

Two Beautiful New Bird Books

MESSRS. A. C. McCLURG & CO. have much pleasure in announcing the publication of a most important volume on the

Birds of the Rockies

With Check List of Colorado Birds

By Dr. Leander S. Keyser

Author of "In Bird Land," etc. This is the first work dealing distinctively, with the birds of a most interesting section of our country.

Mr. John Burroughs says: "This is the best bird book that has come to me in years."

The Outlook says: "This is a notable contribution to American bird-lore. Its peculiar interest lies in the fact that the author has chosen for his field of observation a locality where, in addition to the usual bird pilgrimages north and south, there is a migration up and down the mountains. Mr. Keyser records his observations with scientific accuracy, and describes his rambles over the plains, through the canyons, and up the dizzy heights with a freshness and charm that will be thoroughly enjoyable to all nature-lovers."

The Omaha Bee says: "It is not only beautifully printed, but is a valuable book for ornithologists and will undoubtedly be sought by them eagerly, as it is the best and most thorough publication ever printed treating of birds and their habits in that section of the country."

The Illustrations

The illustrative features of the work are in keeping with its importance. Louis Agassiz Puertes, already well known for his accurate and beautiful delineations of birds has furnished eight full-page plates, four in colors; while Bruce Horsfall, eminent in the more decorative feature of bird-illustration, has supplied more than thirty charming text pictures, which delight the eye and fix the fact in the mind. There are also many reproductions from photographs of localities frequented by certain species, thus adding to the practical utility of the work for the ornithologist.

"Taking a Sun Bath in the Road."

The work contains 355 pages, and a very complete Index.

Price, put up in a box, \$3.00 net; or \$3.24 prepaid.

Nestlings of Forest and Marsh

By IRENE GROSVENOR WHEELOCK

Beautifully illustrated with twelve full-page Photogravures and about fifty delicate Half-tones in the text from original photographs.

"**M**RS. WHEELOCK would seem to have the magic touch in taming the shyest and rarest. She has a host of incidents at command and illustrates her pleasant narrative with many illustrations direct from nature. The volume is a delightful addition to the library of the bird student and lover." *Philadelphia Public Ledger.*

12mo, 257 pages, \$1.40 net; delivered \$1.52.

H. C. McClurg & Co., Publishers,

Chicago
