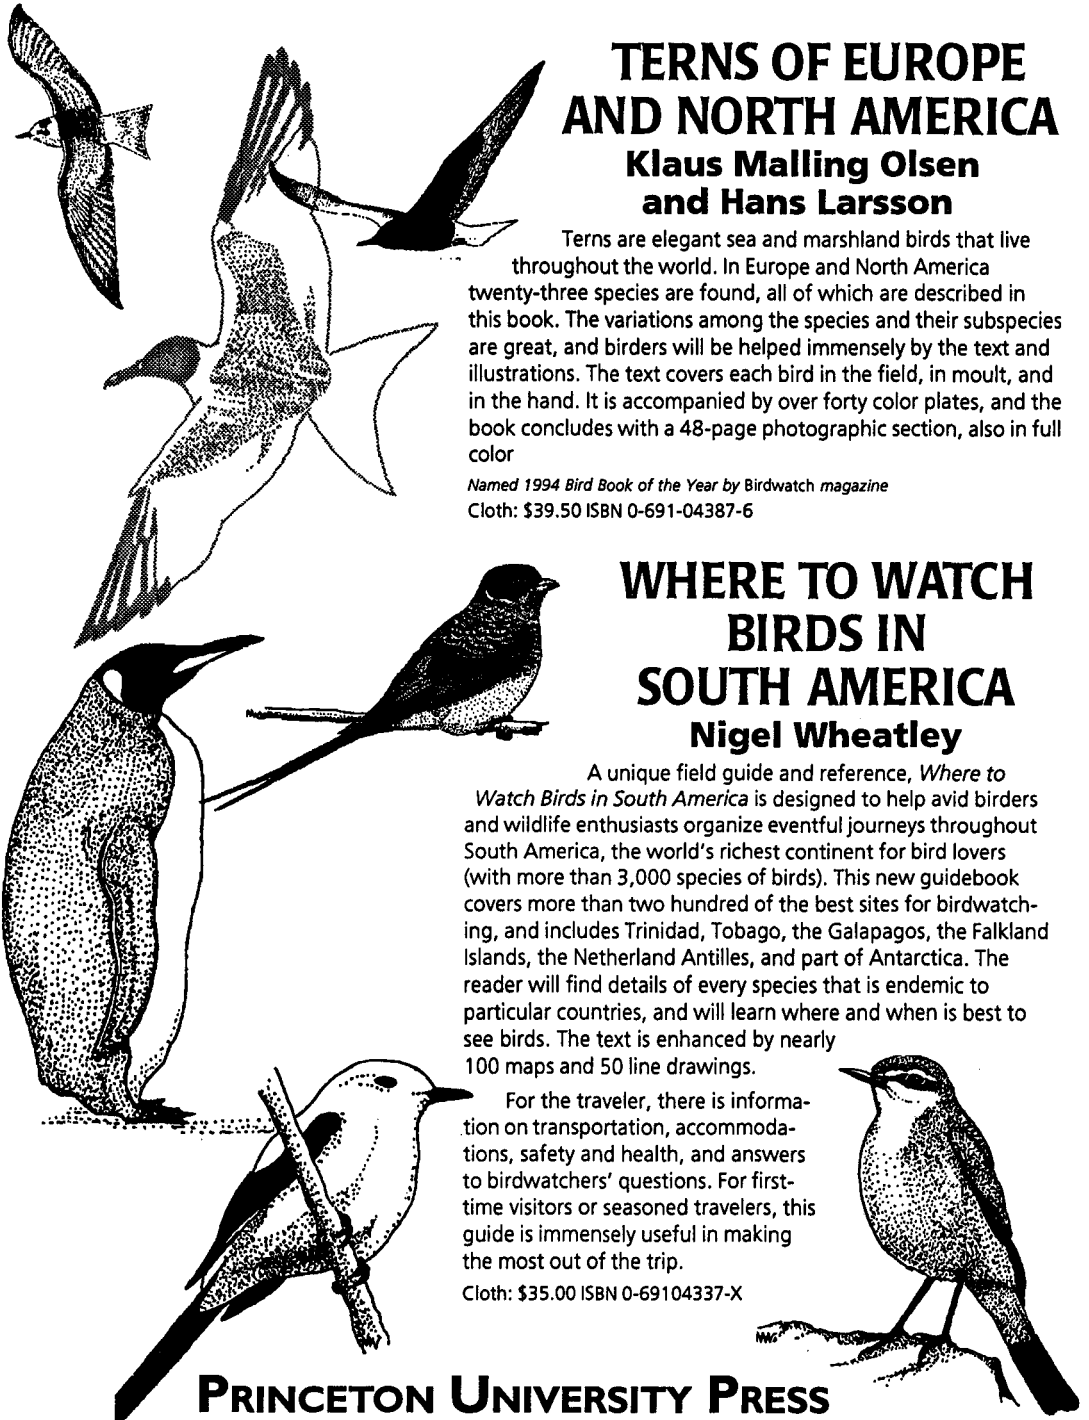

A unique field guide and reference, *Where to Watch Birds in South America* is designed to help avid birders and wildlife enthusiasts organize eventful journeys throughout South America, the world's richest continent for bird lovers (with more than 3,000 species of birds). This new guidebook covers more than two hundred of the best sites for birdwatching, and includes Trinidad, Tobago, the Galapagos, the Falkland Islands, the Netherland Antilles, and part of Antarctica. The reader will find details of every species that is endemic to particular countries, and will learn where and when is best to see birds. The text is enhanced by nearly 100 maps and 50 line drawings.

For the traveler, there is information on transportation, accommodations, safety and health, and answers to birdwatchers' questions. For first-time visitors or seasoned travelers, this guide is immensely useful in making the most out of the trip.

New for birders & nature lovers

NEW

The Eastern Screech Owl

Life History, Ecology, and Behavior in the Suburbs and Countryside
Frederick R. Gehlbach

Based on twenty-five years of research, this volume presents the first thorough study of the eastern screech owl, one of America's most familiar birds and one noticeably tolerant of human activity. Gehlbach's work also represents the first concurrent, comparative study of an urban and a rural population of any New World animal. 352 pp. 2 color, 36 b&w photos. 23 figs. 1 map. 27 tables. 10 apps. \$45.00s

Birds of Texas

A Field Guide

John H. Rappole
Gene W. Blacklock

"... a useful, succinct commentary for naturalists seeking to locate a specific bird... it exceeds the typical guide by focusing on specific habitats occupied by avifauna, with enough information to locate what is being sought in a confined geographic area—a particularly productive goal in the state of Texas. The book would be a rewarding gift for any naturalist and is a useful addition to the field guide packet of serious bird-watchers wanting to know more about the fascinating wild world."—*Science Books & Films*. 372 pp. 592 color photos. 10 line drawings. 619 maps. \$39.95s cloth; \$14.95 paper

Bird of Jove

David Bruce

The ancient art of falconry brings a Berkut eagle and a self-trained naturalist together. "... as fine a piece of nature writing as you will come across..."—*New York Times*. 5½x8½. 288 pp. 36 b&w photos. \$13.95 paper (U.S. and Canada only)

NEW

Sounds of Texas Birds

Volume 2

Robert Benson
Karen Benson

Complementing Volume 1, *Favorite Texas Birds*, these recordings of sixteen native birds and the narrative describing how birds have "regional dialects" are perfect for nature education and appreciation. 45 minutes. 16 color photos on package insert. \$10.95 cassette; \$16.95 compact disk

The Princeton Guidebooks

Chickadees, Tits, Nuthatches, and Treecreepers

Simon Harrap and David Quinn

This is the only guide of its kind. It covers the many members of these popular bird families, which count among them chickadees, titmice, penduline tits, Verdin, Bushtit, long-tailed tits, nuthatches, treecreepers and Wallcreeper. With its worldwide coverage, the book reaches far beyond Europe and North America to encompass the many exciting species to be found in Africa and Asia. Here is an authoritative guidebook that will appeal to both casual birders and professional ornithologists alike.

36 color plates. 110 color illustrations and maps.

Cloth: \$49.50 ISBN 0-691-01083-8 Available December 1995
Not available from Princeton in the U.K. or E.E.C.

Illustrated Guide to the Birds of Southern Africa

Ian Sinclair, Phil Hockey, and Warwick Tarboton

Illustrated by Peter Hayman and Norman Arlott

This is a comprehensive and up-to-date field guide to the birds of Southern Africa, featuring more than 4000 newly commissioned images. The book depicts over 900 species, resulting in the most comprehensively illustrated field guide ever produced for Southern Africa. The informative text, written by eminent ornithologists, is fully integrated with the color plates to facilitate use in the field. This guide is not only an unparalleled reference, but is a superb visual record of the rich variety of Southern Africa's birdlife.

4000 illustrations in 200 color plates.

Cloth: \$45.00 ISBN 0-691-04469-4

Available from Princeton in the U.S. and Canada only

Where to Watch Birds in South America

Nigel Wheatley

A unique field guide and reference, *Where to Watch Birds in South America* is designed to help the avid birder organize eventful journeys throughout the richest continent for birds, where the species number over 3,000. This book covers more than 200 of the best sites for birdwatching, and includes the archipelagos of Trinidad and Tobago, the Galapagos and Falkland Islands, the Netherland Antilles, and part of Antarctica.

ARENA BIRDS

Sexual Selection and Behavior

Paul A. Johnsgard

Focusing on a behavior shared by a variety of birds, this book summarizes the vast literature on arena birds. Johnsgard reviews sexual selection and details the components of mating behavior, including plumages, strutting, and other aspects of display.

38 color, 70 line illus. 346 pp.

DEAN OF THE BIRDWATCHERS

A Biography of Ludlow Griscom

William E. Davis, Jr.

Foreword by Roger Tory Peterson

"Any birder or field ornithologist will delight in this opportunity to get 'up close and personal' with the godfather of us all!"—Greg Butcher, Executive Director, American Birding Association

"A scholarly and engaging portrait of the great Griscom, who almost single-handedly turned birding with field glasses into a respectable pastime. Every birder will want to own a copy of this book."—John Farrand, Jr., editor, *The Audubon Society Master Guide to Birding*

"Davis has skillfully woven the elements of Griscom's personal life with his rich legacy of accomplishments."—Wayne R. Petersen, Field Ornithologist for the Massachusetts Audubon Society

40 b&w photographs 336 pp.
Cloth: 1-56098-310-8H \$29.95

WHITE IBIS

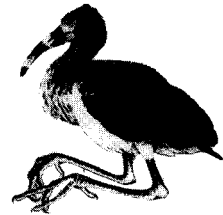

Wetland Wanderer

Keith L. Bildstein

"A sweeping review of subject matter in ornithology, behavioral ecology, and conservation. Bildstein presents an engaging, easy-to-read account of white ibis biology, beginning with a review of the role of ibises in human culture and ending with conservation issues. Highly recommended for students of ornithology and vertebrate ecology."—*Choice*

"An excellent model of how good science can be translated by a good scientist into good reading for nonscientists."—John L. Zimmerman, Kansas State University

23 b&w photographs, 44 line illus.
272 pp. Cloth: 1-56098-223-3H

A forerunner in the field of animal behavior

Behavioral Ecology and Sociobiology publishes original contributions dealing with quantitative empirical and theoretical studies in the field of the analysis of animal behavior on the level of the individual, population and the community.

Aspects of particular interest:

- intraspecific behavioral interactions, with special emphasis on social behavior
- Interspecific behavioral mechanisms, e. g., of competition and resource partitioning, mutualism, predator-prey interactions, parasitism
- Behavioral ecophysiology
- Orientation in space and time
- Relevant evolutionary and functional theory.

Manual of Ornithology

Avian Structure and Function

Noble S. Proctor and Patrick J. Lynch

Illustrated by Patrick J. Lynch

Foreword by Roger Tory Peterson

This book—a lavishly illustrated guide to the structure and anatomy of birds—explains why birds look and act the way they do.

“Here is a volume that has no parallel....A good reference book for those interested in the details of avian anatomy.”—Jerome A. Jackson, *Science Books & Films*

“A laboratory manual for the academic student, an invaluable reference tool for artists, and a rich source of information for the ordinary birder.”—*Bird Watcher's Digest* 226 illus. \$40.00

Winner of the Award of Excellence given by the Association of Medical Illustrators for the best elementary, high school, or college science text

Bird Anatomy II

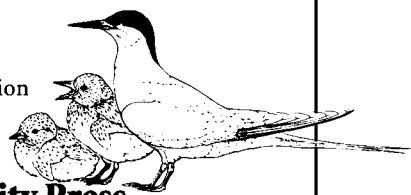

The Surface Anatomy of Birds

Patrick J. Lynch and Noble S. Proctor

Bird Anatomy II is an interactive multimedia approach to the study of the biology, behavior, flight, and anatomic structure of birds. As a companion to **Manual of Ornithology** or on its own, **Bird Anatomy II** gives students and bird lovers in general the ability to review anatomic information in a new context. \$75.00

The Birdlife of Florida

“There simply is no other single source that summarizes all this information. If this book were to remain unpublished, people would make yearly pilgrimages to wherever the manuscript was being kept in order to consult it. . . . Establishes exactly what the scientific foundation is for our knowledge of the status and distribution of birds in Florida. . . . This book ought to hold the interest of scientists well outside the Southeast and will be of international significance.”—Storrs L. Olson, Smithsonian Institution

904 pp. 8 1/2 X 11. Bibliography, index, 464 maps, 4 tables.

VOL. 111, NO. 2—19 MAY 1994

VOL. 111, NO. 3—11 OCTOBER 1994

VOL. 111, NO. 4—29 SEPTEMBER 1995

A Quarterly Journal of Ornithology PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504.

Managing Editor: KENT E. THOMPSON.

Associate Editor for Book Reviews: ROBERT M. ZINK, Bell Museum of Natural History, 100 Ecology Building, University of Minnesota, St. Paul, Minnesota 55108, USA (forward books for review directly to this address).

The Auk welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

Manuscript preparation.—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). **Double-space all written material** (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues (note stylistic changes incorporated in January 1992). The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465–466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1994, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*, NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the sixth edition of *Scientific Style and Format: The CBE Manual for Authors, Editors, and Publishers* (1994, Cambridge University Press, New York). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

Proofs, reprints, and charges.—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.

Contents (continued)

INTRASPECIFIC VARIATION IN ELEPAIO FORAGING BEHAVIOR IN HAWAIIAN FORESTS OF DIFFERENT STRUCTURE. <i>Eric A. VanderWerf</i>	917
