PERMANENT SPECIMEN PRESERVATION

with Lane ZOOLOGY AND ORNITHOLOGY SPECIMEN CABINETS

- Double Wall Construction
- Pest-Proof and Air Tight Seal
- Fumigant Compartment
- Lift-Off Safe Type Hinge
- 3-Point Locking Mechanism
- Double Panel Door
- Front and Back Air Tight Seals
- Specimen Trays of Aluminum and Masonite. Lightweight, sturdy and easy to handle.

FOR ILLUSTRATED BROCHURE, WRITE

Lane SCIENCE EQUIPMENT CORP.
225 WEST 34th Street  New York, NY 10122
(212) 563-0663  FAX: (212) 466-9440

Skin Case #: 201 (illustrated)
Holds large trays for larger specimens.

Skin Case #: 202 (not illustrated)
Divided for half-size trays for smaller specimens.

Where to Watch Birds in Africa
Nigel Wheatley

Where to Watch Birds in Africa is a field guide designed to help birders and general wildlife enthusiasts organize the most enriching trips possible throughout this great continent. From Morocco to Madagascar, this book presents over 200 bird-watching sites in detail and describes the species endemic to Africa. The traveler will find practical information on climate, transportation, accommodations, health, and safety as well as answers to a number of practical questions. Featuring over 100 maps and 50 line drawings, this book is not only a guide but also a handy reference.

Cloth: $35.00 ISBN 0-691-02140-6
Not available from Princeton in the U.K. or the E.E.C.

The Princeton Field Guide to the Birds of Australia
Edited by Ken Simpson
Illustrated by Nicolas Day

In paintings of extraordinary beauty and precision, Nicolas Day captures the details of all 770 bird species in Australia. More than 2,000 color illustrations are accompanied by distribution maps, descriptive drawings, and essential field information edited by Ken Simpson.

Cloth: $39.50 ISBN 0-691-02575-4
Available from Princeton in the U.S. and Canada only
Published outside North America as Field Guide to the Birds of Australia, fifth edition.

Messages from an Owl
Max R. Terman

Here is a delightfully told tale of the rescue and rearing of an orphaned owlet. "Stripey," a great horned owl who was discovered in a park in Kansas, was successfully released back to the wild—but the story doesn’t end there. Through the use of a radio tracking device, Max Terman was able to stay in touch with Stripey, who remains remarkably tame with him. Theirs is a unique relationship and Terman describes it with great warmth and affection.

New in paperback

Birds of Europe with North Africa and the Middle East
Lars Jonsson
Translated by David Christie

"If I were absolutely forced to take only one field guide with me on a birding trip to Europe, this is the one I would choose. The illustrations are outstanding and almost negate the need for a text. Some are works of art that could be hung in a gallery... The introductory pages should be required reading for all birders."

—Jeff Swinebread, Audubon Naturalist News

Not available from Princeton in the U.K., E.E.C., or South Africa
The Directory of Neotropical Ornithology is a listing of all individuals and organizations involved with birds in the neotropics. These include governmental and non-governmental organizations dealing with research, permits, and conservation of birds. In the eight years since the first edition, the number of ornithologists and organizations has increased dramatically in the neotropics. The new edition has been greatly expanded to include these, and now also includes information on field stations in seven countries. The Directory should be indispensable to all ornithologists and conservationists working in the neotropics.

Each copy is $7.50 plus 5% shipping and handling ( $2.00 minimum for U.S. orders, $4.00 minimum for foreign orders). Please make checks in U.S. funds payable to “AOU” and send to:

Officers and Editors

President-Elect: NED K. JOHNSON, Museum of Vertebrate Zoology, University of California, Berkeley, California 94720

Vice President: ELLEN D. KETTERSON, Department of Biology, Indiana University, Bloomington, Indiana 47405

Secretary: MARY VICTORIA McDONALD, Department of Biology, University of Central Arkansas, Conway, Arkansas 72035

Treasurer: FREDERICK H. SHELDON, Museum of Natural Science, Foster Hall 119, Louisiana State University, Baton Rouge, Louisiana 70803

Editor of The Auk: THOMAS E. MARTIN, Montana Cooperative Wildlife Research Unit, University of Montana, Missoula, Montana 59812

Editor of Ornithological Monographs: JOHN M. HAGAN III, Manomet Bird Observatory, Manomet, Massachusetts 02345

Elective Councilors and Living Past Presidents

Instructions to Contributors

The Auk publishes original reports on the biology of birds. Appropriate topics include documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Authors are encouraged to write papers from the perspective of general concepts and theories, and to consider the relevance of their findings to taxa in addition to birds. The Auk strives to publish a color frontispiece with each lead article; authors are encouraged to submit suitable color illustrations. Contributions are welcome from throughout the world but must be written in English. Submit five copies of each manuscript complete with tables, figure legends, and figures (retain original figures until notified) to the Editor. Include a copy of the manuscript on a 3.5-inch diskette (WordPerfect preferred, but identify the software). Double-space all written material (including tables and figure legends) on standard-sized stationery. Number pages through the figure legends. Submit tables separately from the text; type figure legends consecutively on a separate sheet. Manuscripts should conform to general usage in the most recent issue of the journal. The title page should contain: (1) full title; (2) authors' names and addresses; (3) left and right running heads (<36 characters each); and (4) name, mailing address, and e-mail address of author to whom correspondence should be sent. Detailed instructions to contributors are available in Auk 113(3): 731-733; copies may be obtained from the Editor. Paying close attention to these instructions will hasten the processing of your manuscript and gratify the editorial staff.
## Contents (continued)

**MORPHOLOGICAL ASPECTS OF AVIAN TAIL MOVEMENTS: A FUNCTIONAL APPROACH IN HIRUNDINES.**  
Eulalia Moreno and Anders Pape Møller  

**MITOCHONDRIAL DNA SEQUENCE VARIATION AMONG THE SUBSPECIES OF SARUS CRANE (GRUS ANTIGONE).**  
Timothy C. Wood and Carey Krajewski  

**MATE REPLACEMENT IS COSTLY TO MALES IN THE MULTIBROODED HOUSE SPARROW: AN EXPERIMENTAL STUDY.**  
José P. Veiga  

**IN MEMORIAM: ANDREW J. BERGER, 1915–1995.**
